## **THE AWESOME MIRACLES**

Who exactly is the God that created the universe and everything therein? This is a profoundly important question begging for answers on the lips and minds of many people. Millions of people are skeptical, millions confused and millions continue to question and vehemently deny the existence of God.

To some, there is only one God, to others, there are multiple, and there are people who assert that God existed at one point but has ceased to exist. There are so many different gods that people worship across the world, e.g. Allah, Brahma, Jesus, Vishnu etc. but who exactly is that God truly worthy of worship?

Find out in this eye-opening and exciting book the answers to these questions boggling the minds of many people, which some dare to ask and others confine to their minds. The true God continues to reveal Himself to humanity through His creation and variety of ways, thereby leaving us without any excuse.

Presented in this book are simple, verifiable and incontrovertible mathematical proofs put in place by God the Almighty Creator, on the Gregorian calendar, in order to clear our doubts and make the truth overly glaring to us.

The Gregorian calendar, also known as the Christian calendar, is the most widely used calendar in the world. This calendar which provides overwhelming proofs of the One and only true God is a major fulfillment of the prophecy of God to show us His signs until the truth becomes manifest to us.

Why did God create the heavens and the earth in 6 days, why not in less than a second since He's able to do all things? Why does it take 365 days divided into 12 months for the earth to revolve around the sun? Why do we have even and odd nos.? Why are there composite and prime nos.?

In all of these, there are signs embedded for us to see. God assigned these nos. for a purpose and not by coincidence. Having been blessed with much of this knowledge, I strongly believe that before God created anything, He first created mathematics.

He knew the count of all things even before He created them and He did everything in the right measure, not for the fun of it, but that we might witness awesome miracles and signs therefrom and we might know that there is a creator behind all of these things.

Mathematics is a universal language, it is the only language shared by all civilizations regardless of religious beliefs, culture or gender. The principles and foundations of mathematics are the same everywhere in the world. The equation one plus two will always equals three ( $1 + 2 = 3$ ).

Henri Poincare, a famous French mathematician once said, "if God speaks to man, He undoubtedly uses the language of mathematics". Many people would say God does not have anything to do with mathematics, that there is no relationship, this is an opinion born out of ignorance.

Mathematical miracles endure for all time. They can be witnessed and verified by one and all in every parts of the world until the end of time, unlike other miracles which can only be witnessed by some set of people in a particular place and endures only for a limited period of time.

To the Christians, Muslims, Jews, Atheists, Hindus, Buddhists, to everybody, this is God's message to you all in mathematics. If yours is a heart yearning for the truth about the Creator of the universe, I can guarantee that you will find it here.

God's invisible attributes, His eternal power and deity, His absolute control over everything, His omniscience, omnipresence and perpetuity are all made visible by the mathematical evidences presented by the Gregorian calendar.

So, come with me with an open mind as we journey through this, may God in His infinite mercy guide us all to His path – the right path. Amen.

### **Numerical Values**

The English alphabet consist of 26 letters, from A to Z. To calculate the numerical value of English words, nos. are assigned to the letters according to the position of the letters in the English alphabet, i.e. A = 1, B = 2, C = 3. The table below shows the English alphabet and their nos.

A	B	C	D	E	F	G	H	I
1	2	3	4	5	6	7	8	9
J	K	L	M	N	O	P	Q	R
10	11	12	13	14	15	16	17	18
S	T	U	V	W	X	Y	Z	
19	20	21	22	23	24	25	26	

The word God is composed of 3 English letters, G, O, D, where G = 7, O = 15, D = 4. Thus, the Numerical Value (NV) of God is 26, i.e.  $7 + 15 + 4 = 26$ .

GOD	G	O	D	Total
	7	15	4	26

Allah is the Arabic word for God, it is composed of 4 Arabic letters, Alif, Lam, Lam, Ha. In the Arabic alphabet, Alif = 1, Lam = 30, Lam = 30, Ha = 5. The NV of Allah in Arabic is 66.

ALLAH	A	L	L	H	Total
(Arabic)	1	30	30	5	66

Allah is composed of 5 English letters, A, L, L, A, H. The NV of Allah in English is 34.

ALLAH	A	L	L	A	H	<b>Total</b>
(English)	1	12	12	1	8	<b>34</b>

I would like to give you a brief introduction to the miraculous code 19 in case you don't know about it yet, as you will be encountering it throughout this book.

The no. 19 was unveiled as the miraculous code of the Qur'an in 1974 when a highly sophisticated and intricate mathematical system based on this no. was discovered in the Qur'an.

19 consists of the First and the Last single-digit natural nos. which is 1 & 9. The no. 19 is a prime no. which means it cannot be divided by any other no. except 1 and itself.

The no. is the NV of the word "One" in all the scriptural languages, i.e. Aramaic, Hebrew and Arabic. For example, the Arabic word for "One" is "Wahid", the NV is 19.

Wahid (One) is an attribute of Allah (God). The no. 19 thus proclaims the scripture's dominant message: There is only ONE GOD. It also proclaims God's attributes, the First and the Last.

$$\text{Wahid (One): } 6 + 1 + 8 + 4 = 19$$

The only verse of the Qur'an where the code 19 is mentioned is the verse 74:30. In verse 74:31, the function and purpose of the no. 19 is prophetically explained. For this no; the verse lists the following functions:

1) As a trial for the unbelievers, 2) to convince the Jews and Christians that the Qur'an is the truth, 3) to strengthen the faith of the believers, 4) to remove all traces of doubt from the Jews, Christians and the believers, 5) and that those sick at heart and the unbelievers may say: what does God mean by this example/similitude.

The no. 19 is the secret code of God, it is a powerful evidence of the existence of God. It is God's signature on the universe and everything He created. The no. 19 which provides irrefutable proofs of the authenticity of the Qur'an plays an important role in the structure of this scripture.

The chapters, verses, words, letters and all the parameters of the Qur'an were coded by means of this prime no. 19.

For example, the total no. of chapters in the Qur'an is 114, the total no. of verses is 6346, the frequency of the word God is 2698, to mention a few. All these totals are multiples of 19.

$$114 = 19 \times 6$$

$$6346 = 19 \times 334$$

$$2698 = 19 \times 142$$

Bismi Lahi Ar-Rahman Ar-Rahim is the first verse of the Qur'an and it is the first verse in all except for one chapter of the Qur'an. The no. of Arabic letters this first verse is composed of is 19.

The first chapter in the revelation order of the Qur'an is chapter 96 (Embryo), it has 19 verses and a total of 304 (i.e. 19 X 16) Arabic letters. Chapter 96 is the 19<sup>th</sup> chapter till the end of the Qur'an.

The Qur'an's mathematical coding ranges from the very simple to the very complex. The simple facts about the Qur'anic mathematical code of 19 are those observations that can be ascertained without using any tools. The complex facts require the assistance of a calculator or a computer.

### The Six Days

The NV of Gregorian is 94 and calendar is 58. Thus, the total NV of the words, Gregorian calendar is 152 which is a multiple of 19.

G	R	E	G	O	R	I	A	N		C	A	L	E	N	D	A	R	Total
7	18	5	7	15	18	9	1	14		3	1	12	5	14	4	1	18	152

#### Gregorian Calendar

$$94 \text{ (Gregorian)} + 58 \text{ (Calendar)} = 152 \text{ or } 19 \times 8$$

The Gregorian calendar comprises of 365 days in a year, out of these, you find 6 days (or dates) whose total NV (month + day) each gives the no. 152, which is the total NV of Gregorian calendar.

There is a date which stands out amongst the 6 by the fact that it does not only give the total NV of Gregorian calendar like the other dates, the NV of the month and the NV of the day gives us the NV of Gregorian and calendar respectively.

The date is November Two (11/02). Interestingly, this date is the very last of the 6 days (dates).

The NV of the month, November is 94, which is the NV of Gregorian. The NV of the day no. Two is 58, the NV of calendar.

November Two: 11/02

November = 94 (Gregorian)

Two = 58 (Calendar)

Total: 94 + 58 = 152 or 19 X 8

Table 1.0 below shows the 6 dates, the NV of the dates, the month and day nos; their digit sum and the corresponding day of the year for the dates.

To verify the dates on table 1.0 below or to find out the dates whose total NV (month + day) gives 152, simply find the NV of the names of the 12 months of the calendar, then find the NV of day nos. from 1 to 31.

Since the sum of the NV of the month plus day no. must be 152, subtract the NV of the name of each month from 152, then check the day no. whose NV tallies with the remainder.

For example, the NV of January is 90,  $152 - 90$  is 62, there is no day no. from 1 to 31 whose NV is 62. Another example, the NV of February is 96,  $152 - 96 = 56$ , the day no. whose NV is 56 is Three. Thus, we get the date, February Three (02/03).

S / N	Dates (Month & Day)	NV of Dates	Total NV of Dates	Month Nos.	Day Nos.	Digit Sum of Month Nos.	Digit Sum of Day Nos.	Day of The Year
1	February Three	$96 + 56$	152	02	03	2	3	<b>34</b>
2	March Seventeen	$43 + 109$	152	03	17	3	8	76
3	April Sixteen	$56 + 96$	152	04	16	4	7	106
4	August Eleven	$89 + 63$	152	08	11	8	2	223
5	September Eight	$103 + 49$	152	09	08	9	8	251
6	November Two	<b>94 + 58</b>	152	11	02	2	2	<b>306</b>
<b>Total</b>			912	37	57	28	30	
				<b>94</b>		<b>58</b>		

Table 1.0

The total of the month and day nos. of the 6 dates on table 1.0 above provides us with a proof that these 6 dates, in truth, stands for the calendar's name – Gregorian calendar.

- 1) The total of the month and day nos. is 37 & 57 respectively, the total of the two gives 94, the NV of Gregorian. This is same as the NV of November, the last month on the table.
- 2) The total of the digit sum of the month and day nos. is 28 & 30 respectively, the total of the two is 58, NV of calendar. This is same as the NV of Two, the last day no. on the table.

<u>The 6 Dates of The Calendar</u>	
1) Month & day nos:	$37 + 57 = \mathbf{94}$ (Gregorian)
2) Month & day nos:	$28 + 30 = \mathbf{58}$ (Calendar)

The total of the month and day nos. and the total of their digit sum, 94 & 58 denotes the “Gregorian Calendar” as well as the date, “November Two” (11/02) which is the last date on the table.

The month and day no. of the last date, 11/02 written successive is 1102. This no. is a multiple of 19, the coefficient is 58, the NV of calendar.

$$1102 = 19 \times 58 \text{ (Calendar)}$$

Each date on table 1.0 has a total NV of 152, a multiple of 19. Therefore, the grand total of NV for the 6 dates, 912 is automatically a multiple of 19. It will interest you that the grand total of the no. of English letters the 6 dates are composed of is 76, this no. is also a multiple of 19.

The 6 Dates of The Calendar

Grand total of NV = 912 or  $19 \times 48$

Grand total of letters = 76 or  $19 \times 4$

God has infinite powers, infinite knowledge and infinite wisdom. He could have created the whole universe in no time at all, He chose 6 days, not because He needed that much time to create but that this no. of days may serve to us great signs.

There's wisdom behind whatever God does and nothing happens by chance. It is significant that the universe and all it contains was created in 6 days, and the name and attributes of the Almighty Creator is unveiled by 6 days of the Gregorian calendar (table 1.0) as you will soon find out.

The "Gregorian calendar" is also known as the "Christian calendar". The NV of Christian calendar (i.e. 159) gave exactly 6 days (dates) on the calendar, the same no. of days as the NV of Gregorian calendar (Table 1.0). Each of these 6 days unveiled phenomenal and irrefutable signs of God.

The 6 days derived from the NV of Gregorian calendar are the origin and the basis of *The Awesome Miracles* you'll be finding in this book while the 6 days from the NV of Christian calendar are the origin and basis of *The Outstanding Miracles* in my previous book.

## **THE SIX DAYS AND THE ATTRIBUTES OF GOD**

The Merciful God has chosen to make the truth overly distinct from falsehood, He promised to continue to reveal His signs within the disbelievers until it becomes clear to them that they have been in plain error.

Presented in this section are phenomenal findings I made on the Gregorian calendar by the leave of the Almighty. After this, I can guarantee that any disbeliever with an open mind and with a heart sincerely yearning for the truth will need no more proof.

The mathematical miracles you will be witnessing here are truly awesome and mind-blowing, more than enough to put an end to any argument, disbelief and doubt concerning the true God (Allah), His Book – the Qur'an and what the Gregorian calendar means to it.

The 6 days (dates) on table 1.0 signifying the Gregorian calendar has been divinely selected by God, the Controller and Overseer of the universe, for the purpose of showing us some powerful and tremendous signs as regards Himself, the Qur'an and the calendar.

Table 1.0 containing the 6 dates is reshown below. The table shows the dates, the day and month nos. and their corresponding day no. of the year.

S/N	Dates (Day & Month)	Day Nos.	Month Nos.	Day of The Year
1	Three February	3	2	<b>34</b>
2	Seventeen March	17	3	76
3	Sixteen April	16	4	106
4	Eleven August	11	8	223
5	Eight September	8	9	251
6	Two November	2	11	<b>306</b>

Table 1.0

On table 1.0, the word Allah occurs twice, one at the First date, the other one at the Last date, one is Apparent (or Manifest) and the other is Hidden.

This phenomenon takes us to four of the attributes (or names) of Allah that are mentioned in the Qur'an. They are: the First and the Last, the Apparent and the Hidden.

The First date on table 1.0 is Three February (3/2), this is the day no. 34 of the year. The Last date on table 1.0 is Two November (2/11), this is the day no. 306 of the year.

The day no. of the year for the First and the Last dates on the table stands for the word Allah and His attributes in the Qur'an as stated above.

There are so many false gods that people worship across the world, but none of them possess the attributes of the one true God. The Gregorian calendar via the table 1.0 reveals some of these attributes of the true God.

### **The First And The Last**

The attributes of the Almighty God in the Qur'an include: "The First (Al-Awwal)" and "The Last (Al-Akhir)". God is the First (the Alpha), preceding everything without having any beginning, and He is the Last (the Omega), succeeding everything without having any end.

Table 1.0 testifies to this fact about the Creator of the universe and everything that exists. The occurrence of Allah at the First and the Last dates (as you will soon find out) on the table symbolizes these indisputable attributes of the Almighty Creator.

The day no. of the year for the First and Last dates gives the word Allah with the coefficients, 1 & 9 respectively. Only these two dates on the table gives this word.

The two attributes of Allah mentioned above are indicated and confirmed by the positions of the two dates on the table and the coefficients from their day nos. of the year.

Three February (3/2): The date's position is the First, the coefficient is 1 which is the First single digit natural no. The date's position and its coefficient thus stand for Allah's attribute: The First.

$$\text{Day no. } 34 = 34 (\text{Allah}) \times 1 (\text{the First})$$

Two November (2/11): The date's position is the Last, the coefficient is 9 which is the Last single digit natural no. The date's position and its coefficient thus stand for Allah's attribute: The Last.

$$\text{Day no. } 306 = 34 (\text{Allah}) \times 9 (\text{the Last})$$

#### **The 6 Dates of The Calendar**

3/2: Position **(The First)**, Day no. **34 = 34 (Allah) X 1 (The First)**

2/11: Position **(The Last)**, Day no. **306 = 34 (Allah) X 9 (The Last)**

Allah - **The First and The Last**

Or

Allah - **The Beginning and The End**

The coefficients, 1 & 9 makes up the no. 19, the NV of Wahid (One), an important attributes of Allah (God). The no. 19 is the secret code of the Qur'an, it is God's stamp upon everything He created.

In the beginning, Allah created the heavens and the earth. He put the sun and moon in place and He established the cycle of day and night. The orbital motion involving the earth and the two most important astronomical objects, the sun and moon forms the basis of most calendars.

The 6 dates on table 1.0 stands for the Gregorian calendar, the occurrence of Allah at the very First and Last date is a profound indication of Allah's absolute control of all the days of this calendar, right from the First day to the Last.

This just goes to show that Allah is the one in charge of every single day of our lives from the First day to the Last. He starts the day and ends it, He starts the year and ends it, and not a single day or year will begin or end except by His will.

Allah is the witness over all things, from the beginning to the end. He is never absent from the scene. He observes all thoughts, all deeds and all events, to Him belongs the command. Nothing will happen in the heavens and the earth unless decreed by Him.

### **The Apparent And The Hidden**

The Apparent (Al-Zahir) and the Hidden (Al-Batin) are contrasting attributes of God that are also mentioned in the Qur'an.

God is the Apparent (the Manifest, Visible, Obvious, Outward), the one that nothing is above Him and the signs of His existence are evident in all creation. Yet, at the same time, He is the Hidden (the Concealed, Obscured, Inward), the one who is unseen and is concealed within all of creation. No vision can grasp Him, but His grasp is over all visions.

These attributes permit more than one interpretation, they also mean that God knows everything Apparent just as He knows everything Hidden.

The NV of Allah (English) is 34. Much later we would be seeing some stunning discoveries with respect to the word Allah and this no. in the Qur'an.

On table 1.0, the day no. of the year for the First date is 34, this no. is exactly the same as the NV of Allah (English). Thus, the word Allah is Apparent at the First date.

$$\text{Day no.} = 34 \text{ (Allah)}$$

The day no. of the year for the Last date is 306. Here, there is the need for an arithmetic operation such as division to be performed to get the NV of Allah, 34. Dividing the day no. 306 by 9 (the Last single digit natural no.) gives the no. 34. Thus, the word Allah is Hidden at the last date.

The day no. of the year for the Last date, 306 is a multiple of 34 (Allah) which is the day no. of the year for the First date.

$$\text{Day no.} = 306, 306/9 = 34 \text{ (Allah)}$$

Do note that there is no other date on table 1.0 whose day no. of the year is equivalent to the no. 26, 34 or 66 (i.e. NV of God/Allah) or that is a multiple of any of these nos. except for the First and the Last dates on the table.

While Allah is Apparent at the First date, it is Hidden at the Last, this remarkable phenomenon symbolizes the attributes of the Almighty Allah, “the Apparent and the Hidden”.

Combining these two attributes with the other two earlier derived from the two dates’ positions and coefficients, we get four attributes of Allah mentioned in the Qur’an, “the First and the Last, the Apparent and the Hidden”.

#### The 6 Dates of The Calendar

3/2: Position/Coefficient *(The First)*, Day no. **34** (Allah) *(The Apparent)*

2/11: Position/Coefficient *(The Last)*, Day no. **306\*** (Allah) *(The Hidden)*

Allah - *The First and The Last*

Allah - *The Apparent and The Hidden*

306\* is used above to indicate that  $306/9 = 34$  (Allah).

#### The Attributes And The Qur’an

The First and Last dates on table 1.0 having pointed out four attributes of God, still goes on to point out the only verse of the Qur’an (i.e. chapter and verse no.) where God referred to Himself by these attributes. This is the verse 57:3 of the Qur’an.

*“He is the First and the Last, the Apparent and the Hidden. And He has full knowledge of all things” – Qur’an 57:3 (94:3)*

God desires to make His signs abundantly clear to us, to erase any kind of doubt from our minds and bring to us certainty. So that those who still cling on to unbelief afterwards will have only themselves to blame on the day of reckoning.

In the Qur'an, any word, any name or message you find in any chapter or verse no. is there for a purpose not by coincidence, and such is the case with the message and the attributes of God mentioned in verse 57:3.

God chose the appropriate chapter and verse no. (chapter 57 verse 3) for the four attributes with the purpose of showing us some incontrovertible signs on the Gregorian calendar about Himself and proving the divine origin of the Qur'an.

On table 1.0, the word Allah (God) occurs twice, at the First date and at the Last, one is Apparent and the other is Hidden. In verse 57:3, we see these four attributes of God, "the First and the Last, the Apparent and the Hidden".

S/N	Dates (Month & Day)	Dates' Positions	Day of The Year	NV of Allah
1	Three February (3/2)	The First	<b>34</b> (Allah)	The Apparent
6	Two November (2/11)	The Last	<b>306*</b> (Allah)	The Hidden

306\* is used on table above to indicate that  $306/9 = 34$  (Allah).

Table 1.0 from the Gregorian calendar perfectly demonstrates four attributes of God and as well gives the verse 57:3 of the Qur'an where they are found. Do note that this calendar was commissioned 950 years after the Qur'an's revelation.

Table 1.0 is an irrefutable evidence of God's absolute knowledge of the Gregorian calendar before it was commissioned and hence, His absolute knowledge of all things. This fact is confirmed by the same verse 57:3 containing the attributes, i.e. the part of the verse immediately following the four attributes.

57:3. "...And He has full knowledge of all things"

Now, let's find out how this verse of the Qur'an is indicated by the table.

The table below shows the 6 dates on table 1.0, the attributes of God as indicated by the dates, the day nos; the cumulative sum of the day nos. and the chapter and verse of the Qur'an that the First and the Last no. represent.

S/N	The Attributes of God As Indicated By Dates	Dates (Day)	Day Nos.	Cum. Sum of Day Nos.	Chapter & Verse No.
1	The First, The Apparent	Three	<b>3</b>	<b>3</b>	Verse <b>3</b>
2		Seventeen	17	20	
3		Sixteen	16	36	
4		Eleven	11	47	
5		Eight	8	55	
6	The Last, The Hidden	Two	2	<b>57</b>	Chapter <b>57</b>
		<b>Total</b>	<b>57</b>		

Table 1.0a. Day Nos. Only

The table below shows the 6 dates on table 1.0, the attributes of God as indicated by the dates, the day and month nos; the cumulative sum of the day and month nos. and the chapter and verse of the Qur'an that the First and the Last no. represent.

S/ N	The Attributes of God As Indicated By Dates	Dates (Day & Month)	Day & Month Nos.	Cum. Sum of Day & Month Nos.	Chapter & Verse No.
1	The First, The Apparent	Three	3	3	Verse 3
		February	2	5	
2		Seventeen	17	22	
		March	3	25	
3		Sixteen	16	41	
		April	4	45	
4		Eleven	11	56	
		August	8	64	
5		Eight	8	72	
		September	9	81	
6	The Last, The Hidden	Two	2	83	
		November	11	94	Chapter 94
		<b>Total</b>	<b>94</b>		

Table 1.0b. Day and Month Nos.

Table 1.0a involves only the day nos. on table 1.0 while table 1.0b involves both the day and month nos. on table 1.0.

The results of table 1.0a corroborates the results of table 1.0b and vice versa. While the results of table 1.0a stands for the chapter and verse of the Qur'an in the traditional order, table 1.0b stands for the same chapter and verse of the Qur'an in the chronological order.

The Qur'an was not arranged in the order in which it was revealed. The order in which the chapters of the Qur'an were arranged is called the "traditional order" and the order in which they were revealed is the "chronological order".

On table 1.0a, the total of the day nos. from the First to the Last date (i.e. the two dates which exhibits the four attributes) is 57. This is the chapter 57 (titled The Iron) which is the only chapter where the four attributes are mentioned in the traditional order of the Qur'an.

Total of day nos. = 57 (Traditional order)

On table 1.0b, the total of the day and month nos. from the First to the Last date (i.e. the two dates which exhibits the four attributes) is 94. This is the chapter 94 (titled The Iron), the only chapter where these attributes are mentioned in the chronological (revelation) order.

Total of day & month nos. = 94 (Chronological order)

Chapter 57 (Iron) in the traditional order is 94 in the chronological (revelation) order of the Qur'an. This means that the chronological no. of chapter 57 is 94 (chapter 57 is the 94<sup>th</sup> revealed chapter).

*“He Is The First and The Last, The Apparent and The Hidden”*

– Qur'an 57 (94)

Table 1.0a: Total of day nos. from the First to Last no. = 57

Chapter no. titled “The Iron” (Traditional order) = 57

Table 1.0b: Total of day & month nos. from the First to Last no. = 94

Chapter no. titled “The Iron” (Chronological order) = 94

On table 1.0a, the cumulative sum of day and month nos. at the Last and First dates (i.e. at the two dates which exhibits the four attributes) is 57 & 3 respectively. These nos. give the chapter 57 verse 3 (or verse 57:3) which is the only verse where the four attributes are mentioned in the traditional order.

Cum. Sum @ the Last & First nos. = 57 & 3 (Traditional order)

On table 1.0b, the cumulative sum of day and month nos. at the Last and First dates (i.e. at the two dates which exhibits the four attributes) is 94 & 3 respectively. This gives us the chapter 94 verse 3 (or verse 94:3), the only verse where these attributes are mentioned in the chronological order.

Cum. Sum @ the Last & First nos. = 94 & 3 (Chronological order)

Verse 57:3 in the traditional order is 94:3 in the chronological order of the Qur'an.

*“He Is The First and The Last, The Apparent and The Hidden”*

– Qur'an 57:3 (94:3)

Table 1.0a: Cum. Sum @ the Last and First no. = 57 & 3

Chapter & verse no. (Traditional order) = 57 & 3 (Verse 57:3)

Table 1.0b: Cum. Sum @ the Last and First no. = 94 & 3

Chapter & verse no. (Chronological order) = 94 & 3 (Verse 94:3)

You will agree with me at this point that table 1.0 from the Gregorian calendar, is a complete mathematical illustration of the message of verse 57:3 of the Qur'an and the attributes of God mentioned therein.

The First and Last dates on the table gave the word God as well as four of His attributes. The same First and Last dates gave the exact verse of the Qur'an where these attributes are found both in the traditional and chronological order.

God Authored the Qur'an putting into consideration the Gregorian calendar, He planned the calendar putting into consideration the Qur'an. He planned and executed it through the unbelievers in order to show them His signs in their own selves as a fulfillment of the great Qur'anic prophecy in verse 41:53.

The Qur'an/Gregorian calendar relationship was designed by God to demonstrate to the unbelievers His perfect knowledge of future events, hence, His perfect knowledge of all things (which no mortal but a supernatural being could possess), as a means of proving the divine origin of the Qur'an.

## **TIME UNITS SYSTEM OF CODING (TUSC)**

God created the heavens and the earth, He put the sun and moon in place and subjected them to His law, each running its course for a term appointed. He rendered the sun radiant, and the moon as a light, and measured for it stages.

It is He who alternates the day and night to establish for us a timing system and the means of calculation. He set up this cycle that we may know the computation of time (no. of days, weeks, months, years, age) and to make our calendars.

Time, a concept beyond man's understanding is God's creation, for God is the creator of all things. And like every creation, God's signs are embedded in time. The Qur'an tells us in verse 3:190 that in the alternation of day and night, there are indeed signs for men of understanding.

The period of time during which the earth completes one rotation around its axis with respect to the sun is approximately 24 hours. This 24-hour cycle which involves the alternation of day and night is known as one day.

In year 2009 by God's leave, I discovered a unique and truly awesome system of mathematical coding with regards to time, this discovery is what I refer to as the Time Units System of Coding (TUSC).

In that year, I found that God's signs are encoded in the most common units used to measure time, i.e. days, hours, minutes, seconds and weeks and since then, this system of coding and calculation has been a source of powerful miracles and evidences in my researches.

The Time Units System of Coding involves calculating the no. of hours, minutes, seconds and weeks from the no. of days. Multiplying the no. of days by 24 gives the no. of hours, multiplying that by 60 gives the no. of minutes, and multiplying that by another 60 is the no. of seconds.

The no. of weeks is gotten by dividing the no. of days by 7. Note that the no. of weeks with decimal is usually rounded off. For example, 14.15 or 14.89 weeks is rounded off to 14 weeks.

Then proceed to group the digits in the no. of days, hours, minutes, seconds and weeks into sets of 3 digits using commas (,) as separators, this is called digit grouping in mathematics. For example, 2937600 seconds is 2,937,600 seconds.

The final step is to carry out the addition of the nos. resulting from the digit grouping. For example, the no. of seconds, 2,937,600 gives:  $2 + 937 + 600 = 1539$ . While adding, some nos. may be omitted for certain reason(s).

Presented here is one of the most phenomenal discovery I made as regards the Time Units System of Coding (TUSC).

Remember that on table 1.0, the word Allah (God) occurred twice, one at the First date, the other at the Last, one is Apparent and the other is Hidden.

S/N	Dates (Month & Day)	Dates' Positions	Day of The Year	NV of Allah
1	Three February (3/2)	The First	<b>34</b> (Allah)	The Apparent
6	Two November (2/11)	The Last	<b>306*</b> (Allah)	The Hidden

306\* is used on table above to indicate that  $306/9 = 34$  (Allah).

The day no. of the year for each date on table 1.0 is the no. of days from the beginning of the year till each of the dates. Now, from this no. of days we find the no. of hours, minutes, seconds and weeks till each of the dates, and then group the digits.

The mathematical miracles you are about to witness provides us with incontrovertible evidences of all we have known in this book with regards to the table 1.0 and the two dates on the table which pointed out the word God and four of His attributes mentioned in verse 57:3 of the Qur'an.

A quick reminder: The NV of Allah in Arabic is 66, Allah in English is 34 and God is 26.

Three February (3/2): Day no. 34

Attributes: The First, The Apparent

No. of days = **34**  
No. of hours = 816  
No. of minutes = 48,960  
No. of seconds = 2,937,600  
No. of weeks = 4

Adding the group of digits,

$$816 + 48 + 960 + 2 + 937 + 600 + 4 = 3367$$

Total: 3367

Omitted no.: **34**

Reason: The NV of Allah is **34**

Two November (2/11): Day no. 306

Attributes: The Last, The Hidden

No. of days = 306  
No. of hours = 7,344  
No. of minutes = 440,640  
No. of seconds = **26**,438,400  
No. of weeks = 43

Adding the group of digits,

$$306 + 7 + 344 + 440 + 640 + 438 + 400 + 43 = 2618$$

Total: 2618  
Omitted no.: 26  
Reason: The NV of God is 26

### The First And The Last

The table below shows the two dates on table 1.0 involved in the TUSC calculations, their positions, their day nos. of the year, the time units, the time unit nos. and the TUSC values listed from the occurrence of Allah in the First date to the occurrence of God in the Last date.

Dates' Positions	Dates	Day of The Year	Time Units	Time Unit Nos.	TUSC Values
The First	<u>3/2</u> Three February	<u>Day 34</u> <b>34 (Allah) X 1</b>	Days	<b>1</b>	<b>34 (Allah)</b>
			Hours	2	816
			Minutes	3	48
					960
			Seconds	4	2
					937
					600
The Last	<u>2/11</u> Two November	<u>Day 306</u> <b>34 (Allah) X 9</b>	Weeks	5	4
			Days	6	306
			Hours	7	7
					344
			Minutes	8	440
					640
			Seconds	<b>9</b>	<b>26 (God)</b>

Table 2.0

Out of the 6 dates on table 1.0, the word Allah (God) only occurred at the First and the Last date, and the coefficients from the day nos. of the year where Allah (God) occurred gave the nos. 1 & 9 which are the First and the Last single digit natural nos. (this is shown on table 2.0 above).

If you carry out the TUSC calculations on the 6 dates, you similarly find that Allah/God only occurred at the First and the Last date, and as seen on table 2.0 above, the time units where Allah/God occurred gave the nos. 1 & 9, the First and the Last single digit natural nos.

On table 1.0, the two attributes of God, “the First and the Last” were indicated by the positions of the two dates involved as well as the coefficients, 1 & 9. In the TUSC calculations, we find a similar thing.

That is, the two attributes are indicated by the positions of the two dates on table 1.0 involved in the TUSC calculations as well as the time unit nos., 1 & 9.

### The 6 Dates of The Calendar

3/2: Position *(The First)*, Omitted no. = 34 (Allah) - Time unit no. **1** *(The First)*

2/11: Position *(The Last)*, Omitted no. = 26 (God) - Time unit no. **9** *(The Last)*

*Allah - The First and The Last*

Or

*Allah - The Beginning and The End*

Table 2.0 above shows how the word Allah/God occurred at the time unit no. 1 & 9 in the TUSC calculations. The table establishes the truth that the occurrence of the word Allah (God) with the coefficients, 1 & 9 at the two dates never happened by chance.

It is correct to say that the occurrence of Allah/God at the time unit no. 1 & 9 had been hinted by the occurrence of Allah (God) with the coefficients, 1 & 9 at the day nos. of the year.

### The Apparent And The Hidden

Three February (3/2): The no. of days is 34, this no. is exactly the same as the NV of Allah (English). Thus, the word Allah is readily Apparent with or without any calculation.

In the TUSC calculations, the no. 34 (Allah) stands Apparent, and above all the other nos., i.e. no. of hours, minutes, seconds and weeks. The same way Allah's existence is Apparent in all of creation and He stands above all of creation (nothing is above Him).

Omitted no. @ Days: 34 (Allah)

The First date: Allah (God) is Apparent

Two November (2/11): The no. of days is 306, the word Allah is Hidden in this no. of days and requires some calculations to be seen. Multiplying the no. of days by 24 (hours), 60 (minutes) and 60 (seconds) results in the no. of seconds which gives the Hidden NV of God (Allah), 26.

In the TUSC calculations, the no. 26 (God) is Hidden (or enclosed) within the other nos., i.e. no. of days, hours, minutes and weeks. The same way God (Allah) is Hidden within all of creation and Hidden from all of creation.

Omitted no. @ Seconds: 26 (God)

The Last date: God (Allah) is Hidden

From the foregoing, we see that Allah/God is Apparent (Outward) at the First date and Hidden (Inward) at the Last. This phenomenon which is indicative of His attributes, "the Apparent and the Hidden" was earlier demonstrated by these same dates (day nos. of the year) on table 1.0.

Now combining these two attributes with the other two earlier derived from the two dates' positions and time unit nos., we get four attributes of Allah, "the First and the Last, the Apparent and the Hidden".

<u>The 6 Dates of The Calendar</u>	
3/2: Position/Time unit no.	(The First), Omitted no. @ Days = <b>34</b> (Allah) (The Apparent)
2/11: Position/Time unit no.	(The Last), Omitted no. @ Secs = <b>26</b> (God) (The Hidden)
Allah (God) - The First and The Last	
Allah (God) - The Apparent and The Hidden	

The meanings of the omitted nos. 34 & 26 in the TUSC calculations conveys some very important messages to us especially to the disbelievers in the Qur'an. The no. 34 which is the NV of Allah (English) is the same as the NV of One (English). The no. 26 is the NV of God (English).

Therefore, the omitted nos. informing us that Allah is God, also reminds us of the Qur'an's most dominant message – One God.

ONE	O	N	E	Total
	15	14	5	<b>34</b>
GOD	G	O	D	Total
	7	15	4	<b>26</b>

This is the Gregorian calendar corroborating the Qur'an. The verses of the Qur'an kept constantly emphasizing that Allah is God and that God is One, and we should not associate partners with Him.

### Omitted Nos. And Grand Total

In TUSC calculations, omitted nos. are not added to the other nos. because of what the nos. (omitted nos.) stands for or represents and they are directly connected. The total is the sum of the other nos. (excluding the omitted ones).

In these particular TUSC calculations, the omitted nos. 34 & 26 represents Allah and God respectively and both words are same/connected in meaning, hence their omission. Allah is the Arabic word for God (Allah is God).

The total of the other nos. are 3367 & 2618 respectively. Now, let us find the grand total.

$$\text{Grand Total: } 3367 + 2618 = 5985$$

The grand total, 5985 is a multiple of 19.

$$5985 = 19 \times 315$$

The grand total being a multiple of 19 is one confirmation for this system of coding/calculations, i.e. for the added nos., the omitted nos. and the reason(s) behind it.

The miraculous code 19 is a stamp of approval for the nos. added (grand total), for the nos. omitted and the reason(s) for their omission. This means that the right nos. had been added (grand total) and the right nos. had been omitted in the calculations.

Since 2009, I have made series of breathtaking discoveries from the TUSC and from my experience, the grand total always corroborates and complements the omitted nos. and vice versa.

Now, what does the grand total, 5985 have to say about the omitted nos. 34 & 26? In other words, what does the grand total have to say about Allah/God?

The grand total, 5985 is the product of the nos. 57, 3, 5 & 7. These nos. which represents the chapter no; verse no; no. of words and no. of letters respectively, all defines/describes the only verse of the Qur'an where the four attributes of Allah/God are mentioned.

$$\text{Grand total: } 5985 = 57 \times 3 \times 5 \times 7$$

The chapter no. is 57, the verse no. in this chapter with the four attributes is 3, the no. of Arabic words in this verse till the fourth attribute (the Hidden) is 5, and the no. of Arabic letters in the fourth attribute (the Hidden) is 7.

### The 6 Dates of The Calendar

*"He Is The First and The Last, The Apparent and The Hidden"*

– Qur'an 57:3

3/2: Position *(The First)*, Omitted no. 34 (Allah) *(The Apparent)*

2/11: Position *(The Last)*, Omitted no. 26 (God) *(The Hidden)*

$$\text{Grand total: } 5985 = 57 \times 3 \times 5 \times 7$$

Chapter no. of Qur'an with the four attributes = 57

Verse no. in the chapter with the four attributes = 3

No. of words till the fourth attribute, "the Hidden" = 5

No. of letters in the fourth attribute, "the Hidden" = 7

This is superbly incredible, to say the least. The grand total of the TUSC calculations involving the First and Last date on table 1.0 which exhibited the four attributes of God gives the exact and the only verse where these attributes are mentioned in the Qur'an.

In the previous section, we witnessed a similar thing, where these same dates on table 1.0 gave this same verse of the Qur'an in the traditional and chronological order, where God is referred to by these four attributes (i.e. tables 1.0a & 1.0b).

Here, the grand total did not only tell us the chapter and verse no; it took it a bit further by indicating the exact portion of the message of verse 57:3 which covers/concerns just the four attributes, i.e. the no. of Arabic words (5) in the verse till the fourth attribute. It also specified the no. of Arabic letters (27) that the fourth attribute is composed of.

This piece of significant information from the grand total, pinpointing where the four attributes are located in verse 57:3 of the Qur'an is further substantiated by the sum of digits of the grand total as shown below.

The grand total, 5985 comprises of 4 digits: 5, 9, 8 & 5.

The sum of these 4 digits is 27 and this sum coincides with the no. 5, the last digit. In verse 57:3, the no. of Arabic letters till the end of the 4 attributes is 27 and the no. of Arabic words is 5.

Therefore the no. of digits, 4 denotes the no. of attributes, the sum of digits, 27 is the no. of letters and the last digit no. on which the sum coincides, 5 is the no. of words.

The digits of the grand total attesting to the fact that the 4 are found within the first 27 Arabic letters and 5 words in the verse further makes it clearer or more definite that these attributes coming from the Gregorian calendar via the table 1.0 are most assuredly of the Qur'an.

	S/N of Digits	Digits	Cum. Sum of Digits
Grand Total: 5985	1	5	5
	2	9	14
	3	8	22
	4	5	27
	No. of Attributes	No. of Words	No. of Letters

The table above was set up for the sake of clarity. As we can see, the no. 27 & 5 meets at the 4<sup>th</sup> digit of the grand total, the same way the no. 27 (letters) & 5 (words) meets at the 4<sup>th</sup> attribute of verse 57:3.

It is abundantly clear that verse 57:3 is the message of the grand total concerning the omitted nos. (Allah/God). It is the message of the dates on table 1.0 and therefore, the message of the Gregorian calendar to the unbelievers and the world at large.

While the omitted nos. gave us the name Allah/God, the grand total corroborated and complemented it by giving the attributes regarding Him (verse 57:3) in the Qur'an. Praise be to the Lord of the worlds.

TUSC Calculations

Omitted Nos: *Allah/God*

Grand Total: *"He Is The First and The Last, The Apparent and The Hidden"*

Whatever is in the heavens and earth glorifies God, He is the All-Mighty, the All-Wise. His is the dominion of the heavens and earth, He gives life and causes death, and He is over all things competent.

He is the First (nothing is before Him) and the Last (nothing is after Him). He is the Apparent (whose existence is evident in creation) and the Hidden (who cannot be perceived by our physical senses).

## **THE DATE OF CONFIRMATIONS**

The entire structure of the Qur'an conforms to a mathematical pattern based on the no. 19, the miraculous code of the Qur'an. The significance of this no. which is the common denominator of the Qur'an's mathematical system can never be overemphasized.

Ever since its discovery in 1974, the code 19 has continued to play its prophesied role, which is providing verifiable and irrefutable proofs that the Qur'an is divine and it is God's message to the whole world, to remove all traces of doubt from our hearts and to strengthen our faith.

The no. 19 is a powerful evidence of the existence of God and it is God's signature upon everything He created. As we have learnt so far in this book, 19 plays a very important role in God's mathematical signs and miracles.

One of the biggest discoveries I made by God's leave in the year 2009 while researching the Qur'an is the "Date of Confirmations", Monday 14 June, 1976 CE. This date was derived from the miraculous code 19 and the verse 74:30, the only verse of the Qur'an where this code is mentioned.

The Date of Confirmations which as expected, plays the same roles/functions as the miraculous code, 19 has provided me with countless and incredible confirmations with respect to my researches and discoveries over the years.

			Cum. Sum	Product of Miraculous Code 19 & Cum. Sum
1	Chapter where the miraculous code 19 is mentioned	74	74	1406
2	Verse where the miraculous code 19 is mentioned	30	104	1976

The combination of the last column gives:

14061976 → 14/06/1976 CE

<p><u>Date of Confirmations</u></p> <p>Monday, 14 June 1976 CE</p>
--

The Date of Confirmations, apparently is a multiple of 19, as we already know it was derived from this no. It is noteworthy that this date has a hidden value which is also a multiple of 19, i.e. the NV of the day, month, year and era.

A date is normally not complete without the date's era being specified. In the calculation of its NV, the same thing applies, the era is included.

The Date of Confirmations is a date in the Common Era (CE), 14/06/1976 CE written in English words is: “Fourteen June, One Thousand Nine Hundred Seventy-Six, Common Era”.

The NV of day and month, “Fourteen June” is 154, the NV of the year, “One Thousand Nine Hundred Seventy-Six” is 414 and the NV of the era, “Common Era” is 97. The total NV of day, month, year and era is 665 or  $19 \times 35$ .

<u>Date of Confirmations: 14/06/1976 CE</u>
“Fourteen June, One Thousand Nine Hundred Seventy-Six, Common Era” = 665
$665 = 19 \times 35$

The sum of digits of the Date of Confirmations is 34, the NV of Allah (God) and the NV of One.

$$1 + 4 + 0 + 6 + 1 + 9 + 7 + 6 = 34 \text{ (One/Allah)}$$

This section deals with the Date of Confirmations, God, the grand total, the omitted nos., the TUSC calculations and the four attributes in verse 57:3. The section is basically about the findings from table 1.0 and God, the Almighty Creator.

## God

In the TUSC calculations, some nos. were omitted while the other nos. were added. The omitted nos. are nos. representing the word God and for this reason, they were not added to the other nos. The grand total of the other nos. gave the no. 5985.

The grand total, 5985 has therefore been made possible by the existence and omission of the nos. representing “God” in the calculations.

The word God is composed of 3 English letters, G, O, D, where the NV of G = 7, O = 15, D = 4. The total NV of God is 26.

<b>GOD</b>	<b>G</b>	<b>O</b>	<b>D</b>	<b>Total</b>
	7	15	4	26

When you enter the word God into the Gregorian calendar with the Date of Confirmations being the reference point, the result is a beautiful confirmation of the TUSC calculations where “God” occurred in the time units.

To do this, you enter the NV of each of the letters one after the other as no. of days into the calendar until the word God is completed, starting the count from the Date of Confirmations, Monday, 14 June 1976 (14/06/1976 CE).

The letter G = 7, by adding 7 days to the date, Monday 14/06/1976 CE, the resulting date is Monday 21/06/1976 CE.

The letter O = 15, adding 15 days to the date, Monday 21/06/1976 CE gives the date, Tuesday 06/07/1976 CE.

The letter D = 4, adding 4 days to the date, Tuesday 06/07/1976 CE gives the date, Saturday 10/07/1976 CE.

Another option is to add up the NV of the letters one after the other and then add the cumulative sum at each letter as no. of days to the date, 14/06/1976 CE. You still get the same dates above.

The results are tabulated on the table below.

	Letters	NV	Day	Month	Year
<b>GOD</b>	G	7	21	06	1976
	O	15	06	07	1976
	D	4	10	07	1976
	<b>Total</b>		<b>37</b>	<b>20</b>	<b>5928</b>

Table 3.0. God On The Gregorian Calendar

As seen on the table above, the total of the day nos. is 37, the total of the month nos. is 20 and the total of the year nos. is 5928. The grand total of the day, month and year nos. is 5985.

$$\text{GOD} = 37 + 20 + 5928 = 5985$$

$$5985 = 19 \times 315$$

When you enter “God” into the Gregorian calendar, the grand total of the resulting dates, 5985 is exactly the same as the grand total of the TUSC calculations involving the First and Last dates on table 1.0 where “God” occurred in the time units (i.e. no. of days and seconds).

<p><u>Date of Confirmations &amp; God</u></p> <p>G + O + D = 5985</p> <p><u>TUSC</u>: Grand Total = 5985 (GOD)</p>
--

This intriguing discovery from the table above shows that the grand total of the TUSC calculations simply stands for the word God and is all about God. This fact is strongly supported by the message of the verse 57:3 of the Qur’an derived from the grand total as seen earlier.

The grand total, 5985 is the product of 57, 3, 5 & 7. This gives us the exact chapter and verse no. (57:3) that talks about God and four of His attributes as denoted by the First and Last dates on table 1.0.

It also gives the portion of the message of this verse covering the four attributes, i.e. the no. of Arabic words (5) in the verse till the fourth Attribute. It also specifies the no. of Arabic letters (7) that the fourth Attribute is composed of.

$$5985 = 57 \text{ (chapter)} \times 3 \text{ (verse)} \times 5 \text{ (words)} \times 7 \text{ (letters)}$$

On table 3.0, the total of the day and month nos. i.e.  $37 + 20$  is 57 or  $19 \times 3$  (or  $57/19 = 3$ ). While the total, 57 is the chapter no; the coefficient, 3 is the verse no. i.e. chapter 57 verse 3.

$$57 \text{ (chapter)} = 19 \times 3 \text{ (verse)}$$

The emergence of the no. 5985 from the word God (table 3.0) is yet another evidence of the relationship that the two dates and the grand total (5985) they produced have with God. Remember that the criteria for the selection of the two dates amongst the dates on table 1.0 was the word God.

The two dates stood out amongst the others by the NV of God found in their day nos. of the year, the two dates subsequently demonstrated four of God's attributes in the Qur'an.

In the TUSC calculations, the NV of God occurred in the time units of the two dates, at the no. of days and seconds respectively, thereby re-establishing the four attributes as earlier demonstrated by the day nos. of the year.

It is worth mentioning that if you do the TUSC calculations for the other dates on the table, there is none where you find "God", be it in English or Arabic.

The TUSC calculations and the grand total, 5985 has been made possible by the occurrence of "God" in the time units of these two dates and by the subsequent omission of this word in the calculations.

On table 3.0, we see that the word God ends on the date, 10/07/1976 CE. Hence, the no. of days between 14/06/1976 CE and 10/07/1976 CE is 26 (God). Like the reference (starting) point, the date on which "God" coincides (ends) is marked by the miraculous code, 19.

$$14061976 = 19 \times 740104, 10071976 = 19 \times 530104$$

### Day And Month Nos.

If we look more into the day and month nos. on table 3.0, we find that this nos. and their total, 57 did not happen by chance. They are nos. destined to show us great signs concerning the true God as well as the divinity of the Qur'an.

The total of the day and month nos. i.e. 57 stands for the chapter 57 (or chapter 57 verse 3) of the Qur'an. If you enter the day and month nos. into the Qur'an, the results you get is an awesome proof to this fact.

Just like we entered the word God into the calendar (table 3.0), we are going to enter the day and month nos. (the results) from this word into the Qur'an (table 3.1).

To do this, we add up the nos. one after the other with the cumulative sum representing chapter nos. up till the chapter 57. The next thing is to find the frequency of God in these chapters since this whole thing boils down to the word – God.

The table 3.1 below shows the day and month nos; the cumulative sum of the nos. representing chapter nos. of the Qur'an and the frequency of God in the chapters.

	Letters	Day & Month Nos.	Chapter Nos. of Qur'an	Frequency of GOD
<b>GOD</b>	G	21	21	6
		06	27	27
	O	06	33	90
		07	40	53
	D	10	50	1
		07	57	32
	<b>Total</b>	<b>57</b>	<b>228</b>	<b>209</b>

Table 3.1. God In The Qur'an

As seen on table 3.1 above, the total of the day and month nos. is 57, the total of the chapter nos. of the Qur'an is 228 and the total of the frequency of God in the chapters is 209.

Total of day and month nos. = 57 or 19 X 3

Total of chapter nos. of Qur'an = 228 or 19 X 12

Total of frequency of God = 209 or 19 X 11

The total of the day and month nos. is a multiple of 19. The total of the chapter nos. and frequency of God derived from the day and month nos. are also both multiples of 19.

The miraculous code, 19 on table 3.1 firstly serves as a proof of the connection between the results on table 3.0 and the Qur'an. It also proves the connection between the God on table 3.0 and the God who authored the Qur'an.

This indicates that the God we saw on the Gregorian calendar (table 3.0) is the same in the Qur'an, the One and Only worthy of worship.

The results from table 3.1 proves beyond a shadow of a doubt that the total, 57 (day and month) and the total, 5985 (day, month and year) on table 3.0 points to the chapter 57 (or chapter 57 verse 3) of the Qur'an.

Now, here is the icing on the cake. When you add up the total of the day and month nos; the resulting chapter nos. and the frequency of God, you get the no. 494, the coefficient is 26, the NV of God. The no. 26 is one of the two omitted nos. in the TUSC calculations.

$$57 + 228 + 209 = 494 \text{ or } 19 \times 26 \text{ (God)}$$

This is so incredible! The word God gave us the day and month nos. of the calendar, the day and month nos. gave the chapter nos. of the Qur'an; the chapter nos. produced the frequency of God and the total of these three takes us back to the origin – God.

*God → Day/Month Nos. → Chapter Nos. → Freq. of God → God*

Here is another indubitable sign I got from table 3.1 above with regards to the chapter 57. The word God in this chapter points us to the chapter's title, "The Iron" via the nos. 19 & 26 gotten from the three totals on the table.

"The Iron" is mentioned in only one verse in chapter 57 (i.e. verse 25). If you count the no. of verses where God occurs and the no. of times God occurs from the beginning of chapter 57 till the verse where "The Iron" is mentioned in the chapter, the results are the nos. 19 & 26 respectively.

This means that, the verse where "The Iron" is mentioned is the 19<sup>th</sup> verse with the occurrence of God in this chapter, this same verse has the 26<sup>th</sup> occurrence of God in this chapter. It is worthy of note that this 26<sup>th</sup> occurrence of God also happens to be the 26<sup>th</sup> word of this verse.

#### Chapter 57 (The Iron)

$$57 + 228 + 209 = 494 \text{ or } 19 \times 26 \text{ (God)}$$

No. of verses with occurrence of *God* till the verse containing the chapter title = 19

No. of times the word *God* occurs till the verse containing the chapter title = 26

In other words,

"The Iron" is mentioned in the 19<sup>th</sup> verse with the occurrence of *God* in the chapter

"The Iron" is mentioned in the verse with the 26<sup>th</sup> occurrence of *God* in the chapter

As seen above, the two nos. 19 & 26 connects with the word God on the verse where the chapter title is mentioned in chapter 57. This is undoubtedly reaffirming that the total of the day and month nos. i.e. 57 means the chapter 57 (The Iron) of the Qur'an.

This discovery reaffirms and makes definite the relationship between the dates on table 3.0, the chapter 57 (where lies the verse 57:3) and God. Remember that these dates themselves originated from the word; God entered into the calendar.

The total of the day and month nos. gave the no. 57. This led us to some chapters of the Qur'an up till the chapter 57 on table 3.1. It will interest you to know that the NV of the chapter title in Arabic, "Al-Hadeed" is 57, which is same as the chapter no.

The sum of the totals on table 3.1 gave 494 or  $19 \times 26$ , the coefficient 26 similarly points out the chapter title, "Hadeed" (Iron) and its atomic no. How?

The coefficient, 26 (NV of God) is the NV of the Arabic word, "Hadeed" (Iron) without "Al" (The), 26 is also the atomic no. of Iron (Hadeed) or its position in the periodic table of elements (i.e. the no. of protons in the iron nucleus is 26).

Al-Hadeed (The Iron)						Total
Alif	Lam	Ha	Da	Ya	Da	
1	30	8	4	10	4	57

Hadeed (Iron)				Total
Ha	Da	Ya	Da	
8	4	10	4	26

The totals on table 3.1 are  $19 \times 3$ ,  $19 \times 12$  &  $19 \times 11$ . The sum of the code:  $19 + 19 + 19 = 57$ , and the sum of the coefficients:  $3 + 12 + 11 = 26$ .

Summary of what we know from table 3.1:

- 1) Table 3.1 proves that the God on the calendar (table 3.0) is no other one but the God in the Qur'an (the Author) and there is no other God but Him.
- 2) The table confirms the connection between the results on table 3.0 and the Qur'an.
- 3) It establishes the fact that the totals from table 3.0 points to the chapter 57 and the verse 57:3 of the Qur'an where lies the four attributes of God found on table 1.0.
- 4) The results on table 3.1 certifies the dates on table 3.0. The results is an approval for the Date of Confirmations which is the reference point that led to the dates on table 3.0.
- 5) Table 3.1 corroborates the origin of the dates on table 3.0 which is the word God.

## **Grand Total**

When we entered "God" into the Gregorian calendar with the Date of Confirmations as the reference point, we got the grand total of the TUSC calculations, 5985 (table 3.0). Now, let us do the same to the grand total and see the outcome.

With the grand total representing no. of days, we calculate a future date counting from the Date of Confirmations.

By adding 5985 days to the date, Monday, 14 June 1976 (14/06/1976 CE), the resulting date is Monday, 2 November 1992 (02/11/1992 CE).

Monday, 14/06/1976 CE + 5985 days = Monday, 02/11/1992 CE

<p><u>Date of Confirmations &amp; Grand Total</u></p> <p>Monday, 2 November, 1992 CE</p>
--

The First and the Last of the six dates on table 1.0 is 3 February (3/2) and 2 November (2/11) respectively, these two dates which manifested the attributes of God in the Qur'an produced the grand total, 5985 in the TUSC calculations.

Adding the grand total to the Date of Confirmations, interestingly, the resulting date (day and month) is 2 November (2/11), which is the Last of the two dates that produced the grand total and the Last of the six dates on table 1.0 whose NV is 152 which stands for Gregorian calendar.

This is illustrated on the table below for a better understanding.

The day/month was the first signal I got from the date, 2 November, 1992 CE, this urged me to probe the date further and I made an astounding discovery. Please, find this out in the section below titled "The Omitted Nos."

S/N	Date's Position	Dates (Day & Month)	Total (TUSC)	Grand Total (TUSC)	Date of Confirmations & Grand Total (TUSC)
1	The First	3 February	3367	5985	2 November, 1992 CE
6	The Last	2 November	2618		

By the way, the reference point, 14/06/1976 CE is equivalent to 16 Jumada Al-Akhir, 1396 AH on the Hijri calendar, while 02/11/1992 CE is equivalent to 7 Jumada Al-Awwal, 1413 AH.

The Arabic words, Al-Awwal and Al-Akhir are the Attributes of God which means "the First" and "the Last" respectively. Jumada is the Arabic word for summer, so Jumada Al-Awwal and Jumada Al-Akhir means "the First and the Last month of summer".

The two dates, 3/2 & 2/11 which gave the grand total, 5985 falls on the First and the Last positions on table 1.0 (as seen on the table above).

The First and The Last position: 5985 (grand total)

The two dates, 14/06/1976 CE & 02/11/1992 CE which gave the no. of days, 5985 (grand total) falls on the months named the First and the Last summer on the Muslim calendar.

The First and The Last summer: 5985 (no. of days)

The Date of Confirmations, 14/06/1976 CE and 02/11/1992 CE thus reflects the grand total and the attributes of God as evinced by the positions of the two dates on table 1.0 that produced it in the TUSC calculations.

14/06/1976 CE: Jumada Al-Akhir (The Last)  
02/11/1992 CE: Jumada Al-Awwal (The First)  
No. of days: 5985 (Grand Total)

### **Omitted Nos.**

Here you witness a spectacular discovery from the date, 2 November, 1992 CE, how this date which emanated from the grand total produced the two omitted nos. in the TUSC calculations.

A complete date like 2/11/1992 CE, comprises of day no; month, year and era. This date written out in English words is: “Two November, One Thousand Nine Hundred Ninety-Two, Common Era”.

The NV of the day and month, “Two November” is 152, the NV of the year, “One Thousand Nine Hundred Ninety-Two” is 397 and the NV of the era, “Common Era” is 97.

The total of the NV of day, month, year and era is 646 which is a multiple of 19. The coefficient is 34, the NV of Allah. It is also the NV of One.

$$152 + 397 + 97 = 646$$

Day/Month/Year/Era: 2/11/1992 CE  
“Two November, One Thousand Nine Hundred Ninety-Two, Common Era” = 646  
646 = 19 X 34 (Allah)

The total of the NV of year and era is 494, which is also a multiple of 19. The coefficient is 26, the NV of God.

$$397 + 97 = 494$$

Year/Era: 1992 CE

“One Thousand Nine Hundred Ninety-Two, Common Era” = 494

$$494 = 19 \times 26 \text{ (God)}$$

We already know the functions of the miraculous code, 19 in the Qur'an. We know that this no. also stands for an important attribute of God i.e. it is the NV of One.

The relationship between the no. 19 (One) & 34 (Allah) and the no. 19 (One) & 26 (God) as seen above conveys to us the Qur'an's dominant message: Allah is God and God is One.

The NV of the complete date, day/month/year/era (2/11/1992 CE) i.e. 646 gave the coefficient 34, this is the omitted no. at the First date in the TUSC calculations.

The NV of the year/era (1992 CE) i.e. 494 gave the coefficient 26, the omitted no. at the Last date in the TUSC calculations.

Date of Confirmations & Grand Total:

2/11/1992 CE

$$2/11/1992 \text{ CE: } 646/19 = 34 \text{ (Allah)}$$

TUSC: Omitted no. @ First date = 34 (Allah)

$$1992 \text{ CE: } 494/19 = 26 \text{ (God)}$$

TUSC: Omitted no. @ Last date = 26 (God)

In the TUSC calculations involving the First and Last dates on table 1.0, some nos. were added (grand total) while some were omitted (omitted nos.).

If you had any doubts concerning the omitted nos. and the reason behind their omission (i.e. NV of God), those doubts should have been cleared by now.

The Date of Confirmations has provided us with more proofs that the right nos. had been added (grand total) and the right nos. had been omitted (omitted nos.) in the TUSC calculations.

If we had omitted or added the wrong nos., the TUSC calculation results would have been different and consequently, these proofs and whole signs coming from the Date of Confirmations would not have existed.

As we have just seen, the grand total, 5985 which stands for God (as proven by table 3.0) resulted in the omitted nos. 34 & 26, which similarly represents the word God.

God = 5985 (Grand total)

God = 34/26 (Omitted nos.)

Summary of what we know from the Date of Confirmations:

- 1) When we entered “God” into the Gregorian calendar with the Date of Confirmations as the reference point (table 3.0), we got the grand total of the TUSC calculations.
- 2) When we entered the grand total, into the calendar, similarly with the Date of Confirmations as the reference point, we got the two omitted nos. in the TUSC calculations.
- 3) The two omitted nos. gave us the word God, thereby leading us back to where we started.

In a nut shell, the word God gave the grand total, the grand total resulted in the omitted nos. and the omitted nos. gave us back the word God.

*God → Grand Total → Omitted Nos. → God*

These numerical miracles proving that the signs from the dates on table 1.0 all points to the Supernatural Being – God, stem from the Date of Confirmations, the date creating wonders.

As stated earlier, the criteria for the selection of the First and Last dates amongst the 6 on table 1.0 was the word God which was found in their day nos. of the year.

This occurrence of God thus, led to the TUSC calculations involving only the two dates. This produced the grand total along with the two omitted nos. which gave back the word God (NV). “God” occurred in the TUSC calculations of only the two dates amongst the 6.

From God to the grand total to the omitted nos. and back to God. Everything that exists begins with God and ends with God. He is the First and the Last, the Beginning and the End. From Him we all came and to Him we shall all return.

### **The Verse 57:3**

In the TUSC calculations, the two omitted nos. signified the word God and four of His attributes, while the grand total gave the only verse of the Qur’an with regards to God and these attributes, i.e. verse 57:3.

Now, applying the TUSC calculations to the grand total, 5985 days, what you get is a confirmation of what the grand total stands for. That is to say, the result gives you the same verse 57:3 of the Qur'an and in similar manner as the grand total.

We know that the no. of days between 14/06/1976 CE and 02/11/1992 CE is 5985 (grand total), this is equivalent to 16 years, 4 months and 19 days. Now, from the no. of days 5985, let's find the no. of hours, minutes, seconds and weeks.

Between 14/06/1976 CE and 02/11/1992 CE:

No. of days = 5,985  
No. of hours = 143,640  
No. of minutes = 8,618,400  
No. of seconds = 517,104,000  
No. of weeks = 855

Adding the group of digits,

$$5 + 985 + 143 + 640 + 8 + 618 + 400 + 517 + 104 + 000 + 855 = 4,275$$

Total: 4,275

Omitted no.: None

Reason: No NV of God/Allah

The total, 4,275 is a multiple of 19.

$$4,275 = 19 \times 225$$

In the TUSC calculations, some nos. may be omitted for certain reason(s). In the case above, there was no number representing the NV of God/Allah, hence no omitted no.

The total, 4275 is the outcome of applying the TUSC calculations to the grand total, 5985. Apart from the fact that both nos. are multiples of 19, as I have earlier stated, both nos. denote the same and the only verse of the Qur'an where the four attributes of God in view are mentioned.

The total, 4275 is the product of the nos. 57, 3 & 25. These nos. represent the no. of the chapter, the no. of the verse, and the no. of words respectively.

$$\text{Total: } 4,275 = 57 \times 3 \times 25$$

The chapter no. is 57, the verse no. in this chapter with the four attributes is 3 and the no. of Arabic words in this chapter till the fourth attribute (the Hidden) is 25.

### TUSC Calculations & Grand Total

*“He Is The First and The Last, The Apparent and The Hidden”*

– Qur’an 57:3

Total: 4,275 = 57 X 3 X 25

Chapter no. of Qur’an with the four attributes = 57

Verse no. in the chapter with the four attributes = 3

No. of words in the chapter till the fourth attribute = 25

Some of us may not be convinced yet that the total, 4,275 stands for the verse 57:3 and the four attributes of God mentioned therein. The Merciful God intends to bring to us certainty and not a single doubt in this matter.

Here, I present another beautiful evidence that should clear all our doubts and this is coming from the same total, 4,275. This is so apparent, it doesn’t require any calculation, just mere observation.

Now, take a good look at the total, 4,275 what do you see?

You see that it is a combination of the nos. 4, 27 & 5. Does this ring a bell? Definitely it does, these are nos. we earlier encountered in connection with the grand total, 5985.

The nos. 4, 27 & 5 which serves as yet another proof of the verse 57:3 offers some significant information about this verse and the attributes of God mentioned therein.

Total: 4,275 → 4, 27 & 5

Where 4 is the no. of attributes, 27 is the no. of letters and 5 is the no. of words involved. The no. of attributes, 4 is separated by a comma, followed by the no. of letters/words, 275.

The total, 4,275 therefore signifies 4 attributes found within 27 Arabic letters and 5 words in verse 57:3 of the Qur’an.

### TUSC Calculations & Grand Total

Total: 4,275 → 4, 27 & 5

No. of attributes in verse 57:3 of the Qur’an = 4

No. of letters till the end of the 4 attributes = 27

No. of words till the end of the 4 attributes = 5

We know that applying the TUSC calculations to the grand total, 5985 resulted in the total, 4275, we also know they are both connected by the code 19 and both points to the same verse 57:3.

Earlier on, we saw how the grand total, 5985 reflected those nos. 4, 27 & 5 which when combined gives the total, 4275 that originated from it (5985) in the TUSC calculations.

The grand total, 5985 comprises of 4 digits: 5, 9, 8 & 5.

The sum of these 4 digits is 27 and this sum coincides with the no. 5, the last digit.

We know that the no. of digits, 4 denotes the no. of attributes, the sum of digits, 27 is the no. of letters and the last digit no. on which the sum coincides, 5 is the no. of words. This is illustrated on the table below.

	S/N of Digits	Cum. Sum of Digits	Digits
Grand Total: 5985	1	5	5
	2	14	9
	3	22	8
	4	27	5
	No. of Attributes	No. of Letters	No. of Words

The table illustrates how the no. 27 & 5 meets at the 4<sup>th</sup> digit of the grand total, the same way the no. 27 (letters) & 5 (words) meets at the 4<sup>th</sup> attribute of verse 57:3.

The total 4,275 (4, 27 & 5) offers a perfect description of the grand total, 5985 and the exact portion of the message of verse 57:3 which concerns the four attributes.

Verse 57:3: No. of attributes is 4, no. of letters is 27, no. of words is 5  
Grand Total, 5985: No. of digits is 4, sum of digits, 27 last digit no. is 5  
Total, 4275: Comprises of the no. 4, followed by no. 27 and the no. 5

Verse 57:3 of the Qur'an emerged from the Six days on table 1.0. It is quite significant that the words "Six days" is mentioned in verse 57:4 which immediately comes after verse 57:3 and this is the last time it is mentioned in the Qur'an.

**57:3** "He is the First and the Last, the Apparent and the Hidden..."

**57:4** "He is the One who created the heavens and the earth in Six Days..."

“Six days” is mentioned in a total of 7 verses of the Qur’an, they are: verse 7:54, 10:3, 11:7, 25:59, 32:4, 50:38 & 57:4. The messages of all the 7 verses proclaims God as the One who created the heavens and the earth in “Six days”.

The total of the chapter and verse nos. of the 7 verses is 361, a double multiple of 19.

This is a double confirmation of the no. 19 as God’s signature upon the heavens and the earth and everything between them which He created in Six days, and then established Himself upon the throne, directing the affairs of all things.

$$(7 + 54) + (10 + 3) + (11 + 7) + (25 + 59) + (32 + 4) + (50 + 38) + (57 + 4) = 361$$

$$361 = 19 \times 19$$

God is mentioned 6 times in 4 verses out of the 7, they are: verse 7:54, 10:3, 32:4 & 57:4. The total of the chapter and verse nos. of these 4 verses is 171 or  $19 \times 9$ . Thus, the total of the chapter and verse nos. of the remaining 3 verses where God is not mentioned is 190 or  $19 \times 10$ .

It is interesting that the universe and all it contains was created in 6 days, and 6 days of the Gregorian calendar (table 1.0) unveils/confirms the name and attributes of this Almighty Creator.

God with His infinite powers could have created the whole universe in no time at all, He chose 6 days, not because He needed that much time to create but that this no. of days may serve to us awesome signs.

### **The Four Attributes**

In the TUSC calculations, the grand total, 5985 is the sum of all the values gotten from the no. of days, hours, minutes, seconds and weeks for the First and the Last dates on table 1.0.

Three February (3/2): Day no. 34

Attributes: The First, The Apparent

$$\begin{aligned} \text{No. of days} &= \mathbf{34} \\ \text{No. of hours} &= 816 \\ \text{No. of minutes} &= 48,960 \\ \text{No. of seconds} &= 2,937,600 \\ \text{No. of weeks} &= 4 \end{aligned}$$

Adding the group of digits,

$$816 + 48 + 960 + 2 + 937 + 600 + 4 = 3367$$

Total: 3367

Omitted no.: 34

Reason: The NV of Allah is 34

Two November (2/11): Day no. 306

Attributes: The Last, The Hidden

No. of days = 306  
No. of hours = 7,344  
No. of minutes = 440,640  
No. of seconds = 26,438,400  
No. of weeks = 43

Adding the group of digits,

$$306 + 7 + 344 + 440 + 640 + 438 + 400 + 43 = 2618$$

Total: 2618

Omitted no.: 26

Reason: The NV of God is 26

The grand total for the two dates is:

$$\text{Grand Total: } 3367 + 2618 = 5985$$

$$5985 = 19 \times 315$$

With the grand total representing no. of days, we calculated a future date counting from the Date of Confirmations. Adding 5985 days to the date, Monday, 14 June 1976 (14/06/1976 CE) resulted in the date, Monday, 2 November 1992 (02/11/1992 CE).

Starting from the Date of Confirmations, 14/06/1976 CE, we are going to add up the values one after the other and get the corresponding date at each value until the last date, 02/11/1992 CE on which the grand total of the values, 5985 coincides.

For example, the first value is 816, adding 816 days to 14/06/1976 CE gives the date, 08/09/1978 CE. The next value is 48, add 48 days to 08/09/1978 CE and get the corresponding date. We do this till we get to the last value, 43 (i.e. 43 days) which corresponds with the date, 02/11/1992 CE.

The results are shown on table 4.0 below. Remember that in the TUSC calculations, the two nos. 26 & 34 were omitted from the grand total for the reason that they represent the NV of God and Allah respectively. These two values were omitted from table 4.0 since they were never part of the grand total.

S/N of Dates on Table 1.0	Dates & Day of The Year	Time Unit Nos.	Time Units	Values	C.S. of Values	Day Nos.	Month Nos.	Years
1	<u>3/2</u>  <u>Day 34</u> <b>34 (Allah) X 1</b>	1	Hours	816	816	8	9	1978 CE
		2	Minutes	48	864	26	10	1978 CE
				960	1824	12	6	1981 CE
		3	Seconds	2	1826	14	6	1981 CE
				937	2763	7	1	1984 CE
				600	3363	29	8	1985 CE
4	Weeks	4	3367	2	9	1985 CE		
6	<u>2/11</u>  <u>Day 306</u> <b>34 (Allah) X 9</b>	5	Days	306	3673	5	7	1986 CE
		6	Hours	7	3680	12	7	1986 CE
				344	4024	21	6	1987 CE
		7	Minutes	440	4464	3	9	1988 CE
				640	5104	5	6	1990 CE
		8	Seconds	438	5542	17	8	1991 CE
				400	5942	20	9	1992 CE
		9	Weeks	43	5985	2	11	1992 CE
		Grand Total		5985				

Table 4.0

On table 1.0 we saw the 6 dates whose NV (day + month) gives the no. 152 – the NV of Gregorian calendar. Calculating the NV (day + month) of each of the dates on table 4.0 above, you find that out of the total of 15 dates, 2 dates give the no. 152.

This means that two out of the dates on table 1.0 are found on table 4.0. The astonishing sign here is where these dates occur on table 4.0. It is interesting to know that the two dates are the First and the Last date on table 4.0.

The First date (day and month) on table 4.0 is Eight September (8/9), the NV of day and month is 49 & 103 respectively, their total is 152 (19 X 8).

$$\text{Total NV: } 49 + 103 = 152 \text{ (Gregorian calendar)}$$

The Last date (day and month) on the table is Two November (2/11), the NV of day and month is 58 & 94 respectively, their total also gives 152 (19 X 8).

$$\text{Total NV: } 58 + 94 = 152 \text{ (Gregorian calendar)}$$

You will notice that the dates on table 4.0 are grouped into time unit nos. from 1 to 9, according to the time units on which they fall.

On table 4.0, the positions of the two dates, 8/9 & 2/11 which gave the NV of Gregorian calendar and the time unit nos. at which the two dates occur, 1 & 9 symbolizes the two attributes, “the First” and “the Last”.

As we know, these two attributes of God were indicated on table 1.0, similarly by the positions of the two dates on table 1.0 involved and the coefficients, 1 & 9 from their day nos. of the year.

The two attributes of God were also indicated by the positions of the two dates involved in the TUSC calculations and the time unit nos. 1 & 9 (table 2.0).

<u>Table 4.0 &amp; The Attributes</u>	
8/9: Position	<i>(The First)</i> , Time unit no. <b>1</b> <i>(The First)</i>
2/11: Position	<i>(The Last)</i> , Time unit no. <b>9</b> <i>(The Last)</i>
<i>God - The First and The Last</i>	
<i>God - The Beginning and The End</i>	

The complete form of the First and Last date on table 4.0 both gives values that are multiples of 19, while it is Apparent at the First date, it is Hidden at the Last. This sign is indicative of the two attributes of God, “the Apparent” and “the Hidden”.

The First date is 08/09/1978 CE, the sum of the date nos. is 1995, a combination of 19 & 95 (19X5). The no. 1995 is 19 X 105, this date therefore has an Apparent value that is a multiple of 19.

$$08 + 09 + 1978 = 1995 \text{ or } 19 \times 105$$

The Last date is 02/11/1992 CE, the sum of the date nos. is NOT a multiple of 19 but the sum of the NV of the date is 646 or 19 X 34. Hence, the date has a Hidden value which is a multiple of 19.

This value was gotten by calculating the NV of the date and the NV of a date is not something Apparent, it is Hidden as you would have to first convert the date into words, then convert the words into nos. and then add up.

The NV of the day and month, “Two November” is 152, the NV of the year, “One Thousand Nine Hundred Ninety-Two” is 397 and the NV of the era, “Common Era” is 97. The total NV of the date is 646.

$$152 + 397 + 97 = 646 \text{ or } 19 \times 34$$

Combining the two attributes with the other two earlier derived from the dates’ positions and time unit nos. we get the four attributes of God in verse 57:3, “the First and the Last, the Apparent and the Hidden”.

Table 4.0 & The Attributes

08/09/1978 CE: Position/Time unit no. *(The First)*, Sum = 19 X 105 *(The Apparent)*

02/11/1992 CE: Position/Time unit no. *(The Last)*, NV = 19 X 34 *(The Hidden)*

God - *The First and The Last*

God - *The Apparent and The Hidden*

The dates, 3/2 & 2/11 gave the grand total, 5985 in the TUSC calculations. With the Date of Confirmations, 14/06/1976 as the reference point, 5985 days is equivalent to 16 years, 4 months & 19 days.

The nos. 16, 4 & 19 denotes the two dates' positions (1 & 6) on table 1.0, the no. of God's attributes (4) the dates represent, and the coefficients or time unit nos. (1 & 9) derived from the dates' day nos. of the year or the TUSC calculations (table 3.0 & 4.0).

Table 4.0 showing all the TUSC values that gave the grand total, 5985 perfectly illustrates what the nos. 16, 4 & 19 denotes. As we can see on this table,

The grand total, 5985 originated from the dates, 3/2 & 2/11 date nos. (1 & 6), the grand total and the two dates signifies (4) attributes of God, this grand total is grouped into time units numbered from (1 to 9).

Date of Confirmations & Grand Total

5985 days (Grand total) = 16 years, 4 months & 19 days

The grand total emerged from the date nos. 1 & 6 (table 1.0)

The grand total and the two dates signify 4 attributes of God

The grand total splits into time units numbered from 1 to 9 (table 4.0)

The TUSC values from the two dates, date no. (1 & 6) resulted in some dates, grouped according to their time units. The only dates substantiating the (4) attributes exhibited by the two dates occurred at the time unit no. (1 & 9). This is an alternative explanation.

Please note that 5985 days equivalent to 16 years, 4 months and 19 days is what you get using the Date of Confirmations as the reference point. The last no. 19 days may change by few days if you use a different date as the reference point. It may become 18, 20, 21 days etc.

Summary of what we know from table 4.0:

With the Date of Confirmations as the reference point, values from the TUSC calculations involving the First and Last date on table 1.0 were entered into the Gregorian calendar. This resulted in some dates as shown on table 4.0 and as expected, this table gave us confirmations regarding the signs on table 1.0.

- ✓ The First and Last dates on table 4.0 confirms the four attributes of God exhibited by the First and Last dates on the parent table – table 1.0.
- ✓ The First and Last dates on table 4.0 gives the same NV of Gregorian calendar (152) just like the First and Last dates on table 1.0 (or the 6 dates on the table).
- ✓ The two dates are the only dates on table 4.0 that are found on table 1.0.

In the TUSC calculations, some nos. were omitted while some were added together which gave the grand total, 5985. The nos. 34 & 26 were omitted for the reason that they represent the NV of Allah and God respectively. These two values or nos. were therefore omitted from table 4.0.

If the two nos. 34 & 26 were not omitted from table 4.0, the whole dates on the table changes and the four attributes of God as signaled by the First and Last dates on this table disappears.

The results and signs derived from table 4.0 puts the stamp of approval on the nos. added (grand total), on the nos. omitted and the reason(s) for their omission. This table confirms that the right nos. had been added and the right nos. had been omitted in the TUSC calculations.

The Date of Confirmations was produced by the no. 19 along with the chapter and verse no. where this no. is mentioned, i.e. verse 74:30. We already know what the no. 19 is all about, the roles/functions of this date is not any different.

The TUSC calculations (the nos. added and the omitted nos.), the four attributes of God from table 1.0 or the TUSC calculations, and the verse of the Qur'an where these attributes are mentioned had all been confirmed by calculations involving the Date of Confirmations.

Ever since its discovery in 2009, the Date of Confirmations has lived up to its name – providing incontrovertible confirmations as regards the signs/words of God, to remove all traces of doubt from our hearts, to strengthen our faith and bring us to certainty.

This date which is connected with the miraculous code 19 of the Qur'an indeed fulfils the prophesied roles of this no. as stated in verse 74:31 of the Qur'an.

## **THE QUR'AN/GREGORIAN TABLES**

Some years back, I entered the entire Qur'an into the Gregorian calendar and by the leave of the Almighty God, I made some mind-blowing discoveries as regards the numerical miracles of the Qur'an.

This research gave rise to tables that I refer to as the "Qur'an/Gregorian table I, II, and III" among others. The findings, guaranteed to fill you with so much amazement, are included in my previous book titled, "*The Gregorian Calendar and The Grand Miracles*"

Here, I am going to recall one of these tables, the Qur'an/Gregorian table II. This table deals with the 114 chapters of the Qur'an, their no. of verses and of course, the Gregorian calendar.

The Qur'an/Gregorian table II below shows the 114 chapters of the Qur'an, their no. of verses which represents day nos. of the year on the calendar and the corresponding day and month nos. Note that the cumulative sum of day and month nos. gives the year nos. on the table.

As an example, chapter 19 has 98 verses, the day no. 98 of the calendar is 8 April (8/4). The cumulative sum of day and month nos. up till the chapter 19 is 385, this gives the year 385 CE.

Do note that the table below is an abbreviated representation of this data.

Chapter Nos.	No. of Verses / Day of Year	Day	Month	Year
1	7	7	1	8
2	286	13	10	31
3	200	19	7	57
—	—	—	—	—
19	98	8	4	385
20	135	15	5	405
—	—	—	—	—
43	89	30	3	884
—	—	—	—	—
57	29	29	1	1120
—	—	—	—	—
74	56	25	2	1464
75	40	9	2	1475
—	—	—	—	—
87	19	19	1	1713
—	—	—	—	—
99	8	8	1	1904
—	—	—	—	—
108	3	3	1	1974

—	—	—	—	—
113	5	5	1	2002
114	6	6	1	2009
<b>Total</b>	6234	1746	263	

The Qur'an/Gregorian table II

$$1746 + 263 = 2009$$

On the table above, the total of the day nos. for the 6234 verses of the Qur'an is 1746 and the total of the month nos. is 263. The total of both day and month nos. gives the Gregorian year, 2009 CE.

Qur'an/Gregorian Table II

Gregorian Year: 2009 CE

The last chapter of the Qur'an, chapter 114 has 6 verses, day no. 6 of the calendar is 6 January i.e. 6/1. The cumulative sum or total of day and month nos. at this chapter is 2009.

Therefore, at chapter 114, the day no. is 6, the month no. is 1 and the year is 2009. Thus, we get a complete Gregorian date, 6 January, 2009 CE (i.e. 6/1/2009). This is the final date on the table and it represents the 6234 verses of the Qur'an.

Qur'an/Gregorian Table II

Gregorian Date: Tuesday, 6 January 2009 CE

When we entered the 6234 verses of the Qur'an into the Gregorian calendar, the result gave the year 2009 CE and the date 6 January 2009 CE. As expected, the Gregorian year and the final date on the table are both confirmed by the Date of Confirmations.

The no. of days between the Date of Confirmations, Monday, 14 June 1976 and the final date on the Qur'an/Gregorian table II, Tuesday, 6 January 2009 is 11894, a multiple of 19.

$$11894 = 19 \times 626$$

Now let's enter the total no. of verses in the Qur'an, 6234 as no. of days into the Gregorian calendar. We find a future date counting from the Date of Confirmations (the reference point).

By adding 6234 days to Monday, 14 June 1976, the resulting date is Friday, 9 July 1993 (i.e. 9/7/1993 CE).

The sum of the day, month and year nos. of the resulting date gives the Gregorian year 2009 which is same as the total on the Qur'an/Gregorian table II. Interestingly, the sum of day and month nos. gives the no. 16 (i.e. January 6).

$$9 + 7 + 1993 = 2009$$

Hence, the total you get when you enter the 6234 verses into the Gregorian calendar as seen on the table is what you get when you enter 6234 days into the Gregorian calendar with the Date of Confirmations being the reference point.

The validation of the results on the Qur'an/Gregorian table II (i.e. the Gregorian year and the final date on the table) by the Date of Confirmations is also a proof of the total no. of verses in the Qur'an as revealed by God.

<p style="text-align: center;"><u><b>Qur'an/Gregorian Table II</b></u></p> <p style="text-align: center;">Gregorian Calendar + 6234 Verses:</p> <p style="text-align: center;"><math>1746 + 263 = 2009 \text{ CE}</math></p> <p style="text-align: center;"><u><b>Date of Confirmations</b></u></p> <p style="text-align: center;">Date of Confirmations + 6234 Days:</p> <p style="text-align: center;"><math>9 + 7 + 1993 = 2009 \text{ CE}</math></p>
--

The date, Friday, 9 July, 1993 CE is the day no. 190 (or  $19 \times 10$ ) of the year.

### **The Table 1.0 Connection**

Different formats are used in writing dates in the numerical forms across the world, in other words, not all countries express dates in the numerical form in the same way.

The UK and much of Europe use the day/month/year format (i.e. 15/10/1582), some countries like the US use the month/day/year format (i.e. 10/15/1582), and most countries in Asia use the year/month/day format (i.e. 1582/10/15).

When writing a date with a single-digit day or month no. in the numerical form, the leading zeros are either included or excluded. For example, the final date from the Qur'an/Gregorian table II, 6 January, 2009 can be written as either 6/1/2009 or 06/01/2009.

This date written successively without the leading zeros gives the 6-digit no. 612009 which is a multiple of 19. The coefficient, 32,211 is the First and Last of the 6 dates on table 1.0 similarly written successively without the leading zeros.

Qur'an/Gregorian Table II

$$612009 = 19 \times 32,211 \text{ (Table 1.0)}$$

The First date on table 1.0 is 3/2 (Three February), the day and month nos. written successively gives 32. The Last date is 2/11 (Two November), the day and month nos. written successively gives 211. These two dates as seen from the coefficient are separated by a comma.

$$32,211 \rightarrow 3/2 \text{ \& } 2/11$$

While the coefficient, 32,211 is the combination of the dates, 3/2 & 2/11 (the First and Last date), the code 19 is the combination of the nos. 1 & 9 (the First and Last single digit natural no.).

If you had been a keen observer, you would have noticed that the two dates, 3/2 & 2/11 had been consistently marked by the nos. 1 & 9.

On table 1.0, the day nos. of the year at the dates, 3/2 & 2/11 gave the word Allah (God) with the coefficients, 1 & 9 respectively. Similarly, in the TUSC calculations, the omitted nos. at the dates, 3/2 & 2/11 gave the word God/Allah at the time unit nos. 1 & 9 respectively (table 2.0).

The Qur'an/Gregorian Table II

$$612009 = 32,211 \times 19$$

Table 1.0

$$3/2: \text{Day no. } 34 = 34 \text{ (Allah)} \times 1$$

$$2/11: \text{Day no. } 306 = 34 \text{ (Allah)} \times 9$$

Table 2.0

$$3/2: \text{Omitted no.} = 34 \text{ (Allah)} @ \text{Time unit no. } 1$$

$$2/11: \text{Omitted no.} = 26 \text{ (God)} @ \text{Time unit no. } 9$$

The TUSC values from the two dates, 3/2 & 2/11 resulted in some dates, grouped according to their time unit, numbered from 1 to 9. The only dates substantiating the attributes exhibited by the two dates occurred at the time unit no. 1 & 9 (table 4.0)

The final date on the Qur'an/Gregorian table II, 6/1/2009 CE (which produced 3/2 & 2/11) coincided with the month and day no. 1 & 9 of the Hijri year 1430 (i.e. 1/9/1430 AH).

We know that the dates, 3/2 & 2/11 are among the dates on table 1.0 that gave the NV of Gregorian calendar. Only these two dates on table 1.0 gave the word God in their day nos. of the year and in the TUSC calculations. These dates also manifested 4 of God's attributes mentioned in the Qur'an.

Therefore, the date that resulted from entering the 6234 verses of the Qur'an into the Gregorian calendar produced the two dates which gave the name and attributes of the Author of the Qur'an while also giving us the name of this calendar.

<u>The Qur'an/Gregorian Table II</u>	
<b>612009 = 19 X 32,211</b>	
<u>Table 1.0</u>	
<b>3/2:</b>	<i>God - The First, The Apparent</i>
<b>2/11:</b>	<i>God - The Last, The Hidden</i>

The date, 6/1/2009 is the outcome of the relationship between the Gregorian calendar and the Qur'an, and it is quite significant that this date produced two dates, 3/2 & 2/11 which pointed to both entities – the Gregorian calendar and the Qur'an.

The two dates points to the Gregorian calendar by their NV, 152 and points to the Qur'an by God's attributes in verse 57:3 which they (the two dates) exhibit.

The connection between table 1.0 and the Qur'an is further established by the Qur'an/Gregorian table II and the Qur'an/Gregorian table II is consequently authenticated by the table 1.0.

The emergence of the dates, 3/2 & 2/11 on table 1.0 from the date, 6/1/2009 on the Qur'an/Gregorian table II, did not happen by chance, it is a deliberate design of God, the Author of the Qur'an.

The no. of verses in the last chapter of the Qur'an, chapter 114 where the date, 6/1/2009 occurred and the coefficient from the chapter no. are evidences lending support to this fact.

The no. of verses in chapter 114 is 6, which is the no. of dates on table 1.0. The no. 6 is 3 X 2, thus, the prime factors of 6 are: 3, 2. The date, 3/2 is the First date out of the 6 on table 1.0 and is the First date of the two given by the coefficient.

No. of verses in chapter 114 = <b>6</b>
No. of dates on table 1.0 = <b>6</b>

The chapter no. 114 is a multiple of 19, the coefficient is also 6, the no. of dates on table 1.0.

$$\text{Chapter no. 114} = 19 \times 6$$

$$\text{No. of dates on table 1.0} = 6$$

The no. of verses in chapter 114, i.e. 6 gave the day/month, 6/1 (Six January) on the Qur'an/Gregorian table II. The month and day nos. 1 & 6 are the positions (S/N) of the dates, 3/2 & 2/11 respectively on table 1.0.

The four attributes in relation to the dates, 3/2 & 2/11 on table 1.0 occurred in chapter 57 verse 3 of the Qur'an, while the date, 6/1/2009 (19 X 32,211) occurred at the chapter 114 verse 6 on the Qur'an/Gregorian table II.

$$\text{Verse 57:3} \rightarrow 3/2, 2/11$$

$$\text{Verse 114:6} \rightarrow 6/1/2009$$

Chapter 57 marks the end of the first half of the Qur'anic chapters. It is noteworthy that verse 57:3 is half of the verse 114:6 (The nos. 57 & 3 are half of 114 & 6 respectively).

The connection between the dates, 3/2, 2/11 & 6/1/2009 on the two tables is further confirmed by the code 19 and the coefficients when we count the no. of verses from verse 57:3 to 114:6.

The no. of verses (+Basmallah) from verse 57:3 to 114:6 is 1216, this no. is a multiple of 19.

$$1216 \text{ verses} = 19 \times 16 \times 4$$

The dates, 3/2 & 2/11 produced the grand total, 5985 in the TUSC calculations. From the Date of Confirmations, 5985 days is equivalent to 16 years, 4 months & 19 days. The product of these no. of years, months and days is 1216, the no. of verses (+Basmallah) from verse 57:3 to 114:6.

$$1216 \text{ verses} = 16 \text{ (years)} \times 4 \text{ (months)} \times 19 \text{ (days)}$$

The nos. 16, 4 & 19 denotes the two dates' positions (1 & 6) on table 1.0, the no. of God's attributes (4) the dates represent, and the coefficients or time unit nos. (1 & 9) from the dates' day nos. of the year or the TUSC calculations (table 3.0 & 4.0).

Excluding the Basmallahs, the no. of verses from verse 57:3 to 114:6 is 1159. This no. is also a multiple of 19. The coefficient is 61 – the day/month no. or the dates' positions (6 & 1).

$$1159 \text{ verses} = 19 \times 61$$

On the Qur'an/Gregorian table II, the no. of verses in the chapters gives day and month nos. while the cumulative sum of day and month nos. at the chapters gives the years.

At chapter 57, the day no. is 29, month no. is 1 and year is 1120. Thus, we get the Julian date, 29/1/1120 CE. At chapter 114, the day no. is 6, month no. is 1 and year is 2009. Thus, we get the Gregorian date, 6/1/2009 CE.

<u>Qur'an/Gregorian Table II</u>	
Chapter 57:	Thursday, 29 January, 1120 CE
Chapter 114:	Tuesday, 6 January, 2009 CE

The no. of days between the date, 29/1/1120 CE and 6/1/2009 CE is 324,672, this is equivalent to 888 years, 11 months and 8 days. As usual, this no. of days is a multiple of 19.

The chapter nos., 57 & 114, the no. of days between the chapters, 324,672 and the date on which this no. of days falls, 6/1/2009 are all marked by the miraculous code, 19.

$$324,672 = 19 \times 17088$$

Before we proceed, let's take a look at the chapter 57. Chapter 57 is titled "Al-Hadeed" which means "The Iron". Let us examine the NV of this chapter title both in Arabic and in English.

<b>Al-Hadeed</b>	Alif	Lam	Ha	Da	Ya	Da	<b>Total</b>
	1	30	8	4	10	4	<b>57</b>

  

<b>The Iron</b>	T	H	E	I	R	O	N	<b>Total</b>
	20	8	5	9	18	15	14	<b>89</b>

As we can see, the NV of the chapter's title in Arabic, "Al-Hadeed" is 57, which is same as the chapter no. The NV of the chapter's title in English, "The Iron" is 89.

The total no. of days from the date at chapter 57 (19 X 3) to the date at chapter 114 (19 X 6) is 324,672 (19 X 17088). This no. of days apart from being marked by the code 19 also shows some phenomenal evidences regarding the two dates, 3/2 & 211 on table 1.0.

Remember that this no. of days, 324,672 ends or coincides with the date, 6/1/2009 (19 X 32,211) whose coefficient stands for the two dates, 3/2 & 2/11.

From this no. of days, we get the chapter no. in relation to the two dates, the chapter's title both in Arabic and English, the positions of these dates on table 1.0 and the no. of attributes the dates represents in the chapter.

No. of Days: Chapter 57 & 114

$$324,672 = 57 \times 89 \times 16 \times 4$$

The no. **57** is the chapter no. and is the NV of the chapter's title in Arabic (Al-Hadeed), **89** is the NV of the chapter's title in English (The Iron), the no. **16** denotes the dates positions (**1** & **6**) on the table, **4** is the no. of Attributes the dates stands for in the chapter.

In the count of no. of verses from verse 57:3 to 114:6, the results pointed at the dates, 3/2 & 2/11. In the count of no. of days from the date at chapter 57 to 114, we found a similar thing. If you are not convinced yet, check out the next one.

The no. of days, 324,672 puts the seal on the evidences as shown above by giving us one of these two dates on table 1.0, along with the chapter no. and title in relation to the dates.

Three February (3/2) is the First date on table 1.0 and it is one of the two dates on the table given by the date, 6/1/2009. The NV of "Three" is 56 and the NV of "February" is 96. The NV of day/month, "Three February" (3/2) written successively is 5696.

Three	T	H	R	E	E	Total
	20	8	18	5	5	<b>56</b>

February	F	E	B	R	U	A	R	Y	Total
	6	5	2	18	21	1	18	25	<b>96</b>

324,672 days is the product of the date, Three February (3/2) and the no. 57 which is the chapter no. and the NV of the chapter's title.

No. of Days: Chapter 57 & 114

$$324,672 = 57 \times 5696$$

The no. **57** is the chapter no. and is the NV of the chapter's title in Arabic (Al-Hadeed), **5696** is the NV of the date, Three February (**3/2**)

Interestingly, the mathematical expression just above is found coded in the Qur'an.

The chapter that immediately precedes chapter 57 is chapter 56 which has 96 verses (only chapter 56 has 96 verses in the Qur'an). This means that the last verse just before chapter 57 is verse 56:96.

The verse preceding chapter 57 is 56:96

When you probe further you realize that verse 56:96 has been strategically placed in the Qur'an to make definite the connection of chapter 57 (which immediately follows the verse) with the date, Three February (3/2) and consequently, with the dates on table 1.0.

The no. of verses from the beginning of the Qur'an till verse 56:96 is 5073 or  $19 \times 267$ , this is also  $57 \times 89$ . The no. of verses, 5073 therefore produces the chapter no. and the chapter's title both in Arabic and English.

No. of verses till verse 56:96 =  $57 \times 89$

56:96 is the NV of date, Three February (3/2). The no. 57 is the chapter no. and is the NV of the chapter's title in Arabic (Al-Hadeed), 89 is the NV of the chapter's title in English (The Iron).

The no. of verses, 5073 that gave the chapter no. and chapter's title are composed of the natural nos. 5, 7 & 3, this seem to suggest the actual verse in the chapter, i.e. verse 57:3.

The Qur'an had obviously been authored to reflect the table 1.0 and the Gregorian calendar at large. One does not need to be super intelligent to figure out from all the discoveries I have presented in this book that a mortal couldn't have been the brain behind this Glorious Scripture.

At the time the Qur'an was being revealed to Prophet Muhammad, there was no such thing as the "Gregorian calendar". Muhammad couldn't have known about this calendar that was to be commissioned in the distant future after his death but the Omniscient God knew.

The Forever-living God who had absolute fore-knowledge of this calendar authored the Qur'an accordingly in order to show us some of His greatest signs through this calendar as a major fulfillment of His prophecy and promise.

## **THE CHALLENGE OF THE QUR'AN**

God Almighty issued forth a challenge to both mankind and jinn (the spirits/demons) to produce a book like the noble Qur'an, with the aim of proving the Qur'an's divine origin and its inimitability which is repeatedly emphasized in the holy Book itself.

The criteria for the challenge to be met encompasses the characteristics of the Qur'an. The Qur'an possess unique and astonishing characteristics that are way beyond the capacity of any human to reproduce.

The exclusive eloquence of the Qur'an, the fine arrangement, its bestowal of knowledge of the unseen and knowledge of the future (i.e. prophecies), historical accuracy, literary perfection and proven scientific information are some of the criteria to be met.

This divine challenge has stood for over 1400 years and it is one that gets harder as time passes by. As we learn more and more about the Qur'an, the scope of the challenge increases as any new discovery is added to the list of criteria that a challenger must meet.

The discovery of the intricate mathematical patterns of the Qur'an based on the no. 19 since the year 1974 and the discovery of the overwhelming mathematical relationship between the Qur'an and the Gregorian calendar since the year 2009 took this challenge to a level where it is unarguably impossible to meet.

The man-made book that is supposed to defeat the Qur'an has to factor in its mathematical miracles and the Qur'an's composition based on the Author's foreknowledge of the Gregorian calendar. Considering any of these two, no human would even want to give it a try.

The Qur'an is structured upon an ingenious mathematical formula, based primarily on the no. 19, and the holy Book incorporated a profound foreknowledge of a future calendar which was commissioned 950 (19 X 50) years after its revelation.

These proving without a shadow of a doubt that no human or jinn could ever duplicate the Qur'an and meet God's challenge, that no one could have ever written such a Book, rather, it is the pure word of God Almighty.

Here, I present to you the discoveries I made as regards to this age-long challenge from God, its relationship with the miraculous code 19 (the mathematical miracles) and of course, the Gregorian calendar.

Like the just concluded section, this section involves the Qur'an/Gregorian table II.

Splitting the Qur'anic chapters into two equal parts, chapter 57 marks the end of the first half of the chapters and chapter 114 marks the end of the other half. On the Qur'an/Gregorian table II, chapter 57 produced the date, 29/1/1120 CE and chapter 114 gave the date, 6/1/2009 CE.

The no. of days between the date, 29/1/1120 CE and 6/1/2009 CE is 324,672. This no. of days we know is a multiple of the miraculous code 19, the coefficient is 17,088.

Remember that the two chapters, 57 & 114 where the two dates occurred on the table are both multiples of 19.

$$324,672 = 19 \times 17,088$$

Looking at the coefficient, 17,088 we find that it comprises of the nos. 17 & 088, as separated by a comma. This coefficient gives us the verse 17:088 of the Qur'an challenging both mankind and jinn to come together and produce the like of the whole Qur'an.

Verse 17:088 is composed of 19 Arabic words. This no. of words is a very significant sign for the message of this verse of the Qur'an.

Thus, the coefficient represents the verse 17:088 while the miraculous code 19 is the no. of Arabic words in the verse. The code 19 or no. of Arabic words is a pointer to the 19-based mathematical composition/miracles of the Qur'an which unarguably can never be imitated by any mortal.

No. of Days: Chapter 57 & 114

$$324,672 = 19 \times 17,088$$

Verse of Challenge in Qur'an

No. of Arabic words: 19

Chapter/verse no: 17:088

Verse of Challenge in Qur'an

*Say, "If mankind and the jinn were together to produce the like of this Qur'an, they can never produce anything like it, no matter how much assistance they lent one another."*

– Qur'an 17:088

The 324,672<sup>nd</sup> day (19 X 17,088) falls on the date produced by chapter 114 verse 6 (i.e. verse 114:6) on the Qur'an/Gregorian table II. This chapter is titled "Mankind".

*"Of the jinn and mankind." – Qur'an 114:6*

The message of verse 114:6 confirms that the code 19 and coefficient, 17,088 from the total no. of days surely pertains to the jinn and mankind, just as we learnt from the 19-word message of verse 17:088 of the Qur'an.

## The Proofs

Now, let's enter the coefficient, 17,088 as no. of days into the Gregorian calendar. We would be finding a future date counting as usual from the Date of Confirmations.

By adding 17,088 days to Monday, 14 June 1976, the date you get is Tuesday, 28 March 2,023. The day/month, 28 March is the day no. 87 of the year.

Thus, the 17,088<sup>th</sup> day after the Date of Confirmations is the day no. 87 of the year 2,023 CE. This day no. of the year and the year no. gives another verse where a similar challenge is put forward.

Date of Confirmations & 17,088 Days

Tuesday, 28 March, 2,023 CE

Day no. 87 of year 2,023 CE

The day no. of the year, 87 is the chronological no. of the chapter. The year, 2,023 comprises of the nos. 2 & 023 (as separated by a comma), the chapter no. is 2 and the verse no. is 023.

The year no. 2,023 therefore represents the verse 2:023 of the Qur'an. In this verse, God challenges the disbelievers to produce the like of a single chapter of the Qur'an.

As a reminder, the Qur'an was not arranged in the order in which it was revealed. Chapter 2 is 87 in the chronological (revelation) order, this means the chronological no. of chapter 2 is 87 (chapter 2 is the 87<sup>th</sup> revealed chapter of the Qur'an).

Date of Confirmations & 17,088 Days

Day no. 87 of year 2,023 CE

Verse of Challenge in Qur'an

Chronological no: 87

Chapter/verse no: 2:023

17,088 days is equivalent to 46 years and 287 days. Hence, the day no. 87 of year 2,023 is 46 years and 287 days after the Date of Confirmations.

The no. of years, 46 is the product of the nos. 2 & 23 – the chapter and verse no. respectively. The no. of days, 287 is the combination of the nos. 2 & 87 – the chapter and chronological no. respectively. Interestingly, 287 is the no. of verses (+Basmallah) in this chapter.

Date of Confirmations & 17,088 Days

46 Years & 287 Days → Day 87 of Year 2,023 CE

No. of Years: 46 = 2 X 23 (Chapter X Verse no.)

No. of Days: 287 = 2 & 87 (Chapter & Chron. no.)

I usually don't jump into conclusion; I only conclude after I must have gotten evidences. As expected, a skeptic will require proofs that the coefficient, 17,088 truly speaks about the verse 17:088 of the Qur'an.

In order to confirm this and as well prove that the verse of challenge occurring from the coefficient, 17,088 did not happen by coincidence, I used the Date of Confirmations and this resulted in a similar verse.

The fact that the no. of days, 17,088 (verse 17:088) and the year it falls on, 2,023 (verse 2:023) both gives the verse of challenge in the Qur'an suffices as proof but I did not stop there, I applied the Time Units System of Coding (TUSC).

The no. of days between 14/06/1976 CE and 28/03/2023 CE is 17,088 (the coefficient). Now, from this no. of days, we find the no. of hours, minutes, seconds and weeks.

Between 14/06/1976 CE and 28/03/2023 CE:

No. of days = 17,088  
No. of hours = 410,112  
No. of minutes = 24,606,720  
No. of seconds = 1,476,403,200  
No. of weeks = 2,441

Adding the group of digits,

$$410 + 112 + 24 + 606 + 720 + 1 + 476 + 403 + 200 + 2 + 441 = 3395$$

Total: 3395

Omitted nos.: 17 & 088

Reason: Nos. stands for chapter & verse 17:088

In the TUSC calculations, some nos. were omitted while the other nos. were added. The omitted nos. 17 & 088 are nos. representing the verse 17:088 of the Qur'an, and for this reason, they were not added to the other nos. The total of the other nos. is 3395.

The total, 3395 has therefore been made possible by the existence and subsequent omission of the nos. representing verse 17:088 in the calculations.

Like the omitted nos., the total, 3395 gives us verses dealing with the challenge of God to the disbelievers in Qur'an.

Just as we did earlier in the case of the coefficient, 17,088, let's enter the total, 3395 into the Gregorian calendar, with the Date of Confirmations being the starting point as usual.

Adding 3395 days to Monday, 14 June 1976,

The 3395<sup>th</sup> day after Monday, 14 June, 1976 is Monday, 30 September, 1985 (30/09/1985 CE). This means that the no. of days between Monday 14/06/1976 and Monday 30/09/1985 is 3395.

$$30 + 09 + 1985 = 2,024$$

The day no. 1 in this count is the next day after the starting date, this is called exclusive counting. The total of the day, month and year no. of the resulting date, 30/09/1985 is 2,024 which comprises of the nos. 2 & 024. This gives the verse 2:024 of the Qur'an.

The 3395<sup>th</sup> day from Monday, 14 June, 1976 is Sunday, 29 September, 1985 (29/09/1985 CE). This means that the no. of days from Monday 14/06/1976 to Sunday 29/09/1985 is 3395.

$$29 + 09 + 1985 = 2,023$$

The day no. 1 in this count is the starting date, this is inclusive counting. The total of the day, month and year no. of the resulting date, 29/09/1985 is 2,023 which comprises of the nos. 2 & 023. This gives us the verse 2:023 of the Qur'an.

The total of the two dates is marked by the code 19.

$$2,023 + 2,024 = 4047 \text{ or } 19 \times 213$$

The Qur'anic challenge in chapter 2 starts from the verse 2:023 to 2:024. The total, 3395 from the TUSC calculations produced these two verses, via the Date of Confirmations.

The total, 3395 and the two verses that emanated from it are due to the fact that the right nos. had been added and the right nos. had been omitted in the TUSC calculations.

Date of Confirmations & 3395 Days

$$29 + 9 + 1985 = \mathbf{2,023}$$

$$30 + 9 + 1985 = \mathbf{2,024}$$

Verse of Challenge in Qur'an

Chapter/verse no:  $\mathbf{2:023}$  to  $\mathbf{2:024}$

### Verses of Challenge in Qur'an

*If you have any doubt regarding what we revealed to our servant,  
then produce one chapter like these, and call upon your own  
witnesses against God, if you are truthful.*

– Qur'an 2:023

*If you cannot do this and you can never do this then beware of the  
Hellfire, whose fuel is people and rocks; it awaits the disbelievers.*

– Qur'an 2:024

A quick summary,

- Splitting the Qur'anic chapters in two, the first half ends with the chapter 57 (19 X 3), the other half ends with chapter 114 (19 X 6).
- The no. of days between the dates at chapter 57 & 114 (on the Qur'an/Gregorian table II) produced the code 19 and coefficient 17,088, these pointing to the 19-words message of verse 17:088 – A challenge to mankind and jinn to produce the like of the Qur'an.
- Adding the coefficient, 17,088 days to the Date of Confirmations, the resulting date gave the verse 2:023 – Another verse of the Qur'an where a similar challenge is put forward.
- Applying the TUSC calculations to the coefficient, 17,088 days resulted in the total 3,395 while omitting the nos. 17 & 088 (the chapter and verse nos.) in the calculations.
- Adding the total, 3,395 days to the Date of Confirmations (inclusive and exclusive counting), the resulting dates gave the verses, 2:023 & 2:024 (where verse 2:024 is the concluding message of verse 2:023).

The outcome of entering the total, 3395 into the calendar (i.e. verse 2:023 & 2:024) are proofs validating the TUSC calculations that led to it. It serves as approval for the added nos., the omitted nos. and the reason behind the omission.

Entering the total, 3395 into the calendar reaffirms what the coefficient, 17,088 and the omitted nos. 17 & 088 represents (verse 17:088) as this produced similar verses (verse 2:023 & 2:024) of the Qur'an.

As we know, the total of the nos. added in TUSC calculations always corroborates and complements the omitted nos. It serves as a proof of what the omitted nos. means or refers to.

The challenge to reproduce the Qur'an is presented in several verses and in three stages: 1) Produce the whole Qur'an. 2) Produce ten chapters. 3) Produce one chapter.

The purpose of this challenge is to make it clear to the pagans, Christians, Jews, the unbelievers at large that the Qur'an could not have been authored by any creation, rather it is the true word of the Most High God sent to His righteous prophet, Muhammad.

In order to demonstrate the divine origin of the Qur'an, God issued the universal proclamations challenging all of creations, mankind and jinn to create a book of the stature of the Qur'an.

God then reduced its scope and made the challenge ostensibly easier by asking those who denied its divine origin to produce ten chapters like those in the Qur'an.

Then, at the third stage, the scope of the challenge is reduced still further, the deniers are called on to produce only a single chapter resembling the Qur'an, whose shortest chapter has 3 verses and consist only of a few brief sentences.

Verse 17:088 and verses 2:023 to 2:024 which emanated from the coefficient, 17,088 represents the hardest and the easiest of these challenges (i.e. the 1<sup>st</sup> & 3<sup>rd</sup> stages) respectively.

The Qur'an says this is impossible to achieve even if all mankind and jinn assemble to lend help or assistance to each other. It urged anyone who disagreed to make an attempt to imitate it and should feel free to seek help from any source in doing so.

While it may be argued by some that the literary excellence of the Qur'an can or have been met, being able to duplicate an intricate and extraordinary mathematical system such as the Qur'an is unarguably impossible.

Some literary giants who tried to answer this challenge had no awareness of the Qur'an's mathematical composition or they simply decided to ignore it. To be considered as successful, one has to factor in the 19-based mathematical miracles of the Qur'an – this is the real challenge.

This fact is evidenced by the verse 17:088, the hardest of the challenges. As seen earlier, this verse asking both mankind and jinn to reproduce the like of the whole Qur'an is composed of exactly 19 Arabic words.

God has chosen this no. of Arabic words for this verse to give a strong hint that the 19-based numerical miracles is the main and one of the inimitable features of the Qur'an and as such the Book is beyond the productive capacity of mankind and jinn.

The no. of days, 324,672 from the dates gotten by entering the whole Qur'an into the Gregorian calendar (i.e. the Qur'an/Gregorian table II) also pointed at the miraculous code 19 in relation to the message of verse 17:088 and the inimitability of the Qur'an.

$$324,672 = 19 \times 17,088$$

Our generation and the future ones are the ones destined to fully grasp how impossible to produce a book featuring a super-human and intricate mathematical composition, where all the chapters,

verses, words and letters are not only mathematically composed but are also arranged into a structure that is purely mathematical.

The perfect foreknowledge of the Gregorian calendar as demonstrated by the Qur'an is clearly indicative of the divine foreknowledge and omniscient nature of the Author, attributes no mortal can ever lay claims to.

The mathematical composition of the Qur'an based on the no. 19 and its composition based on the aforementioned calendar that started 950 (19 X 50) years after the Qur'an, constitutes definite and incontrovertible proofs that the Qur'an will forever remain a Book of inimitable quality.

## **THE FULFILLMENT OF A MAJOR PROPHECY**

### **A Prophecy Fulfilled**

*“We will show them our signs in the horizons and in their own selves until it becomes manifest to them that this (the Qur’an) is the truth. Is it not sufficient in regard to your Lord that He is a Witness over all things?”*

– Qur’an 41:53

It was the plan of God that the Gregorian calendar be a sign and proof of the divine origin of the Qur’an, so He set all the parameters right for the two, that we might witness therefrom some of the greatest miracles ever.

The no. of chapters, the chapter’s names, total no. of verses, no. of verses in each chapter and their order of arrangement, the chronological order, frequency of God, the no. of letters and words, every parameter and its arrangement in the Qur’an has been set right by God for these awesome miracles.

On the other hand, the no. of months in the Gregorian calendar, the month’s names, no. of days in each month and their order of arrangement (i.e. 31, 28, 31, 30...etc.), the leap month and year, the calendar’s name and date of commissioning were all determined by man.

Unknown to man, every decision he had made concerning the calendar had been foreknown by God and He had authored the Qur’an accordingly that this calendar might be a major fulfillment of His promise and prophecy in verse 41:53.

The Gregorian calendar, also known as the Christian calendar, is the internationally accepted civil calendar and is the most widely used calendar in the world. It was introduced by Pope Gregory XIII, after whom it was named.

This calendar which originated from those who don’t believe in the Qur’an is therefore God’s signs in the unbelievers themselves – A promise made; a promise kept.

In year 2009, when I started making discoveries that the Gregorian calendar is a proof of the authenticity of the Qur’an, I immediately perceived this as a fulfillment of the prophecy in verse 41:53.

The first form of confirmation I got came from the total of the chapter and verse no. The total of the chapter no. 41 and verse no. 53 is 94, the NV of the word “Gregorian”.

$$41 + 53 = 94 \text{ (Gregorian)}$$

Any human that looks at the message of verse 41:53 and all the numerical miracles I have been blessed with as regards the Qur'an and this calendar with a fair or open mind will harbor not a single doubt that this is God's words in the verse that is being fulfilled.

Even though this is glaring enough, there are people who will still contest it and ask for proofs. To this kind of people, some jaw-dropping proofs awaits them below. It is God's intention to make the truth overly clear to us so that there is no excuse whatsoever to remain adamant.

Are there truly connections between the message of verse 41:53 and the Gregorian calendar? In other words, is this calendar a fulfillment of the verse's prophecy? Let's find out from the Date of Confirmations.

### **Chapter And Verse No.**

We are going to enter the chapter and verse no. 41:53 into the Gregorian calendar, like we did to the word God and some other nos. in this book. The Date of Confirmations as usual is the starting point.

To do this, we enter the chapter and verse no. one after the other as no. of days into the calendar, starting the count from the Date of Confirmations, Monday, 14 June, 1976 (14/06/1976 CE).

The chapter no. 41: By adding 41 days to the date, Monday, 14/06/1976 CE, the resulting date is Sunday, 25/07/1976 CE.

The verse no. 53: By adding 53 days to the date, Sunday, 25/07/1976 CE, the resulting date is Thursday, 16/09/1976 CE.

An alternative option is to add up the chapter and verse no. one after the other and then add the cumulative sum at each no. as no. of days to the date, 14/06/1976 CE. You still arrive at the same dates above.

The results are tabulated on the table below.

	Chapter & Verse No.	Day	Month	Year
Verse 41:53	41	25	07	1976
	53	16	09	1976
	<b>Total</b>	<b>41</b>	<b>16</b>	<b>3952</b>

Table 5.0. Chapter/verse no.

As seen on the table above, the total of the day nos. is 41, the total of the month nos. is 16 and the total of the year nos. is 3952. The total of day, month and year nos. is 4009, this no. is a multiple of 19, the coefficient is 211.

$$\text{Verse } 41:53 = 41 + 16 + 3952 = 4,009$$

$$4,009 = 19 \times 211$$

The coefficient, 211 signifies the date, 2/11 (Two November) on table 1.0.

<p><u>Date of Confirmations &amp; Verse 41:53</u></p> <p>Total = 4,009 or 19 X 211</p> <p><u>Table 1.0</u></p> <p>Day/Month: 2/11 (Two November)</p>
--

Table 1.0 comprises of 6 dates whose NV (day + month) is 152 which is the NV of Gregorian calendar. The date, 2/11 (Two November) which is one of the 6 dates, is the Last on the table. The NV of day no. “Two” is 58 and the month, “November” is 94, their total is 152.

Table 1.0 and its 6 dates gotten from the calendar constitutes the signs within the unbelievers that God has promised to show them in verse 41:53. The discovery of this table which is a proof of the authenticity of the Qur’an is in fulfillment of the verse 41:53.

<p><u>Two November: 2/11</u></p> <p>58 (Two) + 94 (November) = 152 (Gregorian calendar)</p> <p>152 = 19 X 8</p>
---

All the dates on table 1.0 have the same total NV, 152 which stands for “Gregorian calendar” and God could have chosen any of the dates on the table to signify that the Gregorian calendar is connected with the prophecy in verse 41:53.

The reason why God chose the date, 2/11 out of the 6 becomes obvious when you examine the NV of the day and month nos. of this date and also when you add up the day and month nos. of the 6 dates on the table till the date, 2/11.

The date, 2/11 stands out amongst the others on table 1.0 by the fact that its total NV does not only give the words “Gregorian calendar”, but the NV of the month and the NV of the day also gives us the words, “Gregorian” and “calendar” respectively.

This means that the NV of “Two” i.e. 58 is the NV of “Calendar”, while the NV of “November” i.e. 94 is the NV of Gregorian. This is one unique feature you won’t get from the other dates.

Two November: 2/11

2 (Two) = 58 (Calendar)

11 (November) = 94 (Gregorian)

2/11: Two/November → Calendar/Gregorian

On table 1.0, the total of the month and day nos. and the total of their sum of digits till the date, 2/11 similarly reflects the words, “Gregorian calendar”. I will number it 1 & 2 for clarity sake.

- 1) The total of the day and month nos. till 2/11 is 94, the NV of “Gregorian” (and of the month, “November”: 11).
- 2) The total of sum of digits of day and month nos. till 2/11 is 58, NV of “Calendar” (and of the day, “Two”: 2).

The 6 Dates of Table 1.0

1) Day & month nos. till 2/11 = 94 (Gregorian)

2) Day & month nos. till 2/11 = 58 (Calendar)

Day & month nos. till 2/11 → Gregorian/Calendar

The date, 2/11 is one of the two dates found to be profoundly connected with the Qur’an on table 1.0. It is one of the two dates proclaiming the attributes of God in the Qur’an. It is also one of the two dates that resulted as a coefficient, 32,211 from the last date on the Qur’an/Gregorian table II.

From all indications, 2/11 is the most perfect to signalize the Gregorian calendar, and God has chosen this date over the others as a definite proof of the connection between the calendar and the verse 41:53 (the fulfillment).

**No. of Verses (Traditional Order)**

The message of verse 41:53 is composed of 19 Arabic words, if you count the no. of different Arabic letters in the verse, you also get 19. When you look at these 19 Arabic words, the first sign you see is the Gregorian calendar.

It will interest you to know that the very first Arabic word in verse 41:53, “Sanurihim” which translates to “We will show them” has a NV of 365, the no. of days in a common year of the calendar.

“We will show them” = 365 (Gregorian calendar)

As we have seen, entering the verse 41:53 into the calendar produced the total, 4009 resulting in the no. 19 and coefficient, 211.

While the no. 19 which is the no. of Arabic words in verse 41:53 symbolizes the miraculous code of the Qur'an, the coefficient, 211 symbolizes the Gregorian calendar. These two have a special/major role to play in the fulfillment of the prophecy in this verse of the Qur'an.

The mathematical composition of the Qur'an based on the miraculous code 19 and its composition based on this calendar that evolved 19 X 50 years after its revelation, are both indisputable proofs of the authenticity of the Qur'an which the verse 41:53 talks about.

<u>Date of Confirmations &amp; Verse 41:53</u>
Total = 4,009 or 19 X 211
<u>Fulfillment of Verse 41:53</u>
Miraculous code: 19
Gregorian calendar: 211

After having witnessed the astounding results from entering the verse 41:53 (i.e. nos. 41 & 53) into the calendar (table 5.0), an unbeliever might argue that the verse 41:53 is not peculiar to the Qur'an, it could be found in just any book or scripture, e.g. Genesis 41:53 in the Bible.

From the foregoing, there is the need to go to the Qur'an and find out if these results have anything to do with the verse 41:53 of the Qur'an or it just happened by coincidence.

Counting from the beginning of the Qur'an (forward counting), verse 41:53 is the 4269<sup>th</sup> verse. Now, counting from the end of the Qur'an (backward counting), verse 41:53 is the 1966<sup>th</sup> verse.

Forward Counting: Verse 41:53 = Verse no. 4269

Backward Counting: Verse 41:53 = Verse no. 1966

Now, we enter the no. of verses of the Qur'an up till the verse 41:53 both forward counting and backward into the Gregorian calendar.

For the forward counting, the no. of days is counted forward or added to the date, Monday 14/06/1976 CE. For the backward counting, the no. of days is counted backward or subtracted from the date, Monday 14/06/1976 CE.

The Date of Confirmations which is the reference point in both cases acts as the beginning and the end of the Qur'an.

Forward Counting: By adding 4269 days to the date, Monday 14/06/1976 CE, the resulting date is Sunday 21/02/1988 CE. This date stands for the no. of verses from the beginning of the Qur'an till verse 41:53.

Backward Counting: By subtracting 1966 days from the date, Monday 14/06/1976 CE, the resulting date is Tuesday 26/01/1971 CE. This date stands for the no. of verses from the end of the Qur'an till verse 41:53.

	Counting	No. of Verses	Day	Month	Year
Verse 41:53	Forward	4269	21	02	1988
	Backward	1966	26	01	1971
	<b>Total</b>		<b>47</b>	<b>03</b>	<b>3959</b>

Table 5.1. No. of verses: Traditional order

On the table above, the total of the day nos. is 47, the total of the month nos. is 3 and the total of the year nos. is 3959. The total of day, month and year nos. is 4009, a multiple of 19 with coefficient, 211.

$$\text{Verse 41:53} = 47 + 3 + 3959 = 4,009$$

$$4,009 = 19 \times 211$$

Interesting! Entering the no. of verses till the verse 41:53 of the Qur'an into the calendar (table 5.1) yields the same result or total as entering the chapter and verse no. 41:53 into the calendar (table 5.0).

<p><u>Date of Confirmations &amp; Verse 41:53</u></p> <p>No. of verses till verse 41:53 of Qur'an:</p> <p>Total = 4,009 or <b>19</b> X <b>211</b></p>
---

We already know what the no. 19 and the coefficient, 211 means in relation to the verse 41:53 of the Qur'an.

### No. of Verses (Chronological Order)

The chapters of the Qur'an were not arranged in the order in which they were revealed. The order in which the chapters were arranged is called the "traditional order" and the order in which they were revealed is the "chronological order".

The chronological no. of chapter 41 is 61, therefore verse 41:53 (traditional order) is the verse 61:53 (chronological order). The total of the chronological no. and verse no. is 114, which is the total no. of chapters in the Qur'an.

$$61 + 53 = 114 \text{ or } 19 \times 6$$

In the chronological order,

Counting from the beginning of the Qur'an (forward counting), verse 61:53 (41:53) is the 3205<sup>th</sup> verse. Counting from the end of the Qur'an (backward counting), verse 61:53 (41:53) is the 3030<sup>th</sup> verse.

Forward Counting: Verse 61:53 (41:53) = verse no. 3205

Backward Counting: Verse 61:53 (41:53) = verse no. 3030

Like we did to the count of verses in the traditional order, we enter the no. of verses till the verse 61:53 (41:53) both forward counting and backward into the calendar.

Remember that for the forward counting, the no. of days was counted forward or added to the date, Monday 14/06/1976 CE. For the backward counting, the no. of days was counted backward or subtracted from the date, Monday 14/06/1976 CE.

For the chronological order, we do the exact same thing.

Forward Counting: By adding 3205 days to the date, Monday 14/06/1976 CE, the resulting date is Sunday 24/03/1985 CE. This date stands for the no. of verses from the beginning of the Qur'an till verse 61:53 (41:53).

Backward Counting: By subtracting 3030 days from the date, Monday 14/06/1976 CE, the resulting date is Tuesday 27/02/1968 CE. This date stands for the no. of verses from the end of the Qur'an till verse 61:53 (41:53).

	Counting	No. of Verses	Day	Month	Year
Verse 61:53 (41:53)	Forward	3205	24	03	1985
	Backward	3030	27	02	1968
	<b>Total</b>		<b>51</b>	<b>05</b>	<b>3953</b>

Table 5.2 Verse 61:53 (41:53): Chronological order

On table 5.2 above, the total of the day nos. is 51, the total of the month nos. is 5 and the total of the year nos. is 3953. The total of day, month and year nos. is 4009, a multiple of 19 with coefficient, 211.

$$\text{Verse 61:53 (41:53)} = 51 + 5 + 3953 = 4,009$$

$$4,009 \text{ or } 19 \times 211$$

This is indeed awesome! In three different cases, the verse 41:53 entered into the Gregorian calendar produced the same total, 4009 resulting in the miraculous code, 19 and coefficient, 211 symbolizing the Gregorian calendar.

Date of Confirmations & Verse 41:53

Total of the dates from entering the chapter and verse no. 41:53 into the Gregorian calendar (table 5.0) is 4,009

$$4,009 = 19 \times 211$$

Total of the dates from entering the no. of verses till verse 41:53 in the traditional order into the Gregorian calendar (table 5.1) is 4,009

$$4,009 = 19 \times 211$$

Total of the dates from entering the no. of verses till verse 61:53 (41:53) in the chronological order into the Gregorian calendar (table 5.2) is 4,009

$$4,009 = 19 \times 211$$

The three stunning evidences above which emanated from the Date of Confirmations sets the seal on what the Gregorian calendar means to the fulfillment of God's promise and prophecy in verse 41:53.

These miracles which yet again demonstrates the relationship between the Qur'an and this calendar has been made possible by the fact that the Qur'an has been authored in a manner that allows it and God has placed this crucial prophecy in the right place in the Qur'an.

He chose the right chapter and verse no. for this prophecy and He placed it in the appropriate place/position both in the traditional and chronological order, that we may witness these undeniable miracles presented by tables 5.0, 5.1 & 5.2.

As is clearly evident from the three tables, the Gregorian calendar which represents God's signs within the unbelievers is a major fulfillment of verse 41:53 of the Qur'an.

When God speaks, He means business, His words are not to be taken lightly for He has the powers to do all things. God never breaks a promise; His words will never return to Him void.

The total, 4009 the outcome of each of the three tables has only two prime factors, they are: 19 & 211. This means 4009 is the product of two prime nos. 19 & 211. The no. 19 is the 8<sup>th</sup> prime no. while 211 is the 47<sup>th</sup> prime no.

Below is the list of all the prime nos. from 19 to 211.

19, 23, 29, 31, 37, 41, 43, 47, 53, 59, 61, 67, 71, 73, 79, 83, 89, 97, 101, 103, 107, 109, 113, 127, 131, 137, 139, 149, 151, 157, 163, 167, 173, 179, 181, 191, 193, 197, 199, 211.

The total of all prime nos. from 19 to 211 is 4380. This total is the product of the nos. 12 & 365, the no. of months and days in a year of the Gregorian calendar. Praise be to God Almighty.

As you add up the prime nos. the total, 4380 which gives the no. of months and days in a year coincides with the no. 211 which signifies the name of this calendar as we have seen earlier.

<u>Date of Confirmations &amp; Verse 41:53</u>
4,009 = 19 X 211
<u>Total of prime nos. from 19 to 211</u>
4,380 = 12 X 365
Gregorian calendar: 12 Months
Gregorian calendar: 365 Days

Verse 41:53 entered into the Gregorian calendar gave the nos. 19 & 211 in three different cases.

The total of all the prime nos. from 19 to 211 leading us to the exact no. of months, 12 and days, 365 in the Gregorian calendar is quite an awesome evidence of the profound relationship between the prophecy in verse 41:53 and this calendar.

If you write all the prime nos. from 19 to 211 successively, you get a 102-digit no. which is a double multiple of 19.

19 23 29 31 37 41 43 47 53 59 61 67 71 73 79 83 89 97 101 103 107 109 113 127 131 137 139  
149 151 157 163 167 173 179 181 191 193 197 199 211 = 19 X 19 X 53276818.....886972851

Isn't these marvelous? Do we need any more proof that the Qur'an had been authored with the foreknowledge of the Gregorian calendar? Do we need any more evidence that this scripture is from a Superior Power and couldn't have been from any mortal?

In this book of mine, I have presented powerful and overwhelming evidences, too many to be called coincidences. What more do we need, to see God before we believe? By that time, it would have been too late.

The relationship between the Qur'an and the Gregorian calendar was put in place by the Author in order to demonstrate to the unbelievers His perfect foreknowledge of future events and His omniscient nature which no mortal but a supernatural being could have possessed, as a way of proving the divine origin of the Qur'an.

Despite the clarity of all the signs from this calendar witnessed in this book and those presented in my other books, there are people who will not use their reasoning, vision and hearing to reflect on these signs in order to arrive at the truth that this is God's prophecy (verse 41:53) being fulfilled.

### **The Words of Verse 41:53**

When we look at the message of verse 41:53 right from the beginning of this verse till the point where the word "themselves" is mentioned, we witness more proofs with regards to this verse and the calendar.

This means we are going to be looking into the portion of verse 41:53 which talks about God's promise to show His signs in the unbelievers themselves. This portion which is shown below consists of 6 Arabic words out of the total of 19 words in the verse.

*"We will show them our signs in the horizons and in themselves..."*  
*– Qur'an 41:53*

The table below shows the 6 Arabic words, their English translations, the NV of each of the Arabic words, and the cumulative sum of the NV.

S/N	Verse 41:53 Arabic Words	English Translation	NV of Arabic Words	Cum. Sum of NV
1	Sanurihim	We Will Show Them	<b>365</b>	<b>365</b>
2	Ayatina	Our Signs	463	828
3	Fi	In	90	918
4	Lafaqi	The Horizons	214	1132
5	Wafi	And In	96	1228
6	Anfusihi	Themselves	236	<b>1464</b>
<b>Total</b>			<b>1464</b>	

Table 6.0

As seen on the table, the NV of the first Arabic word is 365, the no. of days in a common year of the Gregorian calendar is 365.

The NV of the six Arabic words is 1464, this no. is the product of 366 & 4, the no. of days in a leap year of the calendar is 366 and the no. of years it mostly takes for it to occur is 4.

Leap years which consists of 366 days mostly takes 4 years to occur and it only occurs in years that are divisible by 4.

In the Gregorian calendar, three criteria must be taken into account to identify leap years. The first criteria is that the year can be evenly divided by the no. 4, like the years 1988, 1992, 1996 etc. The other two criteria only affects century years like 1700, 1800, 1900, 2000 etc.

*“We will show them our signs in the horizons and in themselves...”*

– *Qur'an 41:53*

NV of the first Arabic word: **365**

Gregorian calendar: No. of days in a common year = **365**

NV of the six Arabic words: 1464 or **366 X 4**

Gregorian calendar: No. of days in a leap year = **366**

No. of years it mostly occurs = **4**

The six words on table 6.0 is the portion of verse 41:53 where God promised to show His signs in the horizons and in the unbelievers.

The NV of these words laid bare more evidence that the Gregorian calendar which originated and belong to those who don't believe in the Qur'an is God's signs within the unbelievers.

While the NV of the first word in verse 41:53 gave us the no. of days in a common year of the calendar, the NV of the six words tells us the no. of days in a leap year of this calendar as well as the no. of years it mostly takes for this to occur.

The Qur'an has been mathematically composed to mostly reflect the 365 days in a common year of the calendar, the scripture also acknowledges the fact that this calendar has 366 days nearly every 4 years.

I must note here that the fulfillment of the prophecy in verse 41:53 is not limited to the Gregorian calendar. God out of His infinite mercies, may choose to show the unbelievers other signs in them individually or collectively, but the aforementioned calendar most assuredly plays a major role in this prophecy and its fulfillment.

Like the miraculous code, 19 in verse 74:30 which is one of the greatest signs of God in the Qur'an, the Date of Confirmations, Monday 14/06/1976 (derived from the code 19 and verse 74:30) is one of the greatest signs of God on the Gregorian calendar.

I discovered the significant role of this date while researching the Qur'an in 2009. Over the years, this is one date that has produced overwhelming and incredible proofs regarding the Qur'an and the true God, some of which you find in this book and some I have recorded in other books.

The functions (significance) of the Date of Confirmations are not any different from the functions of the miraculous code, 19 which are prophetically explained in verse 74:31 as listed below.

1) As a trial for the unbelievers, 2) to convince the Jews and Christians that the Qur'an is the truth, 3) to strengthen the faith of the believers, 4) to remove all traces of doubt from the Jews, Christians and the believers, 5) and that those sick at heart and the unbelievers may say: what does God mean by this example/similitude.

Ever since its discovery, the Date of Confirmations has continued to fulfil the prophesied functions of the no. 19 as stated in the Qur'an.

### **THE QUR'AN/GREGORIAN INTERSECTIONS**

In March 2019 by God's leave, I calculated the NV of each date on the Gregorian calendar with the aim of finding out the dates that their NV are equivalent to the no. of verses in the chapters of the Qur'an.

This is another case where the Qur'an is being entered into the Gregorian calendar. Out of the 365 dates (in a common year) or 366 dates (in a leap year) of this calendar, a total of 50 dates were found to be in line with the aim of the research.

The table below showing the 50 dates of the calendar whose NV equals to the no. of verses in chapters of the Qur'an is named the "Qur'an/Gregorian table IV", as a continuation of the previous ones that I discovered some years back.

The table shows the NV of the dates which represents the no. of verses and their corresponding chapter nos. As an example, the NV of the date, Eleven December (11/12) is 118, this NV represents the no. of verses in chapter 23.

Date S/N	Date (Day & Month)	No. of Verses / NV	Chapter Nos.
1	Nineteen January (19/1)	176	4
2	Ten February (10/2)	135	20
3	Fourteen February (14/2)	200	3
4	Nineteen February (19/2)	182	37
5	One March (1/3)	77	25
6	Three March (3/3)	99	15
7	Five March (5/3)	85	40
8	Nine March (9/3)	85	40
9	Twenty-Three March (23/3)	206	7
10	Three April (3/4)	112	21
11	Five April (5/4)	98	19
12	Nine April (9/4)	98	19
13	Seventeen April (17/4)	165	6
14	One May (1/5)	73	33
15	Four May (4/5)	99	15
16	Eight May (8/5)	88	28
		88	38
17	Ten May (10/5)	78	22
		78	55
18	Sixteen May (16/5)	135	20
19	Eighteen May (18/5)	112	21
20	Twenty-Four May (24/5)	206	7
21	Four June (4/6)	110	18
22	Eight June (8/6)	99	15

23	Ten June (10/6)	89	43
24	Eighteen June (18/6)	123	11
25	Twenty-Eight June (28/6)	206	7
26	Four July (4/7)	128	16
27	Five July (5/7)	110	18
28	Six July (6/7)	120	5
29	Nine July (9/7)	110	18
30	Twenty-Six July (26/7)	227	26 (God)
31	One August (1/8)	123	11
32	Ten August (10/8)	128	16
33	Twelve August (12/8)	176	4
34	Eighteen September (18/9)	176	4
35	One October (1/10)	112	21
36	Five October (5/10)	120	5
37	Eight October (8/10)	127	9
38	Nine October (9/10)	120	5
39	Twelve October (12/10)	165	6
40	Fourteen October (14/10)	182	37
41	Twenty-Five October (25/10)	227	26 (God)
42	Twenty-Nine October (29/10)	227	26 (God)
43	One November (1/11)	128	16
44	One December (1/12)	89	43
45	Three December (3/12)	111	12
		111	17
46	Seven December (7/12)	120	5
47	Eleven December (11/12)	118	23
48	Fifteen December (15/12)	120	5
49	Eighteen December (18/12)	128	16
50	Twenty-Seven December (27/12)	227	26 (God)
<b>Total</b>		<b>7032</b>	<b>1005</b>

The Qur'an/Gregorian table IV

The table above shows the 50 dates where the Qur'an intersects with the Gregorian calendar. The beginning and the end of the table or dates are marked by the miraculous code 19. This is the first sign I noticed from the table.

The First date, Nineteen January (19/1) is the day no. 19 of the year. This is the first day no. of the year that is a multiple of 19.

The Last date, Twenty-Seven December (27/12) is the day no. 361 of the year, 361 is 19 X 19. Similarly, this is the last day no. of the year that is a multiple of 19.

Qur'an/Gregorian Intersections

First Date (19/1): Day of year = **19**

Last Date (27/12): Day of year = **19 X 19**

We know that the code 19 plays a very important role in the structure of the Qur'an. This no. is also a tremendous sign for the Gregorian calendar whose NV (152) is a multiple of 19, and also in astronomy.

The sun, moon and earth realign in the same relative position once every 19 years. That means, this occurs when the earth has revolved around the sun exactly 19 times. This is a fact in astronomy. The Gregorian calendar which is a solar calendar is based on the revolution of the earth around the sun.

On the table, the total of the no. of verses (NV of dates) is 7032 and the total of the corresponding chapter nos. is 1005. The sum of these totals is 8037, this no. is a multiple of 19.

$$8037 = 19 \times 423$$

As seen on the table, a total of 50 different dates of the calendar gave the no. of verses in some chapters of the Qur'an. The no. of different chapters of the Qur'an found on the table is 26 (God) and the last chapter on the table is the chapter 26 (God).

Qur'an/Gregorian Intersections

No. of different chapters on the table = **26** (God)

The last chapter no. on the table = **26** (God)

This double signal from the no. 26 which is the NV of God, points up the word God with regards to these chapters on the table. Hence, I picked out the 26 chapters and checked for the occurrence of God.

The table below shows the 26 different chapters on the Qur'an/Gregorian table IV above and the no. of verses with the occurrence of God in each of the chapters.

Chapter S/N	Chapter Nos.	No. of Verses With God
1	3	131
2	4	135

3	5	88
4	6	65
5	7	45
6	9	100
7	11	33
8	12	34
9	15	2
10	16	64
11	17	10
12	18	14
13	19	8
14	20	6
15	21	5
16	22	50
17	23	12
18	25	6
19	26 (God)	13
20	28	21
21	33	51
22	37	15
23	38	2
24	40	37
25	43	3
26 (God)	55	0
Total		950

The Qur'an/Gregorian table IV (a)

On the table above, the total no. of verses with the occurrence of God in the 26 different chapters is 950. This no. is a multiple of 19, the coefficient is 50.

$$950 = 19 \times 50$$

The no. 19 we know is the miraculous code of the Qur'an and the coefficient, 50 is the no. of dates of the calendar that produced the 26 chapters of the Qur'an found on the table.

No. of Different Chapters: 26 (God)

No. of verses where God occurs in the 26 chapters:  $950 = 19 \times 50$

The miraculous code of the Qur'an = 19

No. of dates that produced the 26 chapters of the Qur'an = 50

The miraculous code, 19 and the coefficient, 50 also points us to the chapter no. 26 – its position amongst the 26 different chapters and where this chapter is last found on the table.

On the Qur'an/Gregorian table IV (a) above, chapter 26 is the no. 19 amongst the different chapters (S/N), and this chapter last occurred at the no. 50 date (S/N) on the Qur'an/Gregorian table IV, the parent table.

In other words, chapter 26 which is the 19<sup>th</sup> chapters last occurred at the 50<sup>th</sup> date, the last date on the Qur'an/Gregorian table IV.

<p><u>Chapter No:</u> 26 (God)</p> <p>No. of verses where God occurs in the 26 chapters: <math>950 = 19 \times 50</math></p> <p><u>Chapter S/N:</u> Chapter 26 occurred at no. 19</p> <p><u>Date S/N:</u> Chapter 26 last occurred at no. 50</p>
--

The total no. of verses with the occurrence of God, 950 is also the product of the no. of English letters in the last date and the date no.

The last date, Twenty-Seven December (27/12) is composed of 19 English letters, it is the date no. 50 and the date where chapter 26 last occurred. This is the only date on the table that has 19 letters and it has the highest no. of letters.

$$950 = 19 \text{ (No. of letters)} \times 50 \text{ (Date no.)}$$

The NV of the 19-letter date is the no. of verses in chapter 26 i.e. 227. This verse 227 is composed of 19 Arabic words and it is very important to note that this verse comprises of the word God.

The NV of the first date on the table is the no. of verses in chapter 4 i.e. 176. Interestingly, this verse 176 is composed of 50 Arabic words and similarly comprises of the word God.

Thus, the total, 950 is the product of the no. of Arabic words in the verse at the first and last date.

The total, 950 is a no. also connected with the Qur'an's revelation and the starting of the calendar.

The revelation of the Qur'an ended in year 632 CE and the Gregorian calendar started in the year 1582 CE. This calendar, destined by God to serve as one of the greatest proofs of the Qur'an thus started 950 years after the Qur'an's revelation.

$$950 \text{ years} = 19 \times 50$$

The double signals which drew attention to God, Almighty on the Qur'an/Gregorian table IV came from the no. of different chapters, 26 and the last chapter no. on the table which is also 26 – the NV of God. These prompted me to check for the word God in the 26 chapters.

It is interesting that the no. 19 & 50 gotten from the count of verses where God occurred in the 26 chapters tells us about these 26 chapters as well as the chapter 26, which are the two signals that led to the count of the word God.

From all the foregoing, it is crystal clear that the signs on the Qur'an/Gregorian table IV are all about God. This is a table meant to showcase to us the true God of the universe and His final scripture to mankind (the Qur'an).

The above claim about the relationship between the aforementioned table and God, the Author of the Qur'an can be further verified or investigated using the TUSC calculations alongside the Date of Confirmations.

On the table, the chapter no. 26 (God) occurred four times (i.e. in four dates). If you perform the TUSC calculations on the day nos. of the year for the four dates, you find that the no. 26 (God) occurs in the time unit of only one of the dates, i.e. Twenty-Nine October (29/10).

Twenty-Nine October (29/10): Day no. 302

No. of days = 302  
No. of hours = 7,248  
No. of minutes = 434,880  
No. of seconds = 26,092,800  
No. of weeks = 43

Adding the group of digits,

$$302 + 7 + 248 + 434 + 880 + 092 + 800 + 43 = 2806$$

Total: 2806

Omitted no.: 26

Reason: The NV of God is 26

The no. 26 which occurred at the no. of seconds is the NV of God and for this reason, it was not added to the other nos. The total of the other nos. is 2806.

Now, let's enter the total, 2806 as no. of days into the Gregorian calendar, we calculate a future date counting from the Date of Confirmations.

By adding 2806 days to the date, Monday, 14 June 1976 (14/06/1976 CE), the date we get is Sunday, 19 February 1984 (19/02/1984 CE).

Date of Confirmations & 2806 Days

Sunday, **19** February, 1984 CE:

Day no. of the month = **19**

Day no. of the year = **50**

The date, 29/10 is one of the four dates whose NV is the no. of verses in chapter 26 (God) and like I said, this is the only date that you find the no. 26 (God) in the time units amongst the four.

This date had been specially hinted by the total of the no. of verses (NV of dates) and chapter nos. on the Qur'an/Gregorian table IV, 8037. This total, 8037 is  $19 \times 423$ .

The code, 19 refers to the chapter's position, i.e. chapter 26 (God) is the no. 19 amongst the different chapters. The coefficient, 423 which gives the nos. 42 & 3 refers to the date's position, i.e. 29/10 is the date no. 42 and is the no. 3 date that produced chapter 26 (God) on the table.

Performing the TUSC calculations on this date gave the total, 2806 with the omission of the no. 26 (God). The 2806<sup>th</sup> day after the Date of Confirmations falls on the day no. 19 of the month and the day no. 50 of the year as seen above.

Below is a quick reminder of what the day no. of the month and year, 19 & 50 symbolizes with regards to the omitted no. 26 on the Qur'an/Gregorian table IV & IV (a).

- ✖ The total no. of verses with the occurrence of God in the 26 different chapters is the product of the nos. 19 & 50.
- ✖ Chapter 26 is the no. 19 different chapter and this chapter last occurred at the date no. 50.
- ✖ The last date on the table is composed of 19 English letters, it is the date no. 50 and the NV of this date is the no. of verses in chapter 26.

Calculating the NV of all the dates in a year of the calendar and then picking out the 50 dates with NV equivalent to the no. of verses in chapters of the Qur'an required a lot of work and time but at the end it turned out to be worth it.

The outcome of this research turned out to be another magnificent display of the absolute control and knowledge of all things by the Author of the Qur'an. It also provided us with more incontrovertible proofs about who the true God is, as well as the divine origin of the Qur'an.

The no. of different chapters given by the Gregorian calendar, 26 and the last chapter no., 26 stands for the word God and the results from the count of God in these chapters of the Qur'an as well as the TUSC calculations confirmed this.

The count of God in the Qur'an proved that the word God indicated by this calendar (via the Qur'an/Gregorian table IV) is the same God talked about in the Qur'an, the Author of this scripture and the Creator of everything that exists.

The numerical miracles we have witnessed in this section and in this book at large are all due to the amazing and harmonious relationship between the Qur'an and the Gregorian calendar, a fulfillment of God's promise in verse 41:53.

It is very important to note that as at the time of the revelation of the Qur'an, the English alphabet wasn't the no. of letters it is today. Various letters have been added, replaced or removed to give the current modern English alphabet of 26 letters.

The outcome of this research which involved calculating the NV of all the 365 dates in English alphabet proves that an Omniscient Being who definitely knew beforehand all these calculations I have done and who also knew beforehand the changes that will be done to the English alphabet authored the Qur'an.

The current modern English alphabet consisting of 26 letters started in the 16<sup>th</sup> century which is hundreds of years after the revelation of the Qur'an and the death of Prophet Muhammad.

If Muhammad authored the Qur'an as the unbelievers claim, I ask, could he have known beforehand the modern English alphabet and therefore calculated in English the NV of 365 dates so as to code the Qur'an accordingly, as a proof of its authenticity?

How was he so certain that someday this discovery/research would be made by someone (me)? Could Muhammad be able to author the Qur'an based on the dates and the name of a calendar commissioned 950 years after his death?

Do not forget that the Qur'an was revealed in Arabic alphabet and not English. Muhammad could never have thought of mathematically coding the Qur'an with a language completely different from his own and that of his entire region.

The Qur'an is the ultimate wonder of the world, it is the greatest miracle ever and the greatest miracle it will forever remain. This glorious scripture could only be the work of the Most High God.

## THE INCONVERTIBLE PROOFS

When the Gregorian calendar was commissioned in the year 1582 CE, very few countries adopted it as their calendar but as time went by, more and more countries accepted it and today it is the most widely used calendar in the world.

The month's names, the no. of days in each month and the order in which they were arranged on the calendar were entirely the handwork of man. To man he was just doing his thing, little did he know he was only carrying out the will, order and plan of God.

The origin and the basis of the mathematical proofs presented in this second part of the book are the 3 distinct no. of days in the 12 months of the Gregorian calendar, i.e. 31, 30 & 28 days. The common year of the calendar has 365 days which is divided into 12 irregular months of either 31, 30 or 28 days each.

The 31, 30 & 28-day months have been divinely influenced to be put in the appropriate places on the calendar and in the right no. of occurrences, i.e. 7, 4 & 1 respectively, in order to allow for the outstanding discoveries that you are about to witness.

If February had been a 30 or 31-day month like the others or if any other month from May to December had been the 28-day month instead of February, the results would have been completely different and this second part and perhaps the whole of this book would never have existed.

The Gregorian calendar is a perfect example of how God influences man to carry out His will and plans unknowingly. A lot of reforms and modifications were done to various calendars before it finally became what we have today as Gregorian calendar.

February was originally the last month of the year in the old Roman calendar. It had 23 or 24 days at certain intervals. Today, it is the second month and the only month with less than 30 days.

Table 1.0 below shows the no. of months of the Gregorian calendar which has 31, 30 & 28 days respectively. Please do note that the numbering of tables in this second part of the book starts afresh, i.e. from table 1.0.

S/N	No. of Days	No. of Occurrences	No. of Days X Occurrences
1	31	7	217
2	30	4	120
3	28	1	28
<b>Total</b>	<b>89 Days</b>	<b>12 Months</b>	<b>365 Days</b>

Table 1.0

As seen on Table 1.0,

No. of months with 31 days = 7  
 No. of months with 30 days = 4  
 No. of months with 28 days = 1

Therefore,

31 days X 7 = 217 days  
 30 days X 4 = 120 days  
 28 days X 1 = 28 days

As seen on the table, the total no. of days in the 12 months is 365, while the total of the 3 distinct no. of days in the 12 months is 89. Do take note of these two totals.

<u>Table 1.0</u>	
217 + 120 + 28 = <b>365</b> Days	
31 + 30 + 28 = <b>89</b> Days	

### God On Gregorian Calendar I

Table 2.0a shows the 12 months of the calendar, the no. of days in each month, the no. of occurrences of the no. of days and the cumulative sum. For example, the month of May has 31 days, the no. of occurrence of 31 days is 7 and the cumulative sum at this month is 26.

S/N	Months	No. of Days	No. of Occurrences	Cum. Sum of No. of Occurrences	<u>Table 1.0</u> <b>365</b> Days
1	January	31	7	7	
2	February	28	1	8	
3	March	31	7	15	
4	April	30	4	19	
5	May	31	7	<b>26</b> (God)	
6	June	30	4	30	
7	July	31	7	37	
8	August	31	7	44	
9	September	30	4	48	
10	October	31	7	55	
11	November	30	4	59	
12	December	<b>31</b>	7	<b>66</b> (Allah)	
Total No. of Occurrences			<b>66</b> (Allah)		
Total No. of Months			<b>12</b> Months		

Table 2.0a

On the table, the total no. of occurrences for the 12 months is 66, the NV of Allah (Arabic).

$$\text{Total no. of occurrences} = 66 \text{ (Allah)}$$

While the NV of Allah (Arabic) is 66, the total no. of occurrences, the sum of digits of the NV of Allah (Arabic) is 12, which is the total no. of months.

$$\text{Allah: } 1 + 30 + 30 + 5 = 66$$

$$\text{Allah: } 1 + 3+0 + 3+0 + 5 = 12$$

On table 2.0a, as you add up the no. of occurrences for the 12 months, you find that the cumulative no. of occurrence at May is 26, the NV of God, while the cumulative no. of occurrence at December is 66, the NV of Allah (Arabic).

Cumulative No. of Occurrence

@ May = **26** (God)

@ December = **66** (Allah)

The addition of the cumulative no. of occurrences from the no. 26 (God) till 66 (Allah), gives back the no. 365, the total no. of days in the 12 months.

This profound evidence is a proof of the connection between the two nos. 26 & 66 on the table, and hence the connection between God and Allah.

$$217 + 120 + 28 = \mathbf{365} \text{ Days}$$

$$\text{(God) } \mathbf{26} + 30 + 37 + 44 + 48 + 55 + 59 + \mathbf{66} \text{ (Allah)} = \mathbf{365} \text{ Days}$$

The interpretation to this phenomenon is nothing but the fact that Allah is God, the Supernatural Creator of everything that exists.

You may not quite agree with me on this now, but as we proceed, you will be finding out whether what you have just witnessed happened by chance or as planned by the Almighty God.

The link between the Gregorian calendar and these cumulative no. of occurrences whose total is the no. of days, 365 is verified and confirmed by the miraculous code 19 when you enter these nos. into the Gregorian calendar.

The table below shows the nos. added one after the other with the cumulative sum of the nos. representing day nos. of the year on the calendar and the corresponding day and month nos.

Nos.	Cum. Sum/ Day Nos. of The Year	Day Nos.	Month Nos.
<b>26</b> (God)	26	26	1
30	56	25	2
37	93	3	4
44	137	17	5
48	185	4	7
55	240	28	8
59	299	26	10
<b>66</b> (Allah)	365	31	12
	<b>Total</b>	<b>160</b>	<b>49</b>

The total of the corresponding day and month nos. on the table is 160 & 49 respectively, the sum of the two is 209, a multiple of 19.

$$160 + 49 = 209 \text{ or } 19 \times 11$$

## God On Gregorian Calendar II

This section resulted from the outcome of table 2.0a. It involves a total of 8 months, starting from the month where the cumulative is 26 (God) to 66 (Allah), i.e. from the month of May to December on table 2.0a.

Out of these 8 months, the no. of months with 31 days is 5 and no. of months with 30 days is 3.

Table 2.0b shows these 8 months of the calendar, the no. of days in each month, the no. of occurrences of the no. of days and the cumulative sum.

For example, the month of October has 31 days, the no. of occurrence of 31 days is 5 and the cumulative sum at this month is 26.

S/N	Months	No. of Days	No. of Occurrences	Cum. Sum of No. of Occurrences
5	May	31	5	5
6	June	30	3	8
7	July	31	5	13
8	August	31	5	18
9	September	30	3	21

10	October	31	5	26 (God)	Table 1.0 89 Days
11	November	30	3	29	
12	December	31	5	34 (Allah)	
Total No. of Occurrences			34 (Allah)		
Total No. of Months			8 Months		

Table 2.0b

Table 2.0b above follows the same procedures as the table 2.0a in the previous section, the total no. of occurrences on table 2.0b similarly gives the word Allah.

The total no. of occurrences for the 8 months on the table is 34, this is the NV of Allah (English).

Total no. of occurrences = 34 (Allah)

As we add up the no. of occurrences on table 2.0b, we find that the no. 26 again occurs among the cumulative sum just as we found on table 2.0a.

The cumulative no. of occurrence at October is 26, the NV of God, while the cumulative no. of occurrence at December is 34, the NV of Allah (English).

<u>Cumulative No. of Occurrences</u>
@ October = 26 (God)
@ December = 34 (Allah)

The addition of the cumulative no. of occurrences from the no. 26 (God) till 34 (Allah), gives back the no. 89, the total of the 3 distinct no. of days in the 12 months of the calendar.

This profound evidence establishes the connection between the two nos. 26 & 34, thus the connection between God and Allah is yet again confirmed. The meaning of these mathematical signs that we have found on the two tables is incontestable at this point.

$$31 + 30 + 28 = 89 \text{ Days}$$

$$(God) 26 + 29 + 34 (Allah) = 89 \text{ Days}$$

Table 2.0b shows that the occurrence of the words, God and Allah on table 2.0a did not happen by coincidence. It was planned by the Almighty to pass unto mankind, especially the unbelievers an important message about the true God (Allah).

### God On Gregorian Calendar I & II

Comparing the results of table 2.0a & 2.0b,

- On Table 2.0a, God and Allah occurred on the month of May and December respectively.
- On table 2.0b, God and Allah occurred on the month of October and December respectively.
- On table 2.0a, the connection between God and Allah is confirmed by the total no. of days in the 12 months of the calendar, i.e. 365 (table 1.0).
- On table 2.0b, the connection between God and Allah is confirmed by the total of the 3 distinct no. of days in the 12 months, i.e. 89 (table 1.0).

The nos. 365 & 89 are proofs of the words, God/Allah on the two tables. This is quite remarkable, considering the fact that the origin and the basis of these mathematical signs on the two tables is the 365 days of the calendar and its 3 distinct no. of days in the months which adds up to 89 days.

<u>Table 2.0a &amp; 2.0b</u>	<u>Table 1.0</u>
@ May: 26 (God)	} 365 Days
@ December: 66 (Allah)	
@ October: 26 (God)	} 89 Days
@ December: 34 (Allah)	

Table 2.0a & 2.0b clearly demonstrates the relationship between God and Allah, the interpretation of which is not hard to figure out by any open-minded person. Allah is God – the Almighty Creator of heaven and earth. This is the ultimate message coming from the Gregorian calendar.

The Gregorian calendar attesting to the deity of Allah (God) is a profound sign for those of us who can reflect. This is a Qur'anic prophecy being fulfilled. God's promises never fail.

It may interest you to know that the NV of Allah (God) in English and Arabic, 34 & 66 are same as the NV of One and Only respectively.

Only Allah, One Allah

$$\text{Only} = 15 + 14 + 12 + 25 = \mathbf{66} \text{ (Allah)}$$

$$\text{One} = 15 + 14 + 5 = \mathbf{34} \text{ (Allah)}$$

*Only One Allah*

People worship many gods, but the holy Qur'an teaches that there is Only One true Allah (God) – the God of Noah, the God of Abraham, Solomon, David, Jesus and Muhammad. He is unique, supreme and eternal, the Creator and Sustainer of all that exists, and the Only One deserving of all our worship.

The Muslims, some Christians, Jews and others refer to God by the same word, Allah. This is because the word "Allah" simply means "God". However, it is certainly true that Muslims, Christians and Jews all have different concepts of Almighty God.

For example, the Bible and the Qur'an offer conflicting descriptions of God. For Christians, Jesus is God, but for Muslims, Jesus is certainly not God. If Christians worship Jesus as God while Muslims condemn to Hell any who worship him, then the two groups cannot worship the same deity.

In a nut shell, people from different religions may refer to whom they worship as Allah, yet they are not talking about the same deity. Therefore, there is a problem to be solved. Who is that Allah/God indicated and confirmed by the Gregorian calendar?

Since Allah is a word mostly synonymous with the Qur'an and Muslims, let's visit the Qur'an along with the results on the tables.

**God In The Qur'an I**

Upon the inspection of the Qur'an, we discover that the word God in the Qur'an has been structured or arranged in a manner reflecting the results on table 2.0a & 2.0b.

On the tables, we found the nos. 26, 34 & 66 among the cumulative no. of occurrences and since the three nos. symbolizes God/Allah, it would be logical that what we look out for in the Qur'an should involve these nos. (26, 34 & 66) and the word God (Allah).

If we take the count of the occurrences of God in the Qur'an from the chapter 26 to 66 and then from the chapter 34 to 66 we discover amazing proofs confirming that these nos. that we found on the two tables, as a matter of fact, refers to the word God.

**Chapter 26 & 66**

The total no. of verses with the occurrence of God from the beginning of chapter 26 till the end of chapter 66, i.e. the verse no. 12 is 589. The total, 589 is a multiple of 19 and the coefficient is 31.

$$589 = 19 \times 31$$

Therefore, in the Qur'an, as we count the no. of verses where God occurs from chapter 26 to 66, we find that the last verse no. in the chapter is 12 and the coefficient from the count is 31.

The nos. 26 & 66 are cumulative no. of occurrences both found on table 2.0a, the last month no. on the table is 12 and the no. of days in the month is 31.

<u>God On Gregorian Calendar (I)</u>	<u>God In The Qur'an (I)</u>
Cum. no. of occurrence @ May = <b>26</b>	Chapter no. where count started = <b>26</b>
Cum. no. of occurrence @ Dec. = <b>66</b>	Chapter no. where count ended = <b>66</b>
The last month no. on the table = <b>12</b>	The last verse no. in the chapter = <b>12</b>
The no. of days in the month = <b>31</b>	The coefficient from the count = <b>31</b>

Thus, the chapter nos. 26 & 66 are the cumulative no. of occurrences on table 2.0a. The last verse no. 12 represents the last month no. on the table and the coefficient, 31 is the no. of days in the month.

### Chapter 34 & 66

The total no. of occurrences of God from the beginning of chapter 34 till the end of chapter 66, i.e. the verse no. 12 is also 589. As we already know, the total, 589 is a multiple of 19 and the coefficient is 31.

$$589 = 19 \times 31$$

This total is the no. of times the word God occurs from chapter 34 to 66, the last verse no. in the chapter is 12 and the coefficient from the count is similarly 31.

The nos. 34 & 66 are cumulative or total no. of occurrences on table 2.0b & 2.0a respectively, the last month no. on the tables is 12 and the no. of days in the month is 31.

<u>God On Gregorian Calendar (I &amp; II)</u>	<u>God In The Qur'an (I)</u>
Cum. no. of occurrence @ Dec. = <b>34</b>	Chapter no. where count started = <b>34</b>
Cum. no. of occurrence @ Dec. = <b>66</b>	Chapter no. where count ended = <b>66</b>
The last month no. on the table = <b>12</b>	The last verse no. in the chapter = <b>12</b>
The no. of days in the month = <b>31</b>	The coefficient from the count = <b>31</b>

### No. of Days And Coefficient

On table 2.0a & 2.0b, you notice that the nos. or NV 26 (God), 66 (Allah), 26 (God) & 34 (Allah) all occurred on the months which has 31 days each.

Calendar	Nos.	Months	No. of Days
Table 2.0a	26 (God)	May	31
	66 (Allah)	December	31
Table 2.0b	26 (God)	October	31
	34 (Allah)	December	31

On the calendar, the word God/Allah which occurred four times are all marked by the no. of days, 31 as seen on the table above. In the Qur'an, we find a similar thing. The word God (Allah) counting from chapter 26 (God) to 66 (Allah) and from chapter 34 (Allah) to 66 (Allah) are both marked by the coefficient, 31.

This phenomenon alone suffices as irrefutable proof that the NV 26, 34 & 66 found on the tables definitely stands for the word God/Allah.

The no. of days/coefficient, 31 establishes the connection of these NV on the tables with the word God and with the God in the Qur'an. It is also a profound evidence of the link between these tables and the Qur'an.

Qur'an	Chapter Nos.	Total No. of Verses God Is Mentioned
From	26 (God)	589 = 19 X 31
To	66 (Allah)	

Qur'an	Chapter Nos.	Total No. of Times God Is Mentioned
From	34 (Allah)	589 = 19 X 31
To	66 (Allah)	

The months in which the word God/Allah occurred on table 2.0a & 2.0b have been divinely selected to make more certain the relationship that these two tables have with God and the Qur'an.

The table below shows the nos. representing God/Allah on the tables, the months in which they occurred, the no. of letters in the months' names, the NV of months' names and the sum of digits of NV.

For example, the month, December has 8 letters, the NV of the 8 letters (December) is 55 and the sum of digits of NV is 10 (5 + 5).

Calendar	Nos.	Months' Names	No. of Letters	NV	Sum of Digits NV
Table 2.0a	26 (God)	May	3	39	12
	66 (Allah)	December	8	55	10
Table 2.0b	26 (God)	October	7	78	15
	34 (Allah)	December	8	55	10
<b>Total</b>			26 (God)	227	47

On the table, the total no. of letters in the months' names is 26, the total NV of the months' names is 227, and the total of the sum of digits of the NV is 47.

These totals, 26, 227 & 47 are all connected with one chapter of the Qur'an. This is the chapter whose no. is the NV of God. Chapter 26 (God) has 227 verses, and the chronological (revelation) no. of this chapter is 47.

Do note that ONLY the chapter 26 has 227 verses in the Qur'an.

Total of letters = 26 (Chapter no.)  
Total of NV = 227 (No. of verses)  
Total S. of digits = 47 (Chron. No.)

The total of letters of the months' names where you find the NV of God/Allah gave back the no. 26, the NV of God. The total NV of these months and their sum of digits gave the no. of verses and the chronological no. of the chapter no. 26 of the Qur'an.

From our findings in the Qur'an, it is already evident that the God indicated by the two tables is the Author of the Qur'an, the same God who revealed previous scriptures to the Prophets that came before Muhammad.

What we have seen so far is just the beginning. As we look further, we find that God Almighty has deposited in the Qur'an more evidences that could destroy any remaining doubts in our hearts and bring us to certainty.

As one proceeds in this book, one will have no choice than to come to terms with the fact that the Qur'an has deliberately been arranged in a form that is in harmony with the tables 2.0a & 2.0b from the Gregorian calendar.

## **God In The Qur'an II**

This section like the previous one deals with the table 2.0a & 2.0b and the occurrence of God in the Qur'an. An intriguing relationship between the results of these two tables and the word God is found in the verse numbering of the Qur'an.

If you count the no. of times the verse no. 66 occurs in the Qur'an, the no. you get is 34. In other words, there are 34 chapters in the Qur'an where the verse no. 66 occurs, this is the same thing as saying there are 34 verses that are numbered 66 in the Qur'an.

Since the nos. 34 & 66 are the NV of Allah (God), it would be logical that what we look out for in the 34 verses numbered 66 should be the word Allah (God).

The table below shows the list of these verses and their no. of occurrences of God.

S/N of Verses	Chapter Nos.	Verse Nos.	S/N of Occurrences of God
1	2	66	
2	3	66	1
3	4	66	
4	5	66	
5	6	66	
6	7	66	
7	8	66	2
	8	66	3
	8	66	4
8	9	66	
9	10	66	5
	10	66	6
10	11	66	
11	12	66	7
	12	66	8
12	15	66	
13	16	66	
14	17	66	
15	18	66	
16	19	66	
17	20	66	
18	21	66	9
19	22	66	
20	23	66	
21	25	66	
22	26	66	
23	27	66	
24	28	66	
25	29	66	
26	33	66	10
27	36	66	
28	37	66	
29	38	66	

30	39	66	11
<b>31</b>	40	66	<b>12</b>
32	43	66	
33	55	66	
<b>34 (Allah)</b>	56	<b>66 (Allah)</b>	

Table 3.0

From the table above, the total no. of times God occurs in the verse no. 66 of the 34 verses is 12 and the last verse where the word occurs is the 31<sup>st</sup> verse (S/N) on the table.

This is clearly a reflection of the results on table 2.0a & 2.0b where the cumulative or total no. of occurrences is 66 & 34 respectively, the last month no. is 12 and its no. of days, 31.

<u>God On Gregorian Calendar (I &amp; II)</u>	<u>God In The Qur'an (II)</u>
Table 2.0a: Total no. of occurrences = <b>66</b>	The verse no. of the Qur'an = <b>66</b>
Table 2.0b: Total no. of occurrences = <b>34</b>	No. of verses with this verse no. = <b>34</b>
The last month no. on the table = <b>12</b>	No. of times <i>God</i> occurs in verse no. = <b>12</b>
The no. of days in the month = <b>31</b>	S/N of last verse where <i>God</i> occurs = <b>31</b>

Let's take a look at the 31<sup>st</sup> verse where God occurred the 12<sup>th</sup> (last) time in the 34 verses of the Qur'an numbered 66. This is the verse 40:66 as we can see on the table. This verse comes with an important message that is worth sharing here.

*Say: "I have been forbidden to worship those whom you worship besides God, since there have come to me clear proofs/signs from my Lord, and I am commanded to submit to the Lord of the worlds".*

– *Qur'an 40:66*

The **31<sup>st</sup>** verse where God occurred the **12<sup>th</sup>** (last) time in the **34** verses numbered **66**

Verse 40:66 is a warning against ascribing partners to God. In this verse, God forbids the believers from worshipping those whom the unbelievers worship besides Him. The clear proofs that He's the only one worthy of worship has come to us from Him and we don't have any excuse.

- The clear proof that has come to us is the Qur'an.
- The clear proof is the Gregorian calendar.
- The clear proof is table 2.0a & 2.0b.
- The clear proof is the table 3.0.

Now, the choice is yours whether to turn to the God of all creation in worship and submission or continue to call upon other gods besides Him. God's warning should not be taken lightly as He will not forgive setting up partners in worship with him (if maintained till death).

Table 3.0 comes with incontrovertible evidences connecting the word God in the Qur'an with the God (NV) on table 2.0a & 2.0b from the calendar, like we witnessed in the previous section.

On table 3.0, the no. of times God occurs is 12, but the no. of verses where God occurs is 8. Thus, the verse no. 66 occurs in 34 verses while God occurs 12 times in 8 of these verses. This again takes us to the tables, 2.0a & 2.0b.

On table 2.0a, where the total no. of occurrences is 66, the no. of months is 12. For table 2.0b, with total no. of occurrences, 34, the no. of months is 8.

The no. of times God occurs in the verse no. 66 of the Qur'an is 12, the no. of verses God occurs in the 34 verses with this verse no. is 8.

<u>God On Gregorian Calendar (I &amp; II)</u>	<u>God In The Qur'an (II)</u>
Table 2.0a: Total no. of occurrences = <b>66</b>	The verse no. of the Qur'an = <b>66</b>
Table 2.0a: Total no. of months = <b>12</b>	No. of times <i>God</i> occurs in verse no. = <b>12</b>
Table 2.0b: Total no. of occurrences = <b>34</b>	No. of verses with this verse no. = <b>34</b>
Table 2.0b: Total no. of months = <b>8</b>	No. of verses <i>God</i> occurs in verse no. = <b>8</b>

The 34 verses with verse no. 66 are split into two categories with regards to the word God, some of these verses are with the word God while some are without. They are shown on the table below.

Table 3.1 below is an abbreviated representation of this data. You may check the table 3.0 above for the full data.

S/N of Verses	Chapter Nos.	Verse Nos.	S/N of Verses With God	S/N of Verses Without God
1	2	66		1
2	3	66	1	
—	—	—	—	—
9	10	66	3	
	10	66		
10	11	66		7
—	—	—	—	—
18	21	66	5	
19	22	66		14

—	—	—	—	—
26	33	66	6	—
—	—	—	—	—
31	40	66	8	—
32	43	66		24
33	55	66		25
34 (Allah)	56	66 (Allah)		26 (God)

Table 3.1

As seen on table 3.1, the no. of verses where God did NOT occur in the verse no. 66 (Allah) of the Qur'an is 26 (God) and the no. of verses that God occurs in the verse no. is 8.

On table 2.0a, the cumulative no. of occurrence at December is 66 (Allah) and the cumulative no. of occurrence at May is 26 (God), the no. of months from May to December is 8.

This is the section of table 2.0a that makes up table 2.0b. That is, table 2.0b covers the 8 months, starting from May, where the cumulative is 26 (God) to December, where it is 66 (Allah) on 2.0a.

<u>God On Gregorian Calendar (I)</u>	<u>God In The Qur'an (II)</u>
Cum. no. of occurrence @ Dec. = <b>66</b>	The verse no. of the Qur'an = <b>66</b>
Cum. no. of occurrence @ May = <b>26</b>	No. of verses without God in verse no. = <b>26</b>
No. of months from May to Dec. = <b>8</b>	No. of verses with God in verse no. = <b>8</b>

It is noteworthy that the nos. 34, 66 & 26, the NV of Allah/God found on table 2.0a & 2.0b coincided at the last verse on table 3.1.

As seen on table 3.1, the 34<sup>th</sup> verse numbered 66 in the Qur'an is the 26<sup>th</sup> verse without the occurrence of God in this verse no.

The section, *God In The Qur'an (I)* involved the count of the occurrences of God from chapter 26 to 66 and from chapter 34 to 66. While *God In The Qur'an (II)* is concerned with the count of the occurrences of God on the 34 verses numbered verse 66 in the Qur'an.

In these two sections, the NV (26, 34 & 66) on table 2.0a & 2.0b has not only been proven to denote the word God, but also proven to be associated with the One who authored the Qur'an.

Table 3.0 comes with such clear signs and proofs that the One and Only true God as indicated and confirmed by the table 2.0a & 2.0b is the God who Authored the Qur'an – The Lord of the worlds.

This noble Scripture has no doubt been authored or arranged in a form that is in complete harmony with the two tables from the Gregorian calendar, so that this might lead us to the conclusion and certainty that no human could have been able to author such.

## **THE TESTIMONY OF MARY**

While counting the word God from chapter 34 to 66 in the section, *God In The Qur'an (I)* I made a fascinating discovery concerning Mary on the last verse of chapter 66, i.e. the verse no. 12.

From the name Mary, which last occurred on this verse, you get an astonishing confirmation of the chapter no. from where the count of the word God started, the chapter no. it ended, the last verse no. and the coefficient from the count.

This section unveils a grand proof of the table 2.0a & 2.0b, yet another one coming from the Qur'an. If perhaps you still have any doubt remaining as to the relationship between the two tables and the scripture, this section should put an end to it.

Chapter 66 verse 12 (verse 66:12) gives a very important message about Mary and her miraculous conception of Jesus. This is the last verse of the Qur'an where Mary is mentioned.

Table 4.0 shows the list of the chapters and verse nos. in the Qur'an where Mary is mentioned. It shows the no. of chapters, the no. of verses and the no. of occurrences of Mary.

Chapter Nos.	Verse Nos.	S/N of Occurrence	S/N of Chapters	S/N of Verses
2	87	1	1	1
2	253	2		2
3	36	3	2	3
3	37	4		4
3	42	5		5
3	43	6		6
3	44	7		7
3	45	8		8
3	45	9		8
4	156	10	3	9
4	157	11		10
4	171	12		11
4	171	13		11
5	17	14	4	12
5	17	15		12
5	46	16		13
5	72	17		14
5	75	18		15
5	78	19		16
5	110	20		17
5	112	21		18
5	114	22		19
5	116	23		20

9	31	24	5	21
19	16	25	6	22
19	27	26		23
19	34	27		24
23	50	28	7	25
33	7	29	8	26
43	57	30	9	27
57	27	31	10	28
61	6	32	11	29
61	14	33		30
<b>66</b>	<b>12</b>	<b>34</b>	<b>12</b>	<b>31</b>

Table 4.0. Mary In The Qur'an

On the table above, we see that the no. of times Mary is mentioned in the Qur'an is 34 and the last chapter no. is 66. The no. of chapters Mary is mentioned is 12 which is same as the last verse no. it occurs. The no. of verses the name is mentioned is 31.

The last chapter no. Mary occurs, the no. of times, no. of chapters and no. of verses all points to table 2.0b & 2.0a where the total no. of occurrences is 34 & 66 respectively, the last month no. is 12 and its no. of days, 31.

<u>God On Gregorian Calendar (I &amp; II)</u>	<u>The Testimony of Mary</u>
Table 2.0b: Total no. of occurrences = <b>34</b>	No. of times the name Mary occurs = <b>34</b>
Table 2.0a: Total no. of occurrences = <b>66</b>	Chapter no. where Mary last occurs = <b>66</b>
The last month no. on the table = <b>12</b>	No. of chapters/last verse no. it occurs = <b>12</b>
The no. of days in the month = <b>31</b>	No. of verses where it occurs = <b>31</b>

We have seen this happening over and over again, the occurrence of Mary in the Qur'an (table 4.0) greatly strengthens the evidences that the Author of the Qur'an certainly knew beforehand table 2.0a & 2.0b and had authored it accordingly.

The count of the occurrences of God from the beginning of chapter 34 till end of chapter 66 (verse no. 12) in the section, *God In The Qur'an (I)* actually led to this remarkable discovery about the name Mary which last occurred in the same last verse of chapter 66.

The count of the name Mary till this verse thus confirms the chapter no. from where the count of the word God started, 34, the chapter no. it ended, 66, the last verse no., 12 and the coefficient from the count, 31.

<u>God In The Qur'an (I)</u>	<u>The Testimony of Mary</u>
Chapter no. where count started = <b>34</b>	No. of times the name Mary occurs = <b>34</b>
Chapter no. where count ended = <b>66</b>	Chapter no. where Mary last occurs = <b>66</b>
The last verse no. in the chapter = <b>12</b>	No. of chapters/last verse no. it occurs = <b>12</b>
The coefficient from the count = <b>31</b>	No. of verses where it occurs = <b>31</b>

The combination of the chapter no. 66 and verse no. 12 (verse 66:12) where Mary last occurs gives 6612, this no. is a multiple of 19 and the coefficient is 348.

$$6612 \text{ (Table 2.0a)} = 19 \times 348 \text{ (Table 2.0b)}$$

The chapter/verse no. 6612 (66 & 12) resulting in the coefficient, 348 (34 & 8) is a phenomenon that is truly awesome. This once again leads us to table 2.0a & 2.0b.

We know that table 2.0a with total no. of occurrences, 66 & 12 months resulted in table 2.0b with total no. of occurrences, 34 & 8 months.

$$66 \text{ \& \; } 12 \text{ (Table 2.0a)} \rightarrow 34 \text{ \& \; } 8 \text{ (Table 2.0b)}$$

<u>God On Gregorian Calendar (I &amp; II)</u>	<u>The Testimony of Mary</u>
(Table 2.0a & 2.0b)	<b>6612 = 19 X 348</b>
Total no. of occurrences & months = <b>66 &amp; 12</b>	Chapter/Verses: <b>6612</b> → <b>66 &amp; 12</b>
Total no. of occurrences & months = <b>34 &amp; 8</b>	The coefficient: <b>348</b> → <b>34 &amp; 8</b>

Do not forget that the total no. of occurrences and no. of months on both table 2.0a & 2.0b were also indicated by the table 3.0 in the previous section, *God In The Qur'an (II)*.

In the Qur'an, the no. of verses in chapter 66 is 12 (table 2.0a), the no. of verses where God occurs in chapter 34 is 8 (table 2.0b). Interestingly, the no. of times God occurs in chapter 34 is also 8.

The revelation of the Qur'an ended in 632 CE and table 2.0a & 2.0b from the Gregorian calendar were discovered in year 2010 & 2017 CE respectively. From all what we've seen so far, it is safe to conclude with all certainty that the Qur'an had obviously been authored to reflect the results of these two tables.

This could never have been the work of the Prophet who died almost 1400 years ago or of any human dead or alive, but of an Everlasting, Omnipotent, All-Seeing and All-Knowing God.

The Qur'an is a mathematically composed Book. Any word, any name or message you find in any chapter or verse no. did not occur by coincidence. It is for a purpose and such is the case with the name Mary in the Qur'an.

Looking at the results on table 4.0 and table 2.0a & 2.0b, it is evident that the name Mary in the Qur'an is set as a proof of the One and Only God indicated by table 2.0a & 2.0b, the name as well is a proof of the divine origin of the Qur'an.

Now the question arises, why Mary? What does she stand for in the Qur'an?

### **She Who Confirms The Truth**

What Mary stands for in the Qur'an and why the name was chosen as a proof of table 2.0a & 2.0b is found on the verse 66:12, this is the same verse where the name gave us the results of the two tables.

The Qur'an honours Mary with the title "Siddiqah" meaning "She who confirms the truth". The last verse Mary is called Siddiqah is verse 66:12 which is also the last verse with the occurrence of Mary in the Qur'an.

Mary, testifying to the truth of the signs of her Lord, God on table 2.0a & 2.0b is in accordance with her title (Siddiqah) in the Qur'an, and therefore it did not happen by mere chance.

*"And Mary, the daughter of Imran, who guarded her virginity, so We breathed into her of Our Spirit, and she confirmed the truth of the words of her Lord and His revelations and became one of the obedient."*

*– Qur'an 66:12*

The occurrence of Mary in the Qur'an as witnessed on table 4.0 confirms the truth about the connections of the results on table 2.0a & 2.0b with the Qur'an and by that, it confirms the true God indicated by these two tables and the authenticity of the Qur'an.

Table 4.0 is Mary's confirmation of what God said throughout the Qur'an; that He is God, the One and Only, He has no partners and the Qur'an is His revelation to the world.

The relationship between Mary and the miraculous code, 19 is outstanding, I repeat, it is outstanding and you will be seeing a lot of it in this book.

The profound role of the code 19 is confirming the Qur'an as the true word of the Almighty God and testifying to the absolute oneness of the true God, this exactly is what Mary stands for and what table 4.0 demonstrates. The underlined part of the message of verse 66:12 above says it all.

The no. of Arabic letters the underlined part of the message of verse 66:12 is composed of is 19. It's quite significant that the part of verse 66:12 which talks about the confirming role (Siddiqah) of Mary is composed of 19 letters.

Siddiqah – She Who Confirms The Truth

*“...And she confirmed the truth of the words of her Lord and His revelations”*

– Qur'an 66:12

No. of Arabic letters = 19

The remaining message of verse 66:12 excluding the underlined part is composed of 57 Arabic letters. The no. 57 is a multiple of 19.

*“And Mary, the daughter of Imran, who guarded her virginity, so We breathed into her of Our Spirit....and became one of the obedient.”*

– Qur'an 66:12

No. of Arabic letters = 57 or 19 X 3

This means that the entire message of verse 66:12 is composed of a total of 76 Arabic letters, a multiple of 19.

Total no. of Arabic letters in verse 66:12 = 76 or 19 X 4

The entire message (the 76 letters) of verse 66:12 is composed of 19 different Arabic letters. That is, if you count the no. of different Arabic letters in verse 66:12, you get 19.

No. of different Arabic letters in verse 66:12 = 19

We know that the combination of the chapter no. 66 and verse no. 12 gives 6612, a multiple of 19.

Chapter/Verse no. = **6612** or **19 X 348**

Mary, the mother of Jesus, is a highly revered figure in Islam and in the Qur'an. Her special and elevated status is explicitly mentioned in several verses. In the Qur'an, God proclaims Mary to be the best woman amongst all humanity. She is referred to as chosen, purified, truthful, a woman of great piety and devotion.

Mary is frequently mentioned in the Qur'an. As a matter of fact, she is the only woman mentioned by name in the Qur'an. This is a honourable status granted by the Qur'an only to few, mostly to the Prophets, Messengers and Angels.

An entire chapter is named after Mary, this chapter occupies a very significant position in the Qur'an. Without being told, you should be able to guess what the chapter no. is from what you've known so far.

Yes! The chapter titled Mary is the chapter no. 19, the miraculous code and the proof of the Qur'an. The no. 19 is God's signature on the Qur'an, the universe and everything therein.

Chapter no. titled Mary in Qur'an = **19**

We shall be finding out more about Mary and the chapter 19 but before then let's look into all the chapters where this name is mentioned and their relationship with the Gregorian calendar.

The name Mary occurs in 12 chapters of the Qur'an as we already know from table 4.0. They are: chapter 2, 3, 4, 5, 9, 19, 23, 33, 43, 57, 61 & 66. Inspired by the fact that the no. of chapters is the same as the no. of months in the Gregorian calendar, I decided to enter these chapters into the calendar.

The results as we enter the chapter nos. into the calendar leads us back to Mary in the Qur'an.

1. The results give back one of the 12 chapters in the Qur'an where Mary is mentioned.
2. It tells us the position of this chapter amongst the 12 chapters where she is mentioned.
3. a) It then goes further to tell us the no. of times Mary is mentioned in this chapter and the last verse where she is mentioned in this chapter.  
b) It also indicates the chapter's name, Mary along with the last verse she's mentioned in this chapter or the no. of times she's mentioned in the 12 chapters (i.e. the entire Qur'an).

Table 5.0 shows the 12 chapter nos. where Mary is mentioned in the Qur'an representing day nos. of the year on the calendar. The table shows the corresponding dates (month & day nos.) and their NV.

For example, chapter 66 represents the 66<sup>th</sup> day of the year which is 03/07 – March Seven. The NV of March Seven is 108.

S/N of Chapters	Chapter Nos. / Day of The Year	Month Nos.	Day Nos.	Date (Month & Day)	Numerical Value of Date (Month & Day)
1	2	01	02	January Two	148
2	3	01	03	January Three	146
3	4	01	04	January Four	150
4	5	01	05	January Five	132
5	9	01	09	January Nine	132
6	19	01	19	January Nineteen	176
7	23	01	23	January Twenty-Three	253
8	33	02	02	February Two	154
9	43	02	12	February Twelve	183
10	57	02	26	February Twenty-Six	255
11	61	03	02	March Two	101
12	66	03	07	March Seven	108
	<b>Total</b>	<b>19</b>	<b>114</b>		<b>1938</b>

Table 5.0

1. The total of the month nos. on the table above is 19, the miraculous code of the Qur'an.

$$19 = 19$$

2. The total of the day nos. on the table is 114, which is a multiple of 19 and which is the total no. of chapters in the Qur'an.

$$114 = 19 \times 6$$

3. a) The total of the NV of the month and day nos. (dates) on the table is 1938, this no. is also a multiple of 19.

$$1938 = 19 \times 34 \times 3$$

As we can see, the results from entering the 12 chapters where Mary occurs in the Qur'an into the calendar (table 5.0) pointed out one of these chapters (chapter 19) and some facts about Mary in the chapter. This chapter stands out amongst the 12 as the very one named after Mary.

The results from the 12 chapters with Mary in the calendar greatly demonstrated Mary's title in the Qur'an, "she who confirms the truth".

1) It confirms the chapter no. named after Mary, 2) it confirms the chapter's position amongst the 12 chapters, 3a) it confirms the last verse where Mary occurs in this chapter and its position amongst the verses it occurs in the chapter (i.e. the no. of verses Mary occurs in the chapter).

Gregorian Calendar: Total of month nos. = **19**

Qur'an: Chapter **19** is the chapter titled Mary

Gregorian Calendar: Total of day nos. = **19 X 6**

Qur'an: Chapter **19** is the no. **6** chapter where Mary is mentioned

Gregorian Calendar: Total NV of month & day nos. = **19 X 34 X 3**

Qur'an: Chapter **19** verse **34** is the no. **3** verse Mary is mentioned in the chapter

The NV of Mary is 57.

MARY	M	A	R	Y	Total
	13	1	18	25	<b>57</b>

3. b) The total of the NV of the month and day nos. (dates) on the table, 1938 also confirm the chapter's name (Mary) with the last verse no. where Mary occurs in this chapter, and this is the total no. of times the name occurs in the 12 chapters on the table.

$$1938 = 57 \times 34$$

The no. 57 symbolizes the chapter's name (Mary) and 34 is the last verse no. where Mary occurs in this chapter. These two nos. also indicate the name Mary and the total no. of times it occurs in the 12 chapters.

This is the icing on the cake. This is a grand confirmation of who the 12 chapters and the signs on the table are all about.

Gregorian Calendar: Total NV of month & day nos. = **57 X 34**

Qur'an: No. **57** signifies chapter's name, Mary, it last occurs in verse **34** of the chapter

Qur'an: No. **57** signifies the name Mary, it occurs **34** times in the twelve chapters

The results from table 5.0 definitively confirms the tremendous and fantastic relationship that the Qur'an has with the Gregorian calendar. This is Mary's title playing out on the table. Mary testifies to the truth that the Gregorian calendar is a proof of the divine origin of the Qur'an.

Table 5.0 confirmed that the connection between the results of table 4.0 (Mary in the Qur'an) and table 2.0a & 2.0b (Gregorian calendar) isn't a thing that happened by coincidence.

Our findings on Mary all boils down to the fact that the Qur'an couldn't have been authored by any human. Whosoever authored it had absolute fore-knowledge of this calendar and had authored it appropriately so as to show us these signs.

Mary proved and confirmed in remarkable ways that the God we saw on the Gregorian calendar (table 2.0a & 2.0b) is the same One we see in the Qur'an.

Her ultimate message to you and I here is very clear – There is Only One God, He is Allah, He has no partners and the Qur'an is from Him. This is Mary, the mother of Jesus, testifying to the truth of the words of her Lord.

Many skeptics claim that the Qur'an is the written words of Muhammad. The truth, of course, is that Muhammad never wrote a single word of the Qur'an, it is the word of God Almighty.

God in His great wisdom placed secrets and signs within the entire Qur'an that if uncovered will reveal an unprecedented miracle for both the believers and the unbelievers. God reveals them to whoever He wills and at the appointed time.

In the Qur'an, chapter 66 verse 12 is the 31<sup>st</sup> verse where Mary is mentioned. The frequency of Mary till this verse is 34, the NV of Mary is 57.

On table 5.0, chapter 66, the 12<sup>th</sup> chapter falls on a month with 31 days (March). Total NV of dates till this chapter is the product of the frequency of Mary, 34 and NV of Mary, 57.

### **Mary And The Chapter 19**

Here we witness some interesting findings about Mary and the chapter of the Qur'an named after her. We know that the chapter titled Mary is the chapter no. 19, the miraculous code of the Qur'an and the proof of its divine origin.

Chapter no. titled Mary in Qur'an = 19

In chapter 19, Mary is first mentioned in verse 16 and last mentioned in verse 34. The no. of verses from the first verse where Mary is mentioned, to the last verse where she is mentioned in the chapter is 19.

No. of verses from the first to the last verse Mary is mentioned = **19**

The name Mary is composed of 4 English letters, the NV of Mary is 57, this no. is a multiple of 19, the coefficient is 3.

NV of Mary = 57 or **19 X 3**

The code 19 and the coefficient 3 both gotten from the name Mary tells us about this name in the Qur'an. The story of Mary is vividly told in two chapters of the Qur'an; they are chapter 19 & 3. Chapter 19 is named after Mary herself and chapter 3 is named after her family, Imran.

The name Mary is mentioned in chapter 19 (named after her) exactly 3 times.

NV of Mary = 57 or **19 X 3**  
Chapter titled Mary is **19**, frequency of Mary is **3**

In chapter 19, Mary is mentioned on 3 verses. They are verse no. 16, 27 & 34.

NV of Mary = 57 or **19 X 3**  
Chapter titled Mary is **19**, no. of verses with Mary is **3**

In chapter 19, the no. of verses from the first verse Mary is mentioned, verse 16 to the third (last), verse 34 is 19. Therefore, within the 19 verses, 3 contains the name Mary.

In chapter 19, the 3<sup>rd</sup> time Mary is mentioned, verse no. 34 indicates the no. of times Mary is mentioned in the whole Qur'an, i.e. 34 times. This no. of times is also indicated by the no. of Arabic letters in the verse, verse no. 34 is composed of 34 letters.

Verse no. 16 has 41 letters, verse 27 has 39 letters and verse 34 has 34 letters. Therefore, the total no. of letters in the 3 verses of chapter 19 where Mary occurs is 114, this no. is a multiple of 19.

$$41 + 39 + 34 = 114 \text{ or } 19 \times 6$$

As you add the no. of letters in the 3 verses, the no. 34 coincides with the total 114, an indication that Mary occurs 34 times in the 114 chapters of the Qur'an (114 symbolizes the whole Qur'an).

The total, 114 which is  $19 \times 6$  also indicates the position of chapter 19 amongst the chapters where Mary is mentioned. Chapter 19 is the 6<sup>th</sup> chapter of the Qur'an where Mary is mentioned.

No. of letters in the 3 verses with Mary = 114 or **19** X **6**  
Chapter **19** titled Mary is the no. **6** chapter Mary is mentioned

In chapter 19, the first mention of Mary is on verse 16, while the first mention of Jesus is on verse 34. The sum of the verse nos. from 16 to 34 is 475, this no. is the product of 25 & 19.

$$16 + 17 + 18 + \dots + 32 + 33 + 34 = 475 \text{ or } 25 \times 19$$

In verse 16, Mary occurs the 25<sup>th</sup> time in the Qur'an and in verse 34, Jesus occurs the 19<sup>th</sup> time in the Qur'an.

Total of verse nos. from **16** to **34** = 475 or **25** X **19**  
Frequency of Mary in Qur'an till verse **16** = **25**  
Frequency of Jesus in Qur'an till verse **34** = **19**

The frequency of Jesus till verse 34 is 19 but the frequency of Jesus in the whole Qur'an is 25.

As said earlier, the profound role of the miraculous code 19 is confirming the authenticity of the Qur'an and the true God and this exactly is what Mary (whose name is the title of chapter 19) stands for – She who confirms the truth (Siddiqah).

"... And she confirmed the truth of the words of her Lord and of His revelations..." – Verse 66:12

The above 19-lettered Qur'anic sentence from a key verse on Mary and the last verse she is mentioned says it all. This message is clearly a pointer to the role of Mary in the Qur'an, as we've learnt from this book.

## **GOD, QUR'AN AND THE CALENDAR**

Table 2.0a below shows the 12 months of the calendar, and the cumulative no. of occurrences at each month. Table 2.0b which emanated from table 2.0a shows 8 months of the calendar and the cumulative no. of occurrences at each month.

S/N	Months	Cum. Sum of No. of Occurrences	365 Days
1	January	7	
2	February	8	
3	March	15	
4	April	19	
5	May	26 (God)	
6	June	30	
7	July	37	
8	August	44	
9	September	48	
10	October	55	
11	November	59	
12	December	66 (Allah)	

Table 2.0a

S/N	Months	Cum. Sum of No. of Occurrences	89 Days
5	May	5	
6	June	8	
7	July	13	
8	August	18	
9	September	21	
10	October	26 (God)	
11	November	29	
12	December	34 (Allah)	

Table 2.0b

On table 2.0a & 2.0b, you notice that some nos. (i.e. cumulative no. of occurrences) are left outside of the NV of God and Allah. These nos. are 7, 8, 15 & 19 on table 2.0a and 5, 8, 13, 18 & 21 on table 2.0b.

The total of these nos. outside of the NV of God and Allah is 114, a multiple of 19. This total is the total no. of chapters in the Qur'an.

$$7 + 8 + 15 + 19 + 5 + 8 + 13 + 18 + 21 = 114 \text{ or } 19 \times 6$$

<u>Table 2.0a &amp; 2.0b</u>	
Total of nos. outside NV of God & Allah = 114	
Total no. of chapters in the Qur'an = 114	

The total, 114 therefore symbolizes the Qur'an. This phenomenon is confirmed by the last no. on which the total coincides. As you sum up the nos. the total, 114 coincides with the no. 21.

Chapter 114 is chapter 21 in the chronological (revelation) order of the Qur'an; this means the chronological no. of chapter 114 is 21.

Total of nos. outside NV of God & Allah, 114 falls on the no. 21

The chronological no. of chapter 114 of the Qur'an is 21

The total, 114 is  $19 \times 6$ , the coefficient, 6 is the no. of verses in chapter 114 and 19 is the miraculous code.

On table 2.0a & 2.0b, you see some nos. representing the NV of God and Allah. These nos. are 26 (God) & 66 (Allah) on table 2.0a and 26 (God) & 34 (Allah) on table 2.0b.

The total of the nos. representing the word God and Allah on the two tables is 152, also a multiple of 19. This total is the NV of Gregorian calendar.

$$(\text{God}) 26 + 66 (\text{Allah}) + (\text{God}) 26 + 34 (\text{Allah}) = 152 \text{ or } 19 \times 8$$

Table 2.0a & 2.0b

Total of NV of God & Allah = 152

NV of Gregorian calendar = 152

The total, 152 therefore symbolizes the Gregorian calendar. This phenomenon is confirmed by the total of nos. from the word God to Allah on the respective tables.

On table 2.0b, the total of the nos. from 26 (God) to 34 (Allah) is 89, this is the total of the 3 distinct no. of days in the 12 months of the Gregorian calendar (as earlier seen on table 1.0).

$$(\text{God}) 26 + 29 + 66 (\text{Allah}) = 89 \text{ days}$$

Total of the nos. from God to Allah = **89**

Total of the 3 distinct no. of days in the 12 months of the Gregorian calendar = **89**

It is noteworthy that the sum of digits of NV of Gregorian calendar is also 89.

On table 2.0a, the total of the nos. from 26 (God) to 66 (Allah) is 365, this is the total no. of days in the 12 months of the Gregorian calendar.

$$(\text{God}) 26 + 30 + 37 + 44 + 48 + 55 + 59 + 66 (\text{Allah}) = 365 \text{ days}$$

Total of the nos. from God to Allah = **365**

Total of no. of days in the 12 months of the Gregorian calendar = **365**

The sum of nos. from God to Allah giving us all the days in a year of the Gregorian calendar is of great symbolic meaning. God (Allah) is the one in charge of all the days of our lives. He created the universe and set the earth in motion around the sun, the basis on which this calendar was created.

He is the one in absolute control of all astronomical events. The alternation of the day and night doesn't happen accidentally, there is a power behind it. He causes the day to succeed the night and the night to succeed the day.

This He made for a purpose, that we may seek His bounty and rest, and that we may know to calculate the no. of days, weeks, months, years, time and age. Thus, He established for us a timing system and the means of calculations. In all of these there are great signs for men with reasoning.

If the day or night stood still and never changed, we would never have known any of these things. All the signs of God from the Gregorian calendar that I have presented in this book and a whole lot more that I presented in other books, would never have existed.

*"Verily, in the creation of the heavens and the earth, and the alternation of night and day, there are indeed signs for men of understanding". – Qur'an 3:190*

*"He is the One who rendered the sun radiant, and the moon as a light, and measured for it stages, that you might know the number of years and to count/calculate. God did not create all this, but in truth. He explains the signs, revelations for people who have knowledge".  
– Qur'an 10:5*

The existence of all the mathematical signs that evolved from the results on table 2.0a & 2.0b have been made possible by the fact that the 31, 30 & 28-day months on the calendar have been put in the appropriate places and with the right no. of occurrences (7, 4 & 1).

The months, their names, the no. of days in each month, their order of arrangement and every other parameter of this calendar is in accordance with the will of the Almighty God. It's amazing how God influences man to carry out His will unknowingly.

## **THE 23 YEARS OF REVELATION**

The Noble Qur'an is the revelation of God to Prophet Muhammad through the arch Angel Gabriel. It is the last of all the scriptures from God and Muhammad is the seal of all the Prophets. The Qur'an was not sent down as one complete Book in one revelation, rather, the revelation took place gradually over the period of 23 years.

The entire Qur'an is a mathematical miracle, the Book is composed such that the chapters, verses, words, letters and every element of the Qur'an conforms to a mathematical pattern or formula.

God has hidden many secrets and signs in the entire Qur'an, the chapter nos., chapter titles, no. of verses in each chapter, the no. of letters or certain words in a verse, in a chapter or in the Qur'an, etc. all have hidden meanings and messages which are revealed by God at the appropriate time.

This got me convinced that the no. of years it took for the revelation of the Qur'an, 23 would have some hidden mathematical signs or messages behind it just like the scripture itself. Hence, I examined this no.

Now why was the Qur'an revealed in 23 years? Is there any secret or hidden message behind it?

### **Total No. of Chapters**

The no. 23 is a natural no. this means it is a member of the set of whole nos. from 1 to infinity, i.e. 1, 2, 3, and so on.

The sum of digits of natural nos. from 1 till the no. 23 is 114. This no. is a multiple of 19 (the miraculous code of the Qur'an), the coefficient is 6 or  $2 \times 3$  and these are the two digits which makes up the no. 23 on which the total, 114 falls.

$$1 + 2 + 3 + \dots + (2+1) + (2+2) + (2+3) = 114 \text{ or } 19 \times (2 \times 3)$$

The sum of digits of nos. till the no. 23 gives 114. What is the relationship between the no. 23 and 114 with respect to the Qur'an? In the 23 years that it took for the revelation of the Qur'an, a total of 114 chapters were revealed.

#### **Revelation of The Qur'an**

The sum of digits of nos. till the no. **23** = **114**

No. of years for the revelation of the Qur'an = **23**

Total no. of chapters revealed in the Qur'an = **114**

$$**114** = **19** \times (**2 \times 3**)$$

## Author of The Qur'an

For verification, I entered the sum of digits of nos. till no. 23 into the 114 chapters of the Qur'an.

The result did not only establish that the mathematical operation (summing of digits and the total) that you have just witnessed is very much connected with the Qur'an, but it also brought forth its author and the most important message of this scripture.

The table below shows the no. of years from 1 to 23, the sum of digits of these nos., the cumulative sum of digits representing chapter nos. in the Qur'an and the corresponding no. of verses (+ Basmallah) in the chapters.

As you add up the digits of nos., it is the cumulative sum that represents the chapter nos. This is so that the chapters cut across the whole Qur'an, starting from chapter 1 till the end, chapter 114.

No. of Years	Sum of Digits	Cum. Sum of Digits / Chapter Nos.	No. of Verses (+Basmallah)
1	1	1	7
2	2	3	201
3	3	6	166
4	4	10	110
5	5	15	100
6	6	21	113
7	7	28	89
8	8	36	84
9	9	45	38
10	1	46	36
11	2	48	30
12	3	51	61
13	4	55	79
14	5	60	14
15	6	66	13
16	7	73	21
17	8	81	30
18	9	90	21
19	10	100	12
20	2	102	9
21	3	105	6
22	4	109	7
23	5	114	7
		<b>Total</b>	<b>1254</b>

Table 6.0

Note that the Qur'an is made up of numbered verses and un-numbered verses (i.e. the Basmallah). The total no. of verses on table 6.0 above is the addition of the numbered verses and the Basmallah.

The total no. of verses (+Basmallah) in the 23 chapters on the table is 1254. This total is also a multiple of 19 and the coefficient is 66. This total unveils the one responsible for the 23 years revelations.

$$1254 = 19 \text{ (One)} \times 66 \text{ (God)}$$

The miraculous code, 19 is the NV of Wahid which means One. The coefficient, 66 is the NV of Allah which means God. Wahid (One) is a very important attribute of Allah (God), these two words put together says: One God – The Qur'an's dominant message.

The verses of the Qur'an kept constantly reminding us that God is One and we should not associate partners with Him.

<b>ONE GOD</b>	<b>WAHID</b>	<b>W</b>	<b>A</b>	<b>H</b>	<b>D</b>	<b>Total</b>
		6	1	8	4	<b>19</b>
	<b>ALLAH</b>	<b>A</b>	<b>L</b>	<b>L</b>	<b>H</b>	<b>Total</b>
		1	30	30	5	<b>66</b>

As seen on the table above, the no. of years, 23 led to 23 chapters of the Qur'an, starting from the beginning, chapter 1 till the end, chapter 114. The coefficient of the total no. of verses in these chapters, i.e. 66 symbolizes the word Allah (God) – the One who authored the Qur'an over a period of 23 years.

The Qur'an is from the same God who revealed the Torah to Prophet Moses, the Gospel to Jesus and all the other scriptures to the Prophets that came before Muhammad.

<p align="center"><u>Revelation of The Qur'an</u></p> <p align="center">No. of years for the revelation of the Qur'an = <b>23</b></p> <p align="center">Total verses in the <b>23</b> chapters of the Qur'an resulting from the sum of digits of nos. till <b>23</b> = 1254</p> <p align="center">1254 = <b>19</b> (One) X <b>66</b> (God)</p> <p align="center">Attribute of Author of the Qur'an = One (Wahid) Name of Author of the Qur'an = God (Allah)</p> <p align="center">Message: ONE GOD</p>
--

The sum of digits of nos. till the no. 23 gave the total no. of chapters in the Qur'an, the cumulative sum as you add up, entered into the Qur'an as chapter nos. revealed and confirmed the Qur'an's Author and the Qur'an's basic message: One God.

One of the primary objectives of the Qur'an is to call people to worship the only One God, as there's no other god/deity worthy of worship except Him. The act of ascribing partners to God, whether they be sons, daughters or others is blasphemous.

In Christianity, the doctrine of Trinity states that God exists as a communion of 3 distinct persons, 1) the Father, 2) the Son and 3) the Holy Spirit. Within Islam such a concept of plurality within God is a denial of monotheism and goes against the message of the Qur'an.

The Qur'an calls these Christians disbelievers and gives severe warning to them about the painful torment that lies ahead if they persist. It repeatedly and firmly asserts God's absolute oneness, thus ruling out the possibility of another being sharing His sovereignty.

### **Total No. of Verses**

The no. 23 is an odd no., it is also a prime no. The odd nos. till 23 are: 1, 3, 5, 7, 9, 11, 13, 15, 17, 19, 21, & 23 and the prime nos. till 23 are: 2, 3, 5, 7, 11, 13, 17, 19, & 23.

We know that the sum of digits of natural nos. till the no. 23 is 114, which is the total no. of chapters in the Qur'an.

$$1 + 2 + 3 + 4 + \dots + (1+9) + (2+0) + (2+1) + (2+2) + (2+3) = 114$$

The sum of digits of odd nos. till the no. 23 is 63.

$$1 + 3 + 5 + 7 + 9 + (1+1) + (1+3) + (1+5) + (1+7) + (1+9) + (2+1) + (2+3) = 63$$

The sum of digits of prime nos. till the no. 23 is 46.

$$2 + 3 + 5 + 7 + (1+1) + (1+3) + (1+7) + (1+9) + (2+3) = 46$$

The combination of the nos. 63 & 46, the sum of digits of odd and prime nos. till 23 is 6346, this no. is a multiple of 19. It will interest you to know that 6346 is the total no. of verses (+ Basmallah) in the Qur'an, revealed in 23 years.

The Qur'an comprises of 6234 numbered verses and 112 un-numbered verses (i.e. Basmallah). The addition of these two gives 6346 verses. Sum of digits:  $6 + 3 + 4 + 6 = 19$ .

The sum of digits of odd nos. till the no. **23** = **63**

The sum of digits of prime nos. till the no. **23** = **46**

The combination of the nos. **63** & **46** = **6346**

$$\mathbf{6346 = 19 \times 334}$$

There is great wisdom behind God's decision and whatever He does, nothing happens by coincidence. God could have revealed the Qur'an as a whole (at once) to prophet Muhammad but He chose to reveal it gradually over a period of time for a purpose.

God chose the appropriate no. of years, 23 to reveal the Qur'an for the purpose of showing us some profound signs about the authenticity of this final scripture from Him to mankind.

While the sum of digits of natural nos. till 23 gave the total no. of chapters in the Qur'an, 114, the sum of digits of the odd and prime nos. till 23 gave the total no. of verses (+ Basmallah), 6346 in these 114 chapters, revealed over the period of 23 years.

<u>Revelation of The Qur'an</u>	
The sum of digits of natural nos. till the no. 23 =	114
Total no. of chapters in the Qur'an revealed in 23 years =	114
114 = 19 X 6	
The sum of digits of odd/prime nos. till the no. 23 =	6346
Total no. of verses in the Qur'an revealed in 23 years =	6346
6346 = 19 X 334	

The sum of digits of odd nos. till 23 is 63, the combination of these two nos. is 2363. Interestingly, this is the total no. of verses (+ Basmallah) till the end of the chapter no. 19, the miraculous code.

$$23 \text{ \& } 63 = 2363$$

The sum of digits of prime nos. till 23 is 46, the combination of these two nos. is 2346. This is the total no. of numbered verses till the end of chapter no. 19. This is the no. of verses without counting the Basmallah.

$$23 \text{ \& } 46 = 2346$$

### Odd And Even

The no. of years it took for the revelation of the Qur'an, 23 unveiled the total no. of chapters in the Qur'an, the total no. of verses in these chapters as well as the name and attribute of the Author. This no. also unveiled the basic or central message of the Qur'an: One God.

Here, we look into this no. of years and its signs with regards to the chapter 19 of the Qur'an.

The total sum of digits of prime nos. till the no. 23 resulted in the no. 46.

Total sum of digits of prime nos. till **23** = **46**

- The no. 23 is a prime no., the result, 46 is a composite no.
- The no. 23 comprises of the first two prime nos. 2 & 3, the result, 46 comprises of the first two composite nos. 4 & 6.
- The no. 23 is an odd no. while the result, 46 is an even no.
- The no. 23 is the NV of the word Odd, the result, 46 is the NV of the word Even.

O	D	D	Total
15	4	4	<b>23</b>

E	V	E	N	Total
5	22	5	14	<b>46</b>

The NV of the word Odd gives an odd no, 23. The NV of the word Even gives an even no, 46. The NV of Even and Odd demonstrates a mathematical fact: If you multiply an odd no. by 2 you get an even no.

$$46 \text{ (NV of Even)} = 2 \times 23 \text{ (NV of Odd)}$$

Like 23, the chapter no. 19 is an odd no. and a prime no. and like 46, the no. of verses, 98 is an even no. and a composite no. The combination of 23 & 46 is 2346 and the 2346<sup>th</sup> numbered verse of the Qur'an is verse 19:98, it is significant to note that the no. 2346 is the 1998<sup>th</sup> composite no.

The no. **2346** is no. of verses till verse **19:98**

The index of the composite no. **2346** is **1998**

As we can already see, it is not by chance that verse 19:98 is the verse no. 2346 of the Qur'an, this was deliberately planned by God to demonstrate the deep relationship between mathematics and the composition of the Qur'an. You are about to witness some astounding evidences.

I found that the no. of verses till verse 19:98 signifies some mathematical facts:

- The summing of digits of prime nos. till 23.
- The NV of the words, Odd and Even.

Verse 19:98 has been deliberately made the verse no. 2346 of the Qur'an to lend credence to the mathematical miracles involving the nos. 23 & 46 that has been embedded in the verse.

We know that the sum of digits of prime nos. till 23 is 46 and the NV of Odd and Even is 23 & 46 respectively. These mathematical facts corroborating the no. of verses till verse 19:98, i.e. 2346 has been encoded in the composition of the message of this verse.

The no. of Arabic letters verse 19:98 is composed of is 46, this no. of letters as you will find out below signifies the sum of digits of prime nos. till the no. 23 as well as the NV of the word Even.

No. of letters in verse **19:98** = **46** (Sum of digits of prime nos. till **23** / NV of Even)

Mathematics provides monumental evidences of the Qur'an's credibility, authenticity, divinity and perfect protection from human tampering. The mathematical composition of the Qur'an is the main protection mechanism which God embedded in the entire scripture to allow us detect any corruption done to it.

As you sum up the digits of prime nos. till 23, the total, 46 coincides with the 14<sup>th</sup> digit. In other words, the total sum of digits is 46 and the no. of digits is 14. The nos. 46 & 14 are the no. of Arabic letters and words respectively in verse 19:98. This is demonstrated on the table below.

Prime Nos. Till 23	Digits	S/N of Digits	Cum. Sum of Digits
2	2	1	2
3	3	2	5
5	5	3	10
7	7	4	17
11	1	5	18
	1	6	19
13	1	7	20
	3	8	23
17	1	9	24
	7	10	31
19	1	11	32
	9	12	41
<b>23</b>	2	13	43
	3	<b>14</b>	<b>46</b>
		No. of Words	No. of Letters

Table 7.0

Sum of Digits of Prime Nos. Till **23** & Verse **19:98**

Total of sum of digits is **46**, and no. of digits is **14**

No. of Arabic letters is **46**, and no. of words is **14**

We get a similar result with the word Even.

As you add up the NV of letters of the word Even, the total, 46 coincides with the no. 14 (NV of the last letter, N). In other words, the total NV is 46 and it occurred at the no. 14. The nos. 46 & 14 represents the no. of Arabic letters and words respectively in verse 19:98.

	Letters	NV of Letters	Cum. Sum of NV
<b>EVEN</b>	E	5	5
	V	22	27
	E	5	32
	N	<b>14</b>	<b>46</b>
		No. of Words	No. of Letters

Table 8.0

<p><u>NV of The Word Even &amp; Verse <b>19:98</b></u></p> <p>NV of Even is <b>46</b>, and the no. it occurred on is <b>14</b></p> <p>No. of Arabic letters is <b>46</b>, and no. of words is <b>14</b></p>
---

Table 7.0 shows the sum of digits of prime nos. till 23 and how the results indicates the no. of letters and words in verse 19:98. Table 8.0 which deals with the NV of the word Even similarly indicated the no. of letters and words in the aforementioned verse.

Like I mentioned earlier, verse 19:98 has been composed to reflect some mathematical operations. For those who are already skeptical as to whether the results on the tables above are truly linked with this verse of the Qur'an, relax, I'm not done yet.

The Arabic letters in verse 19:98 had been arranged in a manner that when you enter the summing of digits of prime nos. till 23 and the words, Odd and Even into the verse, you get three different and obvious information pertaining to this same verse.

#### The Summing of Digits of Prime Nos.

As we enter the sum of digits of prime nos. till 23 into the 46 Arabic letters in verse 19:98, each sum of digit will coincide with an Arabic letter. The table below shows these prime nos., the sum of digits, the cumulative sum, the Arabic letter each coincides with and their NV.

For example, the sum of digits of the last prime no. 23 is 5, the cumulative sum of digits at the last prime no. is 46. The 46<sup>th</sup> Arabic letter is Alif and the NV of Alif is 1.

The is similar to how the sum of digits of natural nos. till 23 was entered into the 114 chapters of the Qur'an (table 6.0).

Prime Nos. Till 23	Sum of Digits	Cum. Sum of Digits	Arabic Letters	NV of Arabic Letters
2	2	2	Kaf	20
3	3	5	Ha	5
5	5	10	Qaf	100
7	7	17	Qaf	100
11	2	19	Nun	50
13	4	23	Hha	8
17	8	31	Alif	1
19	10	41	Ha	5
<b>23</b>	5	<b>46</b>	Alif	1
			<b>Total</b>	<b>290</b>

Table 9.0

The total NV of the Arabic letters gotten from entering the sum of digits into the verse 19:98 is 290, this gives us the chapter's title of the verse. Verse 19:98 is found in the chapter titled, Maryam (Mary), the NV of Maryam in Arabic is 290.

The name Maryam is composed of 4 Arabic letters, Mim, Ra, Ya, Mim. In the Arabic alphabet, Mim = 40, Ra = 200, Ya = 10, Mim = 40, total is 290.

Maryam (Arabic)	Mim	Ra	Ya	Mim	Total
	40	200	10	40	<b>290</b>

Sum of Digits of Prime Nos. Till **23** & Verse **19:98**

Total NV of the Arabic letters is **290**

NV of the **Chapter's title** Maryam in Arabic is **290**

We get similar signs with the words, Odd and Even.

### The NV of Odd and Even

As we enter the word Even into the Arabic letters in verse 19:98, the NV of each letter of the word will coincide with an Arabic letter. The table below shows the NV of the letters, the cumulative sum, the Arabic letter each coincides with and their NV.

For example, the NV of the last letter, N is 14, cumulative sum of NV at N is 46. The 46<sup>th</sup> Arabic letter is Alif and the NV of Alif is 1.

	English Letters	NV of English Letters	Cum. Sum of NV	Arabic Letter	NV of Arabic Letters
<b>EVEN</b>	E	5	5	Ha	5
	V	22	27	Ha	5
	E	5	32	Hha	8
	N	14	46	Alif	1
				<b>Total</b>	<b>19</b>

Table 10.0a

The total NV of the Arabic letters gotten from entering the word Even into the verse 19:98 is 19, this gives us the chapter no. of the verse.

The sum of digits of the NV of Even is also 19, i.e.  $5 + (2+2) + 5 + (1+4) = 19$ .

The table below shows the results when you enter the word Odd into the verse 19:98.

	English Letters	NV of English Letters	Cum. Sum of NV	Arabic Letter	NV of Arabic Letters
<b>ODD</b>	O	15	15	Mim	40
	D	4	19	Nun	50
	D	4	23	Hha	8
				<b>Total</b>	<b>98</b>

Table 10.0b

The total NV of the Arabic letters gotten from entering the word Odd into the verse 19:98 is 98, this gives us the verse no. in the chapter (or the no. of verses in the chapter).

The summing of digits of prime nos. is connected with the nos. 23 & 46, which are the NV of Odd and Even. This same phenomenon played out from the results when the three cases were entered into the verse of the Qur'an: chapter titled Maryam is connected to the chapter no. 19 & 98 verses.

<u>NV of Even &amp; Odd &amp; Verse 19:98</u>	
<u>Even:</u> Total NV of the Arabic letters is 19	
The Chapter no. in the Qur'an is 19	
<u>Odd:</u> Total NV of the Arabic letters is 98	
The Verse no. in the chapter is 98	

The summing of digits of prime nos. till 23 entered into a verse in the chapter of the Qur'an resulted in the chapter's title, Maryam. The words, Even and Odd entered into this same verse gave the chapter's no. 19 and the verse no. 98 respectively.

The message of verse 19:98 has been composed to reflect these mathematical operations, this intriguing discovery greatly demonstrates the profound relationship between mathematics and the Qur'an's composition.

Verse 19:98 establishes beyond any doubt that the Author has rendered every element of the Qur'an's text mathematically composed, such that any addition, subtraction, alteration or omission done to it will stand out in glaring disharmony and is exposed

The coinciding of these mind-blowing mathematical miracles with the verse in chapter 19 is something very significant, bearing in mind that the no. 19 which plays an important role in the structure of the Qur'an, is the common denominator throughout the Qur'an's mathematical system.

The results from entering the sum of digits of prime nos. and English words, Odd and Even into an Arabic verse of the Qur'an are due to the fact that the Arabic letters in the verse had been arranged in a manner appropriate for this purpose.

These results attest to the fact that an endless no. of miracles are hidden in each and every letter of the Qur'an but we may not know. It is God who gives insight into the wisdom and mysteries of this glorious scripture to whoever He chooses.

Let us ponder on these wonders. Do you sincerely think all these could have happened by mere coincidence? It is absolutely impossible. These results provide powerful and compelling evidence that the Qur'an could not have been an invention of Prophet Muhammad.

More Proofs...

Entering the word Even into verse 19:98 gave the Arabic letters with total NV equal to 19, this representing the chapter no. 19. For further verification, if we enter the NV of these Arabic letters into the Qur'an as chapter nos., the total no. of verses from the resulting chapters yields the no. 19 and coefficient, 23.

As seen on the table below, the NV of each Arabic letter coincides with a chapter no. up till the chapter 19. Do note that it is the cumulative sum of NV that gives the chapter nos.

	English Letters	Arabic Letter	NV of Arabic Letters	Cum. Sum of NV / Chapter Nos.	No. of verses
<b>EVEN</b>	E	Ha	5	5	120
	V	Ha	5	10	109
	E	Hha	8	18	110
	N	Alif	1	<b>19</b>	<b>98</b>
					<b>437</b>

$$437 = 19 \times 23$$

The total no. of verses in the chapters, 437 is the product of the code 19 and the no. 23

This total falls on the last chapter no. 19 which is the total NV of the Arabic letters from the word Even. The NV of Even is 46 which is the 23<sup>rd</sup> even no. and the NV of Odd is 23. The sum of digits of nos. till 23 (Odd) is 46 (Even).

The Qur'an had been in existence for many centuries but its mathematical code remained a hidden secret until computer decoding became possible. Computer decoding of the Qur'an was originally started by Dr. Rashad Khalifa and this unveiled an intricate mathematical pattern based on the no. 19 in 1974.

The extraordinary mathematical structure of the Qur'an proves that it cannot possibly be the work of any human. The mathematical structure cannot be duplicated today, even with the aid of a super computer, thus Muhammad who lived in the desert in the dark ages couldn't have been the author of this scripture.

Praise be to God, the Lord of the worlds.

## **AFTERWORD**

The Glorious Qur'an is the ultimate and eternal miracle sent down for all humanity. It is the most important miracle given to the seal of all prophets, Muhammad and the best proof of his prophethood.

The mathematical miracles of the Qur'an endure for all time. It can be witnessed and verified by anyone and everyone in all parts of the world until the end of time, unlike the miracles given to previous prophets which were witnessed by some set of people in a particular place and lasted for a short period of time.

*Nay, by the moon  
And by the night when it passes  
And by the dawn when it shines  
Verily, this is one of the greatest signs.  
– Qur'an 74:32-35*

The highly sophisticated mathematical system embedded into the fabric of the Qur'an provides verifiable physical evidence that the Book is, without a doubt, a revelation from the Lord of the universe.

The proofs of the true God and of the authenticity of the Qur'an that I found by God's leave on the Gregorian calendar also called the "Christian calendar" is overwhelming and what I have presented here in this book "*The God of All Creation*" is just a fraction of it.

This book unveiled the stupendous relationship between the Qur'an and the calendar, it featured signs from the NV of words/dates calculated in English language and also English words entered into the Qur'an producing astounding evidences.

All of these are clearly indicative of the foreknowledge, the absolute control, eternal power and omniscient nature of the Qur'an's Author – attributes no mortal can ever lay claims to.

The Qur'an could not have been the product of any creation, rather it is the true word of God. He promised to show the unbelievers His signs in their own selves until this becomes clear to them. The content of this book is a major fulfillment of this promise.

Most people in the world are disbelievers in the Qur'an and are worshipers of other deities besides the true God. God is talking to all of them through the global language, English and the most popular calendar, Gregorian to desist from this unforgivable sin (if maintained till death).

When the Gregorian calendar was instituted in the year 1582 CE by Pope Gregory XIII, very few countries adopted it as their calendar while majority of the countries around the world objected to it or refused to adopt it.

The adoption of the calendar occurred slowly over a period of centuries, and today it prevails as the most commonly used dating system in the world. Gradually the world accepted the Gregorian calendar, gradually the whole world will come and embrace the Qur'an.

This is not just wishful thinking, but God's prophecy that is bound to be fulfilled. Verse 41:53 and some other verses spells out a divine promise of the advent of a time when the Qur'an will be recognized as the valid and authentic truth from God.

My journey into researching and making discoveries on the numerical miracles and signs of God in the Qur'an started in the year 2009. It wasn't what I had planned, many are the plans in a person's heart but the will of God prevails.

Researching the Gregorian calendar which is one of the best and most exhilarating that I have embarked on started in that same 2009 after I had calculated the NV of Gregorian calendar (152) and it turned out to be a multiple of 19, the miraculous code of the Qur'an.

This got me curious, hence, I probed further and realized that this calendar started exactly 950 years after the revelation of the Qur'an, also a multiple of 19. Afterwards, I found that the calendar started in the holy month of Ramadan, the same month in which the Qur'an was revealed.

By God's leave, I proceeded to enter the entire Qur'an into the calendar, and then entered the calendar into the Qur'an. This gave birth to series of outstanding miracles that I compiled into one of my previous books titled "*The Gregorian Calendar and The Grand Miracles*".

*The Gregorian Calendar and The Grand Miracles* clarifies many controversial issues. It features discoveries regarding the Qur'an, Gregorian calendar, the code 19, Abraham, Jesus, Muhammad, Salat, Time Units System of Coding (TUSC), Date of Confirmations and others.

The whole of the book "*The God of All Creation*" contains my research and the numerical miracles God in His infinite mercies has blessed me with. I have tried as much as possible to make it easy to understand and verifiable by anybody that choose to.

As expected, there are people who will never believe in God's signs no matter how many are given to them and no matter what you show them. They will disregard it and find all kinds of reasons to belittle it. It is not for me to make you believe; it is for me to make you know of the truth.

To whom much is given, much will be required. If we have been blessed with talents, wealth, knowledge and the like, it is expected that we benefit others, and that I have done by sharing this knowledge. So, whatever you choose to make out of it is up to you.

As promised in the Qur'an, it is only signs that God will continue to show us. God or His angels will not come down to talk to us. It is only advisable that we recognize these signs, accept them, and submit ourselves wholeheartedly to the true God alone in obedience and worship.

The right path has become so distinct from the wrong and it is now left to you to either take heed or not or whether to progress or regress, but my wish for you is the best in this life and more importantly, the best in the hereafter.

## **ACKNOWLEDGEMENT**

All things, including all knowledge and wisdom comes from God Almighty. Not only is His knowledge infinite, but it is also absolute. God reveals deep and secret things that mankind is completely oblivious of to whoever He wills and at the time appointed.

Starting from the year 2009, God has blessed me with the discoveries of some of His greatest and overwhelming numerical signs and miracles which are aimed at fulfilling His great prophecy in the Qur'an. This, I consider a very great privilege bestowed upon me and on this note I say:

*PRAISE BE TO GOD, THE LORD OF THE WORLDS, THE BENEFICENT, THE MERCIFUL.  
THE ALL-SEER AND THE ALL-KNOWER, WHO HAS TAUGHT BY THE PEN AND TAUGHT  
man THAT WHICH he KNEW NOT.*

*Yakub Abdul-Azeez*
